Moving Forward in the Study of Temperament and Early Education Outcomes Cynthia L. Smith, David J. Bridgett, 2020-06-29 This book furthers understanding of how child temperament is linked to educational outcomes through mediating and moderating factors As the importance of socio emotional development for educational outcomes is increasingly recognized understanding the influence that children s temperament which includes their emotional reactivity and regulation of emotions cognitions and behaviors can have on educational factors such as school readiness and academic achievement is crucial First the chapters in this book examine pathways connecting temperament with educational outcomes for example one study reports that toddler negative affect predicted executive functioning which then predicted achievement at age six The second way that chapters in this book examine links between temperament and education is by identifying factors that make associations between temperament and educational outcomes more salient for example findings from one study show that shyness and negative emotion were more strongly associated with lower academic achievement only when children received fewer than nine hours of sleep each night highlighting the importance of sleep By examining pathways through which temperament exerts effects on educational outcomes i e mediators or factors that modify associations between temperament and educational outcomes i e moderators the potential for interventions aimed at improving early educational outcomes can be fully realized This book was originally published as a special issue of Early Education and Development

Cradle to Kindergarten Ajay Chaudry, Taryn Morrissey, Christina Weiland, Hirokazu Yoshikawa, 2017-03-01 Early care and education for many children in the United States is in crisis The period between birth and kindergarten is a critical time for child development and socioeconomic disparities that begin early in children s lives contribute to starkly different long term outcomes for adults Yet compared to other advanced economies high quality child care and preschool in the United States are scarce and prohibitively expensive for many middle class and most disadvantaged families To what extent can early life interventions

provide these children with the opportunities that their affluent peers enjoy and contribute to reduced social inequality in the long term Cradle to Kindergarten offers a comprehensive evidence based strategy that diagnoses the obstacles to accessible early education and charts a path to opportunity for all children The U S government invests less in children under the age of five than do most other developed nations Most working families must seek private childcare which means that children from low income households who would benefit most from high quality early education are the least likely to attend them Existing policies such as pre kindergarten in some states are only partial solutions To address these deficiencies the authors propose to overhaul the early care system beginning with a federal paid parental leave policy that provides both mothers and fathers with time and financial support after the birth of a child They also advocate increased public benefits including an expansion of the child care tax credit and a new child care assurance program that subsidizes the cost of early care for low and moderate income families They also propose that universal high quality early education in the states should start by age three and a reform of the Head Start program that would include more intensive services for families living in areas of concentrated poverty and experiencing multiple adversities from the earliest point in these most disadvantaged children s lives They conclude with an implementation plan and contend that these reforms are attainable within a ten year timeline Reducing educational and economic inequalities requires that all children have robust opportunities to learn fully develop their capacities and have a fair shot at success Cradle to Kindergarten presents a blueprint for fulfilling this promise by expanding access to educational and financial resources at a critical stage of child development **Intellectual**
