London area May u2013 July 2018 This will be supplemented with interviews with key stakeholders April u2013 May 2018 and analysis of existing protocols and documents relating to the use of GoodSAM with London Ambulance Service systems

Barriers and facilitators to AED use will be classified using the well validated Theoretical Domains Framework 3 This framework will subsequently be mapped to models of behavioural change 4 Results We will present the findings of 30 GoodSAM volunteer interviews and three stakeholder interviews We will present key barriers and facilitators as mapped to the Theoretical Domains Framework and explain which behaviours need to be targeted to overcome key barriers to AED use

Conclusions This work to identify potential targets for behavioural change that can increase bystander AED use This will also inform future research studies to test targeted interventions and assess their effect

Drake,2000 For courses in Automated External Defibrillation This new comprehensive stand alone manual emphasizes the basic principles of the AED as well as reinforcing the cognitive affective and psychomotor skills necessary for using the AED in a cardiac arrest situation *The Defibrillator Guidelines* AED Deployment Registry,2012 *Public Use of Automated External Defibrillators* Sherry L. Caffrey,Paula J. Willoughby,Paul E. Pepe,Lance B. Becker,2002 What Type Of Automated External Defibrillators (AEDs) Do Primary Care Doctors Want? Mairead McFadden,2017 Purpose of the studyThe purpose of this study was to ascertain what type of AEDs a group of 33 General Practitioners GPs who had previously been supplied and used AEDs would wish for as replacements for existing defibrillators Previous studies have identified AEDs as the most suitable defibrillators for GPs1 3 This study aims to focus on the type of AEDs GPs preferred in advance of deciding to replace 108 AEDs to GPs in the North West region of Ireland Materials and methodsThe survey was conducted among GPs attending for a teaching update on basic life support BLS The question posed was whether they considered it important to have a screen on an AED to allow monitoring of rhythms or would they be happy to have a model that simply delivered a shock The replies received are as outlined in figure 1 below Additional information obtained was that the majority of GPs stored their AEDs in their surgeries and considered it

useful to have an AED located outside their surgery ConclusionThe study identified that 48% of GPs felt the presence of a monitor screen was useful while 26% felt it was not useful or served as a distraction Analysis of cost of adding a monitor screen across three leading brands of AEDs was an extra 46% in cost In the context of resupplying 108 GPs with AEDs as a public health initiative the presence of a monitor screen would add significant additional cost for little quantifiable benefit References1 Colquhoun M Resuscitation by primary care doctors Resuscitation 2006 70 229 237 2 Masterson S Wright P Dowling J Swann D Bury G Murphy A Out of hospital cardiac arrest OHCA survival in rural Northwest Ireland 17 yearsu2019 experience Emergency Medical Journal 2011 28 437 438 3 Bury G Headon M Egan M Dowling J Cardiac Arrest management in general practice in Ireland a 5 year cross sectional study BMJ Open 2013 3 e002563 Doi 10 1136 bmjopen 2013 002563

Roszak,2007 **A Community Needs Assessment for Public Access Defibrillation** Patrick J. Mullen,2000 Recent technological advances in computer and electronics design have enabled medical device manufacturers to develop lightweight intrinsically simple automatic external defibrillators AED Simple to operate minimally trained non medical personnel may successfully operate these devices Due to their proven accuracy and reliability in treating sudden cardiac arrest SCA the American Heart Association recognizes them as essential in treating victims of sudden cardiac arrest in certain situations Because of these factors AEDs have gained in popularity among municipal service providers as well as private industry as a means to broaden the availability of defibrillation to the general populace and to reduce the time it takes to bring a defibrillator to the side of a stricken patient Acknowledging that the City of Naperville has yet to develop a program to promote public access defibrillation PAD within the community research was undertaken through descriptive method to conduct an assessment to evaluate the need for implementing a PAD program in Naperville The project attempted to answer the following questions 1 What is the prevalence of sudden cardiac arrest patients treated by the Naperville Fire Department 2 What are the essential components of a public access defibrillation program 3 What community groups should be considered for inclusion in an implementation plan 4 What have other organizations done to successfully implement public access defibrillation programs Research procedures combined the use of two retrospective studies and a survey questionnaire One study consisted of a three year review of patient care reports to determine the location of sudden cardiac arrest events treated by fire department personnel A second look back study sought to quantify cardiac arrest survival data for patients treated in 1999 The third research effort included the distribution of a survey questionnaire to organizations both public and private that had previously implemented PAD programs Results indicated that the Naperville Fire Department demonstrated a hospital discharge rate of 5 8 percent for individuals treated for out of hospital sudden cardiac arrest This contrasted with a successful resuscitation rate of 15 15 percent reported by questionnaire survey participants using AEDs Despite the posting a relatively rapid response time for ALS services to SCA

events averaging 3 25 minutes most cardiac arrest patients treated by Naperville paramedics presented with an initial EKG of asystole The majority of arrests occurred in the home 62 24% and appeared to result from a cardiac etiology 84 06 percent of the time Based upon the demonstrated survival rate and the apparent successes of police agencies participating in the survey recommendations were made to promote the implementation of a PAD program With the Fire Department serving as the lead agency target priorities for deployment included police department patrol vehicles appropriate public access government buildings institutional residential care occupancies and large corporate campuses STAR 112804 **Automated External Defibrillation [AED]** ,2003-01-01
