Extinct Languages:

Encyclopedia of the World's Endangered Languages Christopher Moseley, 2008-03-10 The concern for the fast disappearing language stocks of the world has arisen particularly in the past decade as a result of the impact of globalization This book appears as an answer to a felt need to catalogue and describe those languages making up the vast majority of the world's six thousand or more distinct tongues which are in danger of disappearing within the next few decades Endangerment is a complex issue and the reasons why so many of the world's smaller less empowered languages are not being passed on to future generations today are discussed in the book's introduction The introduction is followed by regional sections each authored by a notable specialist combining to provide a comprehensive listing of every language which by the criteria of endangerment set out in the introduction is likely to disappear within the next few decades These languages make up ninety per cent of the world's remaining language stocks Each regional section comprises an introduction that deals with problems of language preservation peculiar to the area surveys of known extinct languages and problems of classification The introduction is followed by a list of all known languages within the region endangered or not arranged by genetic affiliation with endangered and extinct languages marked This listing is followed by entries in alphabetical order covering each language listed as endangered Useful maps are provided to pinpoint the more complex clusters of smaller languages in every region of the world The Encyclopedia therefore provides in a single resource expert analysis of the current language policy situation in every multilingual country and on every continent detailed descriptions of little known languages from all over the world and clear alphabetical entries region by region of all the world's languages currently thought to be in danger of extinction The Encyclopedia of the World's Endangered Languages will be a necessary addition to all academic linguistics collections and will be a useful resource for a range of readers with an interest in development studies cultural heritage and international affairs

Extinct Languages Johannes Friedrich, 2021-10-26 A noted linguist examines extinct languages from Egyptian hieroglyphs to the mysteries of as yet undeciphered writings in this scholarly work While certain ancient languages were passed down continuously through the ages many others were ignored for centuries When scholars began to decipher these extinct languages in the early nineteenth century they uncovered previously inaccessible riches of knowledge and history Yet much work remains to be done on undeciphered scripts that continue to tantalize and perplex us today In *Extinct Languages* linguist Johannes Friedrich guides readers through the fascinating world of recovered systems of writing including Egyptian and Hittite hieroglyphs Babylonian cuneiform and others He also explains the methodology and principles behind the deciphering process that will one day crack ancient mysteries such as the Indus Valley script

[When Languages Die](#) K David Harrison, 2008-07-21 It is commonly agreed by linguists and

anthropologists that the majority of languages spoken now around the globe will likely disappear within our lifetime The phenomenon known as language death has started to accelerate as the world has grown smaller This extinction of languages and the knowledge therein has no parallel in human history K David Harrison s book is the first to focus on the essential question what is lost when a language dies What forms of knowledge are embedded in a language s structure and vocabulary And how harmful is it to humanity that such knowledge is lost forever Harrison spans the globe from Siberia to North America to the Himalayas and elsewhere to look at the human knowledge that is slowly being lost as the languages that express it fade from sight He uses fascinating anecdotes and portraits of some of these languages last remaining speakers in order to demonstrate that this knowledge about ourselves and the world is inherently precious and once gone will be lost forever This knowledge is not only our cultural heritage oral histories poetry stories etc but very useful knowledge about plants animals the seasons and other aspects of the natural world not to mention our understanding of the capacities of the human mind Harrison s book is a testament not only to the pressing issue of language death but to the remarkable span of human knowledge and ingenuity It will fascinate linguists anthropologists and general readers
