Headache in Otolaryngology: Rhinogenic and Beyond, An Issue of Otolaryngologic Clinics of North America Howard Levine, 2014-04-28 Patients present to physicians with headache or facial pain and are certain that it is a sinus headache. Specialists of all types: otolaryngologists, allergists, neurologists, internists, and emergency physicians are confronted almost daily with these patients. *Headache in Otolaryngology: Rhinogenic and Beyond* describes headaches ascribed to other causes, migraine, as well as headaches that actually are a result of sinusitis. This volume addresses the need for expertise of an otolaryngologist who can obtain a history of nasal and sinus disease, evaluate the interior of the nose, and correlate it to a computed tomographic (CT) scan, along with collaboration of neurologists, headache specialists. Because headaches are often a symptom of potentially dangerous medical conditions that may need emergency work up and referral to the appropriate physician, information in this volume identifies these emergency conditions for the clinician. Topics include: Confusion about sinus headache; Diagnosing Adult and Pediatric Headache; Imaging for the headache patient; TMJ head pain; Signs of dangerous headache; Vertiginous headache; Rhinogenic headache; Medical treatment of headache; and Surgery for headache.
