

Express Ways

Torjus Alten

Express Ways:

Project Development Methodologies for Reconstruction of Urban Freeways and Expressways James B. Saag, 1999 This synthesis presents a review of the current practices associated with the techniques and policies employed by state and local transportation agencies to address the many project development issues required for the reconstruction of existing urban and suburban freeways and expressways This topic is of special interest because there is a need to reconstruct many highway facilities that have been in existence for over 40 years The need arises both from the deterioration of the infrastructure and from changes in capacity requirements This synthesis will be of interest to state and local highway design engineers traffic engineers finance and contracting specialists and contracting personnel in these agencies It will also be of interest to consultants who are engaged in freeway expressway reconstruction projects While many of the project development methodologies in practice for reconstruction of urban and suburban freeways and expressways are similar to those used for new construction there are unique differences that apply primarily to the reconstruction of major urban highway facilities This report of the Transportation Research Board highlights the similarities and differences in the planning and management of projects as well as in contracting and financing innovations Methods for effectively managing traffic during the reconstruction process are important to the process as are traffic control procedures in the work zone Public participation and public information dissemination related to traffic changes are vitally important to the effective completion of a reconstruction project Other aspects such as the design process including the use of 3 D and 4 D visualization pavement renewal procedures environmental impact mitigation and enhancement activities that are considered in the process are also addressed

EXPRESSWAYS IN 500 DAYS Dr. B S Singla, People asked the Author who was working as Chief General Manager Expressway in NHAI How did you complete this expressway in 500 days He started replying the usual it is a result of good team work quick decisions and payments weekly site visits etc Honestly speaking he could not give the correct answer Perhaps there is no short correct answer But soon he realized with the idea of writing this book

Road Safety in China Guangnan Zhang, Qiaoting Zhong, 2021-04-12 This book presents comprehensive research and analyses on road traffic safety in China discussing individual vehicle road and environmental factors to improve road safety in the country It also sheds light on the development of similar adjusted measures to reduce traffic violations and or accident fatalities and injuries and to promote road safety in other countries and regions As such it is a valuable resource for anyone wanting to understand the characteristics and patterns of road traffic safety the risk factors affecting traffic violations and traffic injuries as well as road safety policies and practices in China

Dream City Conrad Kickert, 2019-06-11 Tracing two centuries of rise fall and rebirth in the heart of downtown Detroit Downtown Detroit is in the midst of an astonishing rebirth Its sidewalks have become a dreamland for an aspiring creative class filled with shoppers office workers and restaurant goers Cranes dot the skyline replacing the wrecking balls seen there only a few years ago But venture a few blocks in any direction and this liveliness gives way to urban blight a nightmare cityscape of crumbling concrete barbed wire and debris In Dream City urban designer Conrad Kickert examines the paradoxes of Detroit s landscape of extremes arguing that the current reinvention of downtown is the expression of two centuries of Detroiters conflicting hopes and dreams Kickert demonstrates the materialization of these dreams with a series of detailed original morphological maps that trace downtown s rise fall and rebirth Kickert writes that downtown Detroit has always been different from other neighborhoods it grew faster than other parts of the city and it declined differently forced to reinvent itself again and again Downtown has been in constant battle with its own offspring the automobile and the suburbs the automobile enabled and modernized itself though parking attrition and land consolidation Dream City is populated by a varied cast of downtown power players from a 1920s parking lot baron to the pizza tycoon family and mortgage billionaire who control downtown s fate today Even the most renowned planners and designers have consistently yielded to those with power land and finances to shape downtown Kickert thus finds rhyme and rhythm in downtown s contemporary cacophony Kickert argues that Detroit s case is extreme but not unique many other American cities have seen a similar decline and many others may see a similar revitalization
