was banished from normal daily fare because the best people did not eat it and for the majority of the common people out there it was monkey see monkey do But like I said after having lived in places where onions garlic and radishes were not eaten very often in the common diet that was because I was living in an area where people did not bother about not eating any foods which were grown underground including radishes and potatoes for who knows what ancient traditional conventional and possibly religious reasons I was too young to go into such justifications and explanations but that meant that anything which was dug up from underneath the ground was not eaten Half of the food items in the World have thus been made taboo or inaccessible to mankind under the label of forbidden with perhaps some justification or perhaps without any reason or rhyme And then I found myself in another part of the World where people used to just grab radishes out of the ground wash them thoroughly to get rid of all the dirt and then crunch them without even bothering to peel them They definitely did not care about flatulence and bad odor in the mouth or any other supposed side effect of eating radishes Their breakfasts were full of cooked radishes either as a vegetable or stuffed into bread pancakes with radishes onions and tomato salads to be served with every meal
