The Oxford Handbook of the Archaeology of Diet Julia Lee-Thorp, M. Anne Katzenberg, 2024-06-24 Humans are unique among animals for the wide diversity of foods and food preparation techniques that are intertwined with regional cultural distinctions around the world. The Oxford Handbook of the Archaeology of Diet explores evidence for human diet from our earliest ancestors through the dispersal of our species across the globe. As populations expanded, people encountered new plants and animals and learned how to exploit them for food and other resources. Today, globalization aside, the results manifest in a wide array of traditional cuisines based on locally available indigenous and domesticated plants and animals. How did this complexity emerge? When did early hominins actively incorporate animal foods into their diets and later exploit marine and freshwater resources? What were the effects of reliance on domesticated grains such as maize and rice on past populations and the health of individuals? How did a domesticated plant like maize move from its place of origin to the northernmost regions where it can be grown? Importantly, how do we discover this information and what can be deduced about human health, biology, and cultural practices in the past and present? Such questions are explored in thirty-three chapters written by leading researchers in the study of human dietary adaptations. The approaches encompass everything from information gleaned from comparisons with our nearest primate relatives to tools used in procuring and preparing foods, skeletal remains, chemical or genetic indicators of diet and genetic variation, and modern or historical ethnographic observations. Examples are drawn from across the globe, and information on the research methods used is embedded within each chapter. The Handbook provides a comprehensive reference work for advanced undergraduate and graduate students and for professionals seeking authoritative essays on specific topics about diet in the human past.

Biodiversity Change and Human Health Osvaldo E. Sala, Laura A. Meyerson, Camille Parmesan, 2012-09-26 Biodiversity Change and Human Health brings together leading experts from the natural science and social science realms as well as the medical community to explore the explicit linkages between human-driven alterations of biodiversity and documented impacts of those changes on human health. The book utilizes multidisciplinary approaches to explore and address the complex interplay between natural biodiversity and human health and well-being. The five parts examine health trade-offs between competing uses of biodiversity, highlighting synergistic situations in which conservation of natural biodiversity actually promotes human health and well-being, relationships between biodiversity and quality of life that have developed over ecological and evolutionary time, the effects of changing biodiversity on provisioning of ecosystem services and how they have affected human health, the role of biodiversity in the spread of infectious disease, native biodiversity as a resource for traditional and modern medicine. Biodiversity Change and Human Health synthesizes our current understanding and identifies major gaps in knowledge as it places all aspects of biodiversity and health interactions within a common framework. Contributors explore potential points of

particular it affects the regions where the current burden of climate sensitive diseases are high which is the case in South and Southeast Asian countries *Ageing, Wellbeing and Climate Change in the Arctic* Paivi Naskali, Marjaana Seppänen, Shahnaj Begum, 2015-11-19 The Arctic and its unique natural resources have become objects of increasing concern Rapid climate change and ageing of the population are transforming the living conditions in the region This translates into an urgent need for information that will contribute to a better understanding of these issues *Ageing Wellbeing and Climate Change in the Arctic* addresses the important intersection of ageing wellbeing and climate change in the Arctic region making a key interdisciplinary contribution to an area of research on which little has been written and limited sources of information are currently available The book explores three key areas of discussion First various political issues that are currently affecting the Arctic such as the social categorisation of elderly people Second the living conditions of the elderly in relation to Arctic climate change Third the wellbeing of elderly people in terms of traditional knowledge and lifestyles The book also features contributions from a number of key researchers in the field which examine a broad range of case studies including the impact of climate change on health in Lapland and elderly people and geographical mobility in Norway This book will be of great interest to scholars of climate change gerontology and social policy *Extreme Weather, Health, and Communities* Sheila Lakshmi Steinberg, William A. Sprigg, 2016-04-20 This volume presents a unique interdisciplinary approach drawing on expertise in both the natural and social sciences A primary goal is to present a scientific and socially integrated perspective on place based community engagement extreme weather and health Each year extreme weather is leading to natural disasters around the world and exerting huge social and health costs The International Monetary Fund 2012 estimates that since 2010 700 worldwide natural disasters have affected more than 450 million people around the globe The best coping strategy for extreme weather and environmental change is a strong offense Communities armed with a spatial understanding of their resources risks strengths weaknesses community capabilities and social networks will have the best chance of reducing losses and achieving a better outcome when extreme weather and disaster strikes **Caregiving on the Periphery** Myra Rutherdale, 2010 Fascinating stories of the unconventional work of nurses and midwives in Canada *Climate Change and Human Health Scenarios* Rais Akhtar, 2024-01-01 The objective of the present edited book is to encompass studies from both developed and developing countries of Asia Africa Europe and Americas to understand and present a comparative scenario of the climate change and other environmental determinants of health and disease in geographically diversified countries Environment and health perspective dates back to Hippocrates treatise written 400 B C E In his book *On Airs Waters and Places* Hippocrates described diseases as associated with environmental conditions Whoever wishes to investigate medicine properly should proceed thus in the first place to consider the seasons of the year and what effects each of them produces for they are not at all alike but differ much from themselves in regard to their changes Then the winds the hot and the cold especially such as are common to all countries and then such as are peculiar to

each locality We must also consider the qualities of the waters for as they differ from one another in taste and weight so also do they differ much in their qualities In the same manner when one comes into a city to which he is a stranger he ought to consider its situation how it lies as to the winds and the rising of the sun for its influence is not the same whether it lies to the north or the south to the rising or to the setting sun There has been a greater emphasis in the last four decades on understanding environmental factors which affect human health after United Nations established Intergovernmental Panel on Climate Change IPCC in 1988 aimed at to evaluate research on changing environmental condition particularly climate change and its impacts on human wellbeing including human health as consequences of extreme heat waves conditions sea level rise forced migration air pollution droughts and wildfires From these studies risk levels of vulnerable populations and regions can be assessed and level of resilience of healthcare infrastructure that may be used in environmental health policy and equity of these countries

The Health of Native Americans T. Kue Young, 1994 The etiology and pathogenesis of different diseases are discussed and genetic and environmental risk factors are considered The book also compares the incidence of disease among Native Americans and non Native Americans examines variations among Native Americans belonging to different geographical cultural and linguistic groups and reviews control and prevention strategies On a broader level the purpose of this book is to integrate the approaches of anthropology and epidemiology in order to demonstrate the interaction of biology and culture on disease causation distribution and control

One Health Case Studies: Addressing Complex Problems in a Changing World Susan C. Cork, David Hall, Karen Liljebjelke, 2016-11-14. One Health refers to an interdisciplinary approach to solving complex problems at the interface of human and animal health and the wider ecosystem. It represents an integrated and collaborative approach and addresses diverse issues such as the detection and management of emerging and re-emerging infectious and non-infectious diseases, food and water security, food hygiene and global trade. Many complex problems that we currently face must consider anthropogenic factors as well as climate change, environmental impact, international collaboration, tourism, the human-animal bond, economics, plant health and myriad other factors. This book discusses complex concepts in One Health such as preparedness, planning, national level governance, inter-agency co-operation, climate change, human activity in sensitive ecosystems, the global food trade and food safety, antimicrobial resistance, surveillance and communication from policy level to practical application. The book uses real world case studies from different geographical regions ranging from Asia to the Arctic, different environments from the jungle to the oceans and different species including bees, fish, domestic and wild animals and humans. The cases are prepared by experts with a diverse range of experience and provide a unique and fascinating on-the-ground approach to One Health topics in practice. One Health Case Studies is an ideal resource for students and practitioners in veterinary medicine, human medicine, public health, agriculture, wildlife management, ecosystem health and environmental management. 5m Books. Climate Change and Mental Health Equity Rhonda J. Moore, 2024-07-18. Climate change is a driver of poverty, poor mental health, inequity and increased intersectional vulnerability with significant differential global impacts on individual and community health and well-being. For example, people living in low resource settings in high income countries (HICs) and in low and middle income countries (LMICs) are at greater risk, often experiencing fragile socioeconomic, political and health infrastructures and conflict affected settings (FCAS) that place them at greater risk and vulnerabilities to climate change related mental health impacts. The broad goal of this book is to place a social justice and inclusive lens on climate change and mental health equity, focusing on these three key elements: people, place and community. The book includes perspectives from the global North, the global South and Indigenous perspectives to help provide greater

insight into how we can better understand climate change and mental health equity across peoples place and community This book s three pronged approach will focus on certain trends in this emerging and growing field also bridging some of the more extensive gaps and is a tool for better understanding how mental health disparities might be addressed at this time

Health And Change In The Subarctic: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Health And Change In The Subarctic : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Pappen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
