Glaser,2022-12-13 Experts all agree that human beings can mitigate climate change by changing how we use energy for heat light movement and production Stewards of heritage sites and collections can engage the public at the grassroots level to raise awareness about the cultural and socioeconomic reasons for past choices that have contributed to climate change This book will help cultural institutions identify ways to interpret new stories through historic places and resources especially if staff have made the commitment to go green Without place based context discussions about energy focus primarily on the science and not the human experience By reminding us of our past practices and values regarding energy production and use historic places can inspire different ways of thinking about transitioning to different energy sources and question the doctrine that high energy use is necessary for progress Public interpretation can expose the vast energy infrastructure and the impact of energy extraction production and use on place Historic sites offer place based contexts for visitors to interact with and think critically about the processes and the impact of energy development in for example a maritime village This book synthesizes science with the humanities outside of popular media and other politicized spaces to identify different kinds of energy resources in many historic collections or sites It supplements current calls for economic and policy changes because as stewards of historic places we need to do what we can in this all hands on deck moment to prepare for shared stewardship of our future **American Military Shoulder Arms, Volume III** George D. Moller,2011-11-15 This third volume in Moller s authoritative reference work describes muzzleloading percussion shoulder arms procured by the U S government for issue to federal and state armed forces in the period that includes the Civil War These twenty five years were an exciting time in the history of shoulder arms During the 1840s only a handful of American manufacturers were capable of producing significant quantities of arms having fully interchangeable components By the early 1850s at least one firm was producing rifles with close enough tolerances to be considered fully interchangeable And thanks to the invention of the expanding bullet rifled arms could be used by an army s entire infantry For the first time line infantry were equipped with arms capable of rapid reloading and of

consistently hitting a man sized target at distances as great as three hundred yards Like the first two volumes of American Military Shoulder Arms this exhaustive reference work will be a must for serious arms collectors dealers and museum specialists **Eli Whitney and the Birth of American Technology** Constance McLaughlin Green,1956 A series of specific challenges led Eli Whitney to exercise his ingenuity in technology and made him an engineer His cotton gin revolutionized Southern agriculture And the problems of manufacturing large quantities of guns drove him to develop principles important in his own time and even more important later The application of those principles would one day give American industry the structure within which it more than fulfilled the ambitions of the Revolutionary generation This is the absorbing story Constance Green has told through a skillful mingling of personal narrative and technological analysis Editor s preface
