Healing Powers And Modernity Traditional Medicine Shamanism And Science In Asian Societies:

Healing Powers and Modernity Linda H. Connor, Geoffrey Samuel, 2001-02-28 What is the current state of traditional healing practices in contemporary Asian societies How are their practitioners faring in the encounter with Western science and its biomedical approach How are traditional healing practices being transformed by the politics of health within the modern nation state and by the processes of commodification typical of modern economies How do patients in Asian societies see the various healing options now open to them The authors all of whom are anthropologists observe the clashes and complementarities between traditional therapies and biomedicine which in its many manifestations is the dominant form of medicine supported by national governments and is emblematic of the modernity to which they aspire Some of the medical traditions such as the sophisticated herbal humoral systems of Tibetan medicine and Indian Ayurveda are becoming well known in the West both through scholarly study and through their increasing popularity with Western patients interested in their healing potential This book adds a new dimension to their study being focused unlike most previous writing on practice rather than textual tradition

Biomedicine, Healing and Modernity in Rural Bangladesh Md. Faruk Shah, 2019-12-02 This book provides an ethnographic account of the ways in which biomedicine as a part of the modernization of healthcare has been localized and established as the culturally dominant medical system in rural Bangladesh Dr Faruk Shah offers an anthropological critique of biomedicine in rural Bangladesh that explains how the existing social inequalities and disparities in healthcare are intensified by the practices undertaken in biomedical health centres through the healthcare bureaucracy and local gendered politics This work of villagers healthcare practices leads to a fascinating analysis of the local healthcare bureaucracy corruption structural violence commodification of health pharmaceutical promotional strategies and gender discrimination in population control Shah argues that biomedicine has already achieved cultural authority and acceptability at almost all levels of the health sector in Bangladesh However in this system healthcare bureaucracy is shaped by social capital power relations and kin networks and corruption is a central element of daily care practices

Pierce Salguero, Kin Cheung, Susannah Deane, 2024-09-30 This rich collection focuses on the nexus between Buddhism and healing in the modern and contemporary world highlighting the many ways Buddhists have adapted in response to and in dialogue with modern science biomedicine and other facets of modernity from the nineteenth century to today Buddhist healing activities are much more diverse than the narrow range of mindfulness techniques that have dominated scholarly and popular focus From the community based healing practices of Asian American Buddhists and transnational Tantric sex therapy retreats to concerns about balancing being contemporary with being authentically Buddhist contributors explore how Buddhists have rethought the mind body relationship against the backdrop of the modernization and globalization of Buddhism They examine Buddhists navigating the differences and commonalities that exist in their practice and modern systems of mental and physical healthcare paying attention to how they have negotiated shifting

Engaging the Spirit World Kirsten W. Endres, Andrea Lauser, 2012-03-01 In many parts of the contemporary world spirit beliefs and practices have taken on a pivotal role in addressing the discontinuities and uncertainties of modern life The myriad ways in which devotees engage the spirit world show the tremendous creative potential of these practices and their innate adaptability to changing times and circumstances Through in depth anthropological case studies from Indonesia Malaysia Thailand Myanmar Laos and Vietnam the contributors to this book investigate the role and impact of different social political and economic dynamics in the reconfiguration of local spirit worlds in modern Southeast Asia Their findings contribute to the re enchantment debate by revealing that the spirited modernities that have emerged in the process not only

embody a distinct feature of the contemporary moment but also invite a critical rethinking of the concept of modernity itself

Healing at the Periphery Laurent Pordié, Stephan Kloos, 2021-10-18 India has long occupied an important place in Tibetan medicine s history and development However Indian Himalayan practitioners of Tibetan medicine or amchi have largely remained overlooked at the Tibetan medical periphery despite playing a central social and medical role in their communities Power and legitimacy religion and economic development biomedical encounters and Indian geopolitics all intersect in the work and identities of contemporary Himalayan amchi This volume examines the crucial moment of crisis and transformation that occurred in the early 2000s to offer insights into the beginnings of Tibetan medicine s professionalization industrialization and official recognition in India and elsewhere Based on fine grained ethnographic studies in Ladakh Zangskar Sikkim and the Darjeeling Hills *Healing at the Periphery* asks how the dynamics of capitalism social change and the encounter with biomedicine affect small communities on the fringes of modern India and conversely what local transformations of Tibetan medicine tell us about contemporary society and health care in the Himalayas and the Tibetan world Contributors Florian Besch Calum Blaikie Sienna R Craig Barbara Gerke Isabelle Gu rin Kim Gutschow Pascale Hancart Petitet Stephan Kloos Fernanda Pirie Laurent Pordi

Multiple Medical Realities Helle Johannessen, Imre Lazar, 2006 Nowadays a plethora of treatment technologies is available to the consumer each employing a variety of concepts of the body self sickness and healing This volume explores the options strategies and consequences that are both relevant and necessary for patients and practitioners who are manoeuvring this medical plurality Although wideranging in scope and covering areas as diverse as India Ecuador Ghana and Norway central to all contributions is the observation that technologies of healing are founded on socially learned and to some extent fluid experiences of body and self

Shamans, Nostalgias, and the IMF Laurel Kendall, 2009-09-01 Thirty years ago anthropologist Laurel Kendall did intensive fieldwork among South Korea s mostly female shamans and their clients as a reflection of village women s lives In the intervening decades South Korea experienced an unprecedented economic social political and material transformation and Korean villages all but disappeared And the shamans Kendall attests that they not only persist but are very much a part of South Korean modernity This enlightening and entertaining study of contemporary Korean shamanism makes the case for the dynamism of popular religious practice the creativity of those we call shamans and the necessity of writing about them in the present tense Shamans thrive in South Korea s high rise cities working with clients who are largely middle class and technologically sophisticated Emphasizing the shaman s work as open and mutable Kendall describes how gods and

ancestors articulate the changing concerns of clients and how the ritual fame of these transactions has itself been transformed by urban sprawl private cars and zealous Christian proselytizing For most of the last century Korean shamans were reviled as practitioners of antimodern superstition today they are nostalgically celebrated icons of a vanished rural world Such superstition and tradition occupy flip sides of modernity's coin the one by confuting the other by obscuring the beating heart of shamanic practice Kendall offers a lively account of shamans who once ministered to the domestic crises of farmers as they address the anxieties of entrepreneurs whose dreams of wealth are matched by their omnipresent fears of ruin Money and access to foreign goods provoke moral dilemmas about getting and spending shamanic rituals express these through the longings of the dead and the playful antics of greedy gods some of whom have acquired a taste for imported whiskey No other book length study captures the tension between contemporary South Korean life and the contemporary South Korean shamans work Kendall's familiarity with the country and long association with her subjects permit nuanced comparisons between a 1970s then and recent encounters some with the same shamans and clients as South Korea moved through the 1990s endured the Asian Financial Crisis and entered the new millennium She approaches her subject through multiple anthropological lenses such that readers interested in religion ritual performance healing gender landscape material culture modernity and consumption will find much of interest here

Within a mere decade hospital pharmacies throughout the Tibetan areas of the People's Republic of China have been converted into pharmaceutical companies. Confronted with the logic of capital and profit these companies now produce commodities for a nationwide market. While these developments are depicted as a big success in China they have also been met with harsh criticism in Tibet. At stake is a fundamental re-manufacturing of Tibetan medicine as a system of knowledge and practice. Being important both to the agenda of the Party State's policies on Tibet and to Tibetan self-understanding the Tibetan medicine industry has become an arena in which different visions of Tibet's future clash.

Shamans in Asia Clark Chilson, Peter Knecht, 2003-12-08 Shamans throughout much of Asia are regarded as having the power to control and coerce spirits. Many Asians today still turn to shamans to communicate with the world of the dead, heal the sick and explain enigmatic events. To understand Asian religions therefore a knowledge of shamanism is essential. *Shamans in Asia* provides an introduction to the study of shamans and six ethnographic studies each of which describes and analyses the lives and activities of shamans in five different regions: Siberia, China, Korea and the Ryukyu islands of southern Japan, Bangladesh and Pakistan. The essays show what type of people become shamans, what social roles they play and how shamans actively draw from the worldviews of the communities in which they operate. As the first book in English to provide in-depth accounts of shamans from different regions of Asia it allows students and scholars to view the diversity and similarities of shamans and their religions. Those interested in spiritual specialists, the anthropological study of religion and local religions in Asia will be intrigued if not entranced by *Shamans in Asia*.

An Introduction to Shamanism Thomas A. DuBois, 2009-05-14 This Introduction surveys the beliefs, rituals and techniques found in shamanic traditions around the world.
