Mastering Elixir André Albuquerque, Daniel Caixinha, 2018-07-30 Leverage the power of Elixir programming language to solve practical problems associated with scalability concurrency fault tolerance and high availability Key Features Enhance your Elixir programming skills using its powerful tools and abstractions Discover how to develop a full fledged file server Understand how to use Phoenix to create a web interface for your application Book Description Running concurrent fault tolerant applications that scale is a very demanding responsibility After learning the abstractions that Elixir gives us developers are able to build such applications with inconceivable low effort There is a big gap between playing around with Elixir and running it in production serving live requests This book will help you fill this gap by going into detail on several aspects of how Elixir works and showing concrete examples of how to apply the concepts learned to a fully fledged application In this book you will learn how to build a rock solid application beginning by using Mix to create a new project Then you will learn how the use of Erlang's OTP along with the Elixir abstractions that run on top of it such as GenServer and GenStage that allow you to build applications that are easy to parallelize and distribute You will also master supervisors and supervision trees and comprehend how they are the basis for building fault tolerant applications Then you will use Phoenix to create a web interface for your application Upon finishing implementation you will learn how to take your application to the cloud using Kubernetes to automatically deploy scale and manage it Last but not least you will keep your peace of mind by learning how to thoroughly test and then monitor your application What you will learn Use Elixir tools including IEx and Mix Find out how an Elixir project is structured and how to create umbrella applications Discover the power of supervision trees the basis for fault tolerance Create a Domain Specific Language DSL that abstracts complexity Create a blazing fast web interface for your application with Phoenix Set up an automatic deployment process for the cloud Monitor your application and be warned if anything unexpected happens Who this book is for Mastering Elixir is for you if you have experience in Elixir programming and want to take it to the next level This Elixir book shows you how to build deploy and maintain robust applications allowing you to go from tinkering with Elixir on side projects to using it in a live environment However no prior knowledge of Elixir is required to enjoy the complex topics covered in the book

Protein Bioinformatics Frédérique Lisacek, 2024-07-12 This detailed volume explores techniques for protein bioinformatics research including databases software tools and computational methods in the context of protein science or proteomics and opening to other omics areas Beginning with a section on proteogenomics the book continues by covering posttranslational modifications processing large scale mass spectrometry data protein structure and interactions as well as protein feature inference Written for the highly successful Methods in Molecular Biology series chapters include the kind of detailed implementation advice to ensure efficacious results Authoritative and practical Protein Bioinformatics serves as an ideal guide for researchers in disciplines encompassing the biotechnological pharmaceutical biological and medical sciences as well as the computational and

engineering sciences **Big Data in Predictive Toxicology** Daniel Neagu,Andrea-Nicole Richarz,2019-12-04 The rate at which toxicological data is generated is continually becoming more rapid and the volume of data generated is growing dramatically This is due in part to advances in software solutions and cheminformatics approaches which increase the availability of open data from chemical biological and toxicological and high throughput screening resources However the amplified pace and capacity of data generation achieved by these novel techniques presents challenges for organising and analysing data output Big Data in Predictive Toxicology discusses these challenges as well as the opportunities of new techniques encountered in data science It addresses the nature of toxicological big data their storage analysis and interpretation It also details how these data can be applied in toxicity prediction modelling and risk assessment This title is of particular relevance to researchers and postgraduates working and studying in the fields of computational methods applied and physical chemistry cheminformatics biological sciences predictive toxicology and safety and hazard assessment

Database Systems for Advanced Applications Kian Lee Tan,Vilas Wuwongse,2006-04-05 This book constitutes the refereed proceedings of the 11th International Conference on Database Systems for Advanced Applications DASFAA 2006 held in Singapore in April 2006 46 revised full papers and 16 revised short papers presented were carefully reviewed and selected from 188 submissions Topics include sensor networks subsequence matching and repeating patterns spatial temporal databases data mining XML compression and indexing xpath query evaluation uncertainty and streams peer to peer and distributed networks and more **Pathology of Genetically Engineered and Other Mutant Mice** John P.

Sundberg,Peter Vogel,Jerrold M. Ward,2022-01-26 An updated and comprehensive reference to pathology in every organ system in genetically modified mice The newly revised and thoroughly updated Second Edition of Pathology of Genetically Engineered and Other Mutant Mice delivers a comprehensive resource for pathologists and biomedical scientists tasked with identifying and understanding pathologic changes in genetically modified mice The book is organized by body system includes descriptions and explanations of a wide range of findings as well as hundreds of color photographs illustrating both common and rare lesions that may be found in genetically engineered and wild type mice The book is written by experienced veterinary and medical pathologists working in veterinary medical colleges medical colleges and research institutes Covering the latest discoveries in mouse pathology resulting from advancements in biotechnology research over the last 30 years this singular and accessible resource is a must read for veterinary and medical pathologists and researchers working with genetically engineered and other mice Readers will also benefit from A thorough introduction to mouse pathology and mouse genetic nomenclature as well as databases useful for analysis of mutant mice An exploration of concepts related to validating animal models including the Cinderella Effect Practical discussions of basic necropsy methods and grading lesions for computational analyses Concise diagnostic approaches to the respiratory tract the oral cavity and GI tract the cardiovascular system the liver and pancreas the skeletal system and other tissues As a one stop and up to date reference on mouse

The Wheat Genome Rudi Appels, Kellye Eversole, Catherine Feuillet, Dusti Gallagher, 2023-11-13 This open access book provides the first

comprehensive coverage of the wheat genome sequence since the publication of the draft and reference sequences for bread wheat and durum wheat. It presents an overview and all aspects of the gold standard sequence of the bread wheat genome IWGSC RefSeq v1.0 and its subsequent improvements through 2022 IWGSC RefSeq v2.1 as well as the sequencing of multiple elite wheat varieties, durum wheat and ancient wheat. The book provides a broad and extensive review of the resources, tools and methodologies available for exploiting the wheat genome sequence for crop improvement and studying fundamental questions related to the structure, function and evolution of the wheat genome. Wheat (*Triticum aestivum* L.) is the most widely grown crop in the world, contributing approximately 20 percent of total calories and more protein in human diets than any other single source. This book is useful to students, teachers and scientists in academia and industry interested in gaining an understanding of the wheat genome and its application, as well as plant scientists generally interested in polyploid plant species.

Data Analytics and Machine Learning for Integrated Corridor Management Yashawi Karnati, Dhruv Mahajan, Tania Banerjee, Rahul Sengupta, Packard Clay, Ryan Casburn, Nithin Agarwal, Jeremy Dilmore, Anand Rangarajan, Sanjay Ranka, 2024-10-25. In an era defined by rapid urbanization and ever increasing mobility demands, effective transportation management is paramount. This book takes readers on a journey through the intricate web of contemporary transportation systems, offering unparalleled insights into the strategies, technologies and methodologies shaping the movement of people and goods in urban landscapes. From the fundamental principles of traffic signal dynamics to the cutting edge applications of machine learning, each chapter of this comprehensive guide unveils essential aspects of modern transportation management systems. Chapter by chapter, readers are immersed in the complexities of traffic signal coordination, corridor management, data driven decision making and the integration of advanced technologies. Closing with chapters on modeling measures of effectiveness and computational signal timing optimization, the guide equips readers with the knowledge and tools needed to navigate the complexities of modern transportation management systems. With insights into traffic data visualization and operational performance measures, this book empowers traffic engineers and administrators to design 21st century signal policies that optimize mobility, enhance safety and shape the future of urban transportation.

Access and Benefit Sharing of Genetic Resources, Information and Traditional Knowledge Charles Lawson, Michelle Rourke, Fran Humphries, 2022-10-14. Addressing the management of genetic resources, this book offers a new assessment of the contemporary Access and Benefit Sharing (ABS) regime. Debates about ABS have moved on. The initial focus on the legal obligations established by international agreements like the United Nations Convention on Biological Diversity and the form of obligations for collecting physical biological materials have now shifted into a far more complex series of disputes and challenges about the ways ABS should be implemented and enforced. These now cover a wide range of issues including digital sequence information, the repatriation of

resources technology transfer traditional knowledge and cultural expressions open access to information and knowledge naming conventions farmers rights new schemes for accessing pandemic viruses sharing DNA sequences and so on Drawing together perspectives from an interdisciplinary range of leading and emerging international scholars this book offers a new approach to the ABS landscape as it breaks from the standard regulatory analyses in order to explore alternative solutions to the intractable issues for the Access and Benefit Sharing of genetic resources Addressing these modern legal debates from a perspective that will appeal to both ABS scholars and those with broader legal concerns in the areas of intellectual property food governance Indigenous issues and so on this book will be a useful resource for scholars and students as well as those in government and in international institutions working in relevant areas
