Manual, 2004 [Essentials of Management for Healthcare Professionals](#) Hari Singh, 2017-12-15 Medical care is an industry and private providers and hospitals are the major service providers They operate on business principles Hospitals are getting highly specialized and complex The diagnostics and therapeutics are technology intensive Private establishments have to compete with one another to remain in business They strive to induct the best talent and latest technical know how resulting in ever increasing costs to patients Patients who pay high charges demand quality as a matter of right To meet the challenge hospitals are constrained to bring in professionalism in their systems and services They appoint qualified professional managers to manage their clinics and hospitals with a view to sparing health professionals to focus on clinical care Whether right or wrong management is often associated with authority and power As a result the medical professionals are reduced to secondary level in some organizations To retain commanding positions in medical organizations it has become necessary for the healthcare professionals to learn management at least its basics On the other hand non medical managers while managing healthcare services do not get the required cooperation from the medical professionals as the latter are often secretive and not willing to share medical knowledge If medical knowledge is demystified non medical managers can perform

many functions in healthcare organizations proficiently Both medical and non medical managers can complement each other in providing quality healthcare services The book aims to orient clinicians including physicians and nurses and other healthcare professionals on the essentials of business management and to familiarize them with management terms and jargon They can learn to be effective managers besides being health professionals Similarly non medical managers can get familiarized to nuances of clinical care and special managerial requirements of healthcare facilities They all will be able to relate processes in healthcare settings with the concepts of business management They can develop expertise on patient relationship management **Strauss and Mayer's Emergency Department Management (eBook)** Robert W.
