The Triumph of Music Tim Blanning, 2013-03-07 Once musicians such as Mozart were little more than court servants, now they are multimillionaire superstars wielding more power than politicians. How did this extraordinary change come about? Tim Blanning's brilliantly enjoyable book examines how everything from the cult of the romantic to technology and travel all fed the inexorable rise of music in the West, making it the most dominant and ubiquitous of the art forms. Encompassing balladeers, the great composers, jazz legends, and rock gods, this is an enthralling story of power, patronage, creativity, and genius.

Beethoven's Theatrical Quartets Nancy November, 2014-01-09 Beethoven's middle period quartets, Opp. 59, 74, and 95, are pieces that engage deeply with the aesthetic ideas of their time. In the first full contextual study of these works, Nancy November celebrates their uniqueness, exploring their reception history and early performance. In detailed analyses, she explores ways in which the quartets have both reflected and shaped the very idea of chamber music and offers a new historical understanding of the works' physical, visual, social, and ideological aspects. In the process, November provides a fresh critique of three key paradigms in current Beethoven studies: the focus on his late period, the emphasis on heroic style in discussions of the middle period, and the idea of string quartets as pure autonomous artworks cut off from social moorings. Importantly, this study shows that the quartets encompass a new lyric and theatrical impetus, which is an essential part of their unique explorative character.
