## **Headache Through The Ages:**

*Headache Through the Ages* Seymour Diamond, Mary A. Franklin, 2005 This book explores the path of headache through the centuries via world literature art history and anecdotal material noting the famous headache sufferers and how they depicted their pain

**Headache** Mervyn J. Eadie, 2012-05-22 Headache Through the Centuries illuminates the history of headaches with a particular interest in how the disorder has been understood and treated since the earliest recorded accounts dating from around 4000 BC Different types of headache were being recognized as early as the 2nd century AD Over the years though the classification of types of headache has changed so that headache patterns described in the past are often difficult to relate to present day types of headache Since that time a great deal of material on the topic has become available the full gamut of manifestations of the disorder has been described and considerable insight into its mechanisms has been obtained though no completely satisfactory explanation of the disorder has yet become available Providing an extensive history and the development of our understanding of headache over the course of six millennia Headache Through the Centuries is thought provoking and relevant reading for neurologists medical historians and anyone interested in headaches

Handbook of Headache Randolph W. Evans, Ninan T. Mathew, 2005 Thoroughly updated for its Second Edition this handbook is a practical easily accessible guide to the diagnosis and management of headache patients Geared to both primary care physicians and neurologists the book presents a systematic approach to diagnosis and offers expert recommendations for treating all types of headaches including migraine chronic daily headache tension and cluster headaches post traumatic headaches headache during pregnancy headache in children headaches with onset after age 50 and headaches caused by HEENT disorders This edition includes new drug treatments such as topiramate almotriptan frovatriptan eletriptan botulinum toxin and tizanidine Also included are 42 case studies patient education materials alternative treatments and a medicolegal section

headache disorders      **The Living Age** ,1861      **Hypnic Headache** R. Silva-Néto,Dagny Holle-Lee,2023-07-28 Hypnic headache is a rare primary headache that occurs only during sleep with a prevalence of 0.07% Diagnosis are challenging since patients do not show changes in neurological examinations or exams This book covers essential topics on clinical aspects of hypnic headache complemented by differential diagnosis pathophysiology and treatment It is based on all reports and case series on hypnic headache that have been described to date totaling 348 cases It also brings up to date information besides to the diagnostic criteria described in the International Classification of Headache Disorders ICHD 3 Written by authors with decades of experience it is divided into eleven chapters presenting the Historical aspects Headaches classification Epidemiology Clinical characteristics in adults and children Pathophysiology Differential diagnosis and Treatment Hypnic Headache Diagnosis and Treatment will be important not only for headache specialists neurologists but also for students and clinical physicians      **Pediatric Neurology** Kenneth F. Swaiman,Stephen Ashwal,Donna M. Ferriero,2006-01-01 This Gold Standard in clinical child neurology presents the entire specialty in the most comprehensive authoritative and clearly written fashion Its clinical focus along with relevant science throughout is directed at both the experienced clinician and the physician in training New editor Dr Ferriero brings expertise in neonatal neurology to the Fourth Edition New chapters Pathophysiology of Hypoxic Ischemic Encephalopathy Congenital Disorders of Glycosylation Pediatric Neurotransmitter Diseases Neurophysiology of Epilepsy Genetics of Epilepsy Pediatric Neurorehabilitation Medicine Neuropsychopharmacology Pain and Palliative Care Management Ethical Issues in Child Neurology      **Pediatric Neurology, Part II** Olivier Dulac,Maryse Lassonde,Harvey B. Sarnat,2013-04-23 The child is neither an adult miniature nor an immature human being at each age it expresses specific abilities that optimize adaptation to its environment and development of new acquisitions Diseases in children cover all specialties encountered in adulthood and neurology involves a particularly large area ranging from the brain to the striated muscle the generation and functioning of which require half the genes of the whole genome and a majority of mitochondrial ones Human being nervous system is sensitive to prenatal aggression is particularly immature at birth and development may be affected by a whole range of age dependent disorders distinct from those that occur in adults Even diseases more often encountered in adulthood than childhood may have specific expression in the developing nervous system The course of chronic neurological diseases beginning before adolescence remains distinct from that of adult pathology not only from the cognitive but also motor perspective right into adulthood and a whole area is developing for adult neurologists to care for these children with persisting neurological diseases when they become adults Just as pediatric neurology evolved as an identified specialty as the volume and complexity of data became too much for the general pediatrician or the adult neurologist to master the discipline has now continued to evolve into so many subspecialties such as epilepsy neuromuscular disease stroke malformations neonatal neurology metabolic diseases etc that the general pediatric neurologist no longer can reasonably possess in depth expertise in all areas particularly in dealing with

complex cases Subspecialty expertise thus is provided to some trainees through fellowship programmes following a general pediatric neurology residency and many of these fellowships include training in research Since the infectious context the genetic background and medical practice vary throughout the world this diversity needs to be represented in a pediatric neurology textbook Taken together and although brain malformations H Sarnat P Curatolo 2007 and oncology W Grisold R Soffietti are covered in detail in other volumes of the same series and therefore only briefly addressed here these considerations justify the number of volumes and the number of authors who contributed from all over the world Experts in the different subspecialties also contributed to design the general framework and contents of the book Special emphasis is given to the developmental aspect and normal development is reminded whenever needed brain muscle and the immune system The course of chronic diseases into adulthood and ethical issues specific to the developing nervous system are also addressed A volume in the Handbook of Clinical Neurology series which has an unparalleled reputation as the world's most comprehensive source of information in neurology International list of contributors including the leading workers in the field Describes the advances which have occurred in clinical neurology and the neurosciences their impact on the understanding of neurological disorders and on patient care **Wall & Melzack's Textbook of Pain E-Book** Stephen B.
