A Comparative Approach to Policy Analysis Howard M. Leichter, 1979-10-31 This book provides a framework for explaining why governments adopt the policies they do In addition it establishes a basis for comparing political systems in terms of their public policies rather than their institutions or political processes The book begins by placing in a historical perspective the worldwide role of the state as a major provider of goods and services Following this general background is an accounting scheme that brings some semblance of order to the seemingly infinite variety of policy relevant variables and makes the comparative study of public policy more manageable It is suggested that any nation s public policies can be explained in terms of situational structural environmental and cultural factors The second part of the book applies the accounting scheme to an increasingly specific and narrow range of public policies The author examines one

crucial area of public policy health care and the evolution of that policy in four diverse nations Germany Great Britain the Soviet Union and Japan The book concludes with an assessment of the prospects for an American national health care programme in the light of the experiences of these other nations

Essentials of Health Policy and Law (Includes the 2018 Annual Health Reform Update) Includes the 2018 Annual Health Reform Update Joel B. Teitelbaum, Sara E. Wilensky, 2017 Public opinion polls media coverage legal disputes and policy debates at all levels of government and in private industry debates ranging from the health of the national economy to the health of state populations to the health of a single individual sickened by Ebola hemorrhagic fever attest to the important place that individual health care and public health hold in the minds of the American public policymakers and lawmakers Indeed the range of topics covered by the legal disputes and policy debates is breathtaking For example how should finite financial resources be allocated between health care and public health What kind of return in terms of quality of individual care and the overall health of the population should we expect from the staggering amount of money we collectively spend on health Should individuals have a legal entitlement to health insurance How should we attack extant health disparities based on race ethnicity and socioeconomic status What policies will best protect the privacy of personal health information in an increasingly electronic medical system Should physician assistance in dying be promoted as a laudable social value How prepared is the country for natural and man made catastrophes like pandemic influenza or bioterrorism attacks
