Edited by J.P. Bruce ,1900** **Farmers of Forty Centuries - Permanent Farming In China, Korea, and Japan** F. H. King, 2015-01-15 We in North America are wont to think that we may instruct all the world in agriculture because our agricultural wealth is great and our exports to

less favored peoples have been heavy but this wealth is great because our soil is fertile and new and in large acreage for every person We have really only begun to farm well The first condition of farming is to maintain fertility This condition the oriental peoples have met and they have solved it in their way We may never adopt particular methods but we can profit vastly by their experience With the increase of personal wants in recent time the newer countries may never reach such density of population as have Japan and China but we must nevertheless learn the first lesson in the conservation of natural resources which are the resources of the land From the Forward Get Your Copy Today **Farmers of Forty Centuries** F. **Farmers of Forty Centuries Or, Permanent Agriculture in China, Korea and Japan - F. H. King** F. H.

King,2009-11-27 A passage from the book We have not yet gathered up the experience of mankind in the tilling of the earth yet the tilling of the earth is the bottom condition of civilization If we are to assemble all the forces and agencies that make for the final conquest of the planet we must assuredly know how it is that all the peoples in all the places have met the problem of producing their sustenance out of the soil We have had few great agricultural travelers and few books that describe the real and significant rural conditions Of natural history travel we have had very much and of accounts of sights and events perhaps we have had too many There are to be sure famous books of study and travel in rural regions and some of them as Arthur Young s Travels in France have touched social and political history but for the most part authorship of agricultural travel is yet undeveloped The spirit of scientific inquiry must now be taken into this field and all earth conquest must be compared and the results be given to the people that work This was the point of view in which I read Professor King s manuscript It is the writing of a well trained observer who went forth not to find diversion or to depict scenery and common wonders but to study the actual conditions of life of agricultural peoples
