**Faster** James Gleick,1999 Synchronize your watches We have reached the epoch of the nanosecond This is the heyday of speed If one quality defines our modern technocratic age it is acceleration We are making haste Our computers our movies our sex lives our prayers they all run faster now than ever before And the more we fill our lives with time saving devices and time saving strategies the more rushed we feel In **Faster** James Gleick explores nothing less than the human condition at the turn of the millennium He shines a light of enterprising and analytical reporting as well as sly wit on the newest paradoxes of time His journey takes us through the bunkers and trenches of a war we barely knew we were fighting to the atomic clocks of the Directorate of Time to the waiting rooms that focus our impatience to the film production studios that test the high speed limits of our perception to the air traffic command centers that give time pressure new meaning We have become a quick reflexed multitasking channel flipping fast forwarding species We don't completely understand it and we're not altogether happy about it **Faster** is a mirror held up to our times and a mordant reminder of why some things take time **Faster**

Andersen,2023-06-05 My name is J E Andersen and it is not my name you should hang yourself in but my new 5 dimensional universal holographic quantum physics model This story starts up in 1976 when I had an incredible out of body experience opened my eyes to the paranormal side lying universe and began exploring this experience This led me to the right universal physics model the physics model that I describe in my books It was soon discovered that the 3 dimensional physics model would not be able to hold all the way In 1986 I started a brand new hologram model which later turned out to reveal just the right active universe which is 5 dimensional in the active universal engine room We can only see experience and detect the

actual substance coming out of the very innermost field of this field system the Higgs fields The Higgs fields are located inside the atoms but atoms can also be empty i.e. without the Higgs fields and then we are inside the famous stealth technology the invisibility technology Remember that it is atoms that are the building blocks of the universe It is precisely this stealth technology that comes out of this 5 dimensional very active holographic quantum physics which is the next big breakthrough in all types of research today The fact that the universe is no longer just physical leaves behind a universe that is totally 100% holographic and which is powered 100% by an active 5 dimensional quantum physics There are no physical particles in this universe only this holographic matter that can actually disappear and come back again and now we have revealed stealth technology Stealth technology is about the relationship between the atoms and the inner Higgs fields The atoms can actually operate completely empty and now this object can no longer be seen due to the lack of Higgs substance This is more than interesting this also very exciting and completely new to you because this is the truth about the creation of the universe expansion the unifying mass inside all gravitational fields which turn into pressure cookers and develop moons into planets planets into gas planets gas planets into stars and the stars burn up the physical liquid plasma transforming this plasma into the totally invisible starlight and thus becomes a black hole It is the gravitational fields that create shape and develop absolutely everything that is visible in this universe Read my books about technology and physics

**The Postnormal Times Reader** Ziauddin Sardar, 2019-01-01 IIIT Books In Brief Series is a valuable collection of the Institute's key publications written in condensed form to give readers a core understanding of the main contents of the original Postnormal times are best defined as an in between period where old orthodoxies are dying new ones have yet to be born and very few things seem to make sense or as Ezio Mauro puts it we are hanging between the no longer and the not yet and thus we are necessarily unstable nothing around us is fixed not even our direction of travel The postnormal times theory attempts to make sense of a rapidly changing world where uncertainty is the dominant theme and ignorance has become a valuable community The Postnormal Times Reader is a pioneering anthology of writings on the contradictory complex and chaotic nature of our era It covers the origins theory and methods of postnormal times and examines a host of issues ranging from climate change governance Middle East to religion and science from the perspective of postnormal times By mapping some of the key local and global issues of our transitional age the Reader suggests a way of navigating our turbulent futures

*Social Acceleration* Hartmut Rosa, 2013-06-11 Hartmut Rosa advances an account of the temporal structure of society from the perspective of critical theory He identifies three categories of change in the tempo of modern social life technological acceleration evident in transportation communication and production the acceleration of social change reflected in cultural knowledge social institutions and personal relationships and acceleration in the pace of life which happens despite the expectation that technological change should increase an individual's free time According to Rosa both the structural and cultural aspects of our institutions and practices are marked by the shrinking of the present a decreasing

time period during which expectations based on past experience reliably match the future When this phenomenon combines with technological acceleration and the increasing pace of life time seems to flow ever faster making our relationships to each other and the world fluid and problematic It is as if we are standing on slipping slopes a steep social terrain that is itself in motion and in turn demands faster lives and technology As Rosa deftly shows this self reinforcing feedback loop fundamentally determines the character of modern life     Collected Works of Bernard Lonergan Bernard J.
