Embodiment And Experience The Existential Ground Of Culture And Self:

Embodiment and Experience Thomas J. Csordas, 1994-11-17 Students of culture have been increasingly concerned with the ways in which cultural values are inscribed on the body These essays go beyond this passive construal of the body to a position in which embodiment is understood as the existential condition of cultural life From this standpoint embodiment is reducible neither to representations of the body to the body as an objectification of power to the body as a physical entity or biological organism nor to the body as an inalienable centre of individual consciousness This more sensate and dynamic view is applied by the contributors to a variety of topics including the expression of emotion the experience of pain ritual healing dietary customs and political violence Their purpose is to contribute to a phenomenological theory of culture and self an anthropology that is not merely about the body but from the body

Embodiment and Experience Thomas J. Csordas, 1994 A collection of essays examining the relationship between cultural values and the body as a source of symbols and instrument of experience

policies that effect them *Chinese Gong Fu* R.F. Gonzalez,2019-10-04 Gong fu the indigenous martial art of China was exported into American popular culture through numerous kung fu movies in the 20th century Perhaps the most renowned of the martial arts in the U S gong fu remains often misunderstood perhaps because of its esoteric practices that include aspects of Daoism Confucianism Buddhism and other syncretic elements Using the science of embodiment the study of the interaction between body mind cognition behavior and environment this book explores the relationships among practitioner praxis spirituality philosophy and the body in gong fu Drawing on familiar routines films artifacts and art the author connects the reader to ancient Chinese culture philosophy myth shamanism and ritual *The Body in Everyday Life* Sarah Nettleton,Jonathan Watson,2002-03-11 We all have a body but how does it impact upon our day to day life This book sets out to explore how ordinary women men and children talk about their bodies through four central themes physical and emotional bodies illness and disability gender ageing A coherent collection of such empirical research The Body in Everyday Life provides an accessible introduction to the sociology of the body a field previously dominated by theoretical or philosophical accounts **The Pursuit of Excellence Through Education** Michel Ferrari,2001-12 Although specific definitions may change over time few goals are considered more important to education than the pursuit of academic excellence There are many different viewpoints on this issue today among educational psychologists and other social scientists One particularly glaring fault line in the debate divides those who emphasize developing individual learning and those who focus on promoting cultural and institutional reform These two perspectives are rarely addressed in a single volume In this book well known theorists and researchers present a range of perspectives on how to promote excellence in education This allows those who stress transformation of educational practice and those who emphasize individual abilities to speak to each and invites readers to jointly consider the arguments for both positions or for some synthesis of the two The point is to consider how these two divergent viewpoints can be reconciled or simply coordinated in an effort to benefit both students and society at large The main thesis is that excellence can be fostered without sacrificing equity both of which are fundamental tenets of a democratic education The issues addressed in this book have implications and relevance for school reform efforts and across the fields of educational psychology curriculum and instruction philosophy of education and educational leadership The volume provides a unique source for students and teachers in various disciplines who want to gain a broader and more integrated view of the nature and development of excellence through education *The Art and Science of Embodied Research Design* Jennifer Frank Tania,2020-11-18 The Art and Science of Embodied Research Design Concepts Methods and Cases offers some of the nascent perspectives that situate embodiment as a necessary element in human research This edited volume brings together philosophical foundations of embodiment research with application of embodied methods from several disciplines The book is divided into two sections Part I Concepts in Embodied Research Design suggests ways that embodied epistemology may bring deeper understanding to current research theory and describes the ways in which

embodiment is an integral part of the research process In Part II Methods and Cases chapters propose novel ways to operationalize embodied data in the research process The section is divided into four sub sections Somatic Systems of Analysis Movement Systems of Analysis Embodied Interviews and Observations and Creative and Mixed Methods Each chapter proposes a method case an example of a previously used research method that exemplifies the way in which embodiment is used in a study As such it can be used as scaffold for designing embodied methods that suits the researcher s needs It is suited for many fields of study such as psychology sociology behavioral science anthropology education and arts based research It will be useful for graduate coursework in somatic studies or as a supplemental text for courses in traditional research design *Transformational Embodiment in Asian Religions* George Pati,Katherine C. Zubko,2019-10-28 This volume examines several theoretical concerns of embodiment in the context of Asian religious practice Looking at both subtle and spatial bodies it explores how both types of embodiment are engaged as sites for transformation transaction and transgression Collectively bridging ancient and modern conceptualizations of embodiment in religious practice the book offers a complex mapping of how body is defined It revisits more traditional mystical religious systems including Hindu Tantra and Yoga Tibetan Buddhism Bon Chinese Daoism and Persian Sufism and distinctively juxtaposes these inquiries alongside analyses of racial gendered and colonized bodies Such a multifaceted subject requires a diverse approach and so perspectives from phenomenology and neuroscience as well as critical race theory and feminist theology are utilised to create more precise analytical tools for the scholarly engagement of embodied religious epistemologies This a nuanced and interdisciplinary exploration of the myriad issues around bodies within religion As such it will be a key resource for any scholar of Religious Studies Asian Studies Anthropology Sociology Philosophy and Gender Studies Complementary and Alternative Medicine Merrijoy Kelner,Beverly Wellman,2014-05-12 The rapid growth of Complementary and Alternative Medicine CAM demands that the public the medical world social scientists the media and governments pay attention People are questioning the limits of what modern medicine can accomplish and seeking additional ways to manage their health While many are enthusiastically adopting complementary and alternative forms of medicine others are more sceptical Physicians attitudes are in transition and governments are pondering where this increasingly important phenomenon fits into the health care system The challenge is to keep pace with the changing ways that people view health and illness take responsibility for themselves and incorporate CAM into their health care This text brings together for the first time a wide range of leading North American and European social scientists to identify who uses CAM why they use it and how they find out about it Presenting research from psychology sociology anthropology and public health they alert us to the current context of CAM use and provide new models and techniques for understanding its future place in health care

Self-Alteration Jean-Paul Baldacchino,Christopher Houston,2023-11-10 Many of us feel a pressing desire to be different to be other than who we are Self conscious we anxiously perceive our shortcomings or insufficiencies wondering why we are

how we are and whether we might be different Often we wish to alter ourselves to change our relationships and to transform the person we are in those relationships Not only a philosophical question about how other people change self alteration is also a practical care can I change and how Self Alteration How People Change Themselves across Cultures explores and analyzes these apparently universal hopes and their related existential dilemmas The essays here come at the subject of the self and its becoming through case studies of modes of transformation of the self They do this with social processes and projects that reveal how the self acquires a non trivial new meaning in and through its very process of alteration By focusing on ways we are allowed to change ourselves including through religious and spiritual traditions and innovations embodied participation in therapeutic programs like psychoanalysis and gendered care services and political activism or relationships with animals the authors in this volume create a model for cross cultural or global analysis of social self change that leads to fresh ways of addressing the self itself
