The Lord's Prayer: Take a Closer Look Jim Webb, 2014-05 The Lord s Prayer has been called a model prayer by many good theologians But it is also true that it is among the least scrutinized of all teachings in the Bible and therefore one of the least studied and understood We need to remind ourselves that when Jesus gave this teaching to us it was for the express purpose of

establishing a good communication with God out in the joys and scuffles of daily life This book is offered to take the reader back to that purpose We need to put ourselves back in the shoes of those who heard this teaching on prayer for the first time When we do we find our identity our destiny and our purpose for living at the very foundation of what Jesus told us here along with the corollaries too We discover that this and this alone is the foundational teaching on communicating with God in the New Testament and when all else is stripped away it is the one understanding we cannot do without it becomes our anchor point It not only focuses our understanding on the truth behind all things it exposes a great deal of falsehood as a consequence How could it not When the road we walk is rock solid at its base the quicksand is easy to spot and avoid This book takes each element of this prayer and discusses it in depth and each element reveals more than what first meets the eye Of course this prayer teaching by Jesus of Nazareth is of necessity coupled with a great deal of related New Testament teaching throughout the book

The Quirks & Quarks Guide to Space Jim LeBans, 2008-11-19 For everyone who's curious about what's new under and over and around the stars Douglas Adams famously pronounced in *The Hitchhiker's Guide to the Galaxy* that the answer to life the universe and everything was 42 Quirks Quarks whose approach to science owes almost as much to Adams as it does to Newton or Einstein or Hawking have flipped that notion through a gap in the space time continuum or something like that and come up with answers to the 42 essential questions about space Much about the universe is very hard for most of us to grasp and if anyone can explain these mind bending aspects of the heavens above it's the Quirks Quarks producers who have been bringing Canadians understandable science with trademark humour for more than thirty years In their Guide to Space they answer such pressing questions as Where does space begin Why is most of the universe missing Is there intelligent life in the universe And the real puzzler What came before the Big Bang They also answer questions we wish we'd thought to ask such as Can you surf a gravity wave and Why is the universe's temperature on my TV There are answers as well to far more practical questions like What happens when you fall into a black hole and How will the universe end The answers which have been vetted by a team of astronomers are witty authoritative in depth accurate up to date astronomically and of course quirky

The Nature of Things, a Didascalical Poem, Translated [into English Verse] from the Latin of T. Lucretius Carus ... Accompanied with Commentaries ... and the Life of Epicurus ... By

T. Busby. L.P. Titus Lucretius Carus,1813 **The God Who Makes Things Happen** Samuel A Elder,2007-02 Written in a popular style by a longtime college physics professor and Bible teacher this book is designed to strengthen the faith of those who believe in an inerrant Bible against false teaching by secular educators Casting a physicist s light on the old earth young earth controversy a new paradigm is presented The author invokes Einstein s theory to show that the six 24 hour days model of creationists and the physicist s 13 7 billion year model are not logically inconsistent That s because the God Who inspired Genesis One exists in three Persons each capable of distinct spacetime reference frames allowing creation to be observed multi perspectivevely Furthermore citing Heisenberg s uncertainty principle the basis of quantum mechanics he points out that this allows God to control the universe moment by moment since it is clearly taught in Scripture that God alone is sovereign over chance The Law of Entropy sometimes called time s arrow shows that the history of salvation was intended to take place only once Jesus Christ is the anchor of time The unifying theme of the Old and New Testaments is the story of redemption from the penalty of original sin as God in His sovereignty calls members of His invisible church out from the world
