Blood Plagues and Endless Raids Anthony R. Palumbi, 2017-04-01 In 2005 the video game World of Warcraft struck the cultural landscape with tidal force One hundred million people have played WoW in the twelve years since But those people did more than play They worked they fought they triumphed they held entire game servers

hostage they even married each other in real life They developed new identities swapping their workaday selves for warriors mages assassins and healers They built communities and rose to lead them WoW was the world's first mass virtualization before Facebook or Twitter millions of people established online identities and had to reckon with the consequences in their real lives Blood Plagues and Endless Raids explores this wild incredibly complex culture partly through the author's engaging personal story from absolute neophyte to leader of North America's top Spanish speaking guild but also through the stories of other players and the game's developers It is the definitive account of one of the world's biggest pop culture phenomena World of Warcraft is more than ones and zeroes more than lines of code and so its history must be more than pushing buttons or slaying dragons It's the tale of a huge and passionate community of people the connections they made the experiences they shared and the love they held for one another

Healing the Mind through the Power of Story Lewis

Mehl-Madrona, 2010-06-18 Psychiatry that recognizes the essential role of community in creating a new story of mental health Provides a critique of conventional psychiatry and a look at what mental health care could be Includes stories used in the author's healing practice that draw from traditional cultures around the world Conventional psychiatry is not working The pharmaceutical industry promises it has cures for everything that ails us yet a recent study on antidepressants showed there is no difference of success in prescribed pharmaceuticals from placebos when all FDA reported trials are considered instead of just the trials published in journals Up to 80 percent of patients with bipolar depression remain symptomatic despite conventional treatment and 10 to 20 percent of these patients commit suicide In Healing the Mind through the Power of Story Dr Mehl Madrona shows what mental health care could be He explains that within a narrative psychiatry model of mental illness people are not defective requiring drugs to fix them What needs fixing is the ineffective stories they have internalized and succumbed to about how they should live in the world Drawing on traditional stories from cultures around the world Dr Mehl Madrona helps his patients re-story their lives He shows how this innovative approach is actually more compatible with what we are learning about the biology of the brain and genetics than the conventional model of psychiatry Drawing on wisdom both ancient and new he demonstrates the power and success of narrative psychiatry to bring forth change and lasting transformation

Minority Religions and Fraud Amanda van Eck Duymaer van Twist, 2016-04-22

Analysing both fraud and religion as social constructs with different functions and meanings attributed to them this book raises issues that are central to debates about the limits of religious toleration in diverse societies and the possible harm as well as benefits that religious organisations can visit upon society and individuals There has already been a lively debate concerning the structural context in which abuse especially sexual abuse can be perpetrated within religion Contributors to the volume proceed from the premise that similar arguments about ways in which structure and power may be conducive to abuse can be made about fraud and deception Both can contribute to abuse yet they are often less easily demonstrated and proven hence less easily prosecuted With a focus on minority religions the book offers a comparative overview of the concept

of religious fraud by bringing together analyses of different types of fraud or deception financial bio medical emotional breach of trust and consent Contributors examine whether fraud is necessarily intentional or whether that is in the eye of the beholder certain structures may be more conducive to fraud followers willingly participate in it The volume includes some chapters focused on non Western beliefs Juju Occult Economies Dharma Lineage which have travelled to the West and can be found in North American and European metropolitan areas
