Rhine, William McDougall, 2013-10 This is a new release of the original 1934 edition      **Extra Sensory Perception** Joseph Banks Rhine, J B Rhine Ph D, 2008-07-09 This is the ground breaking scientific work by Dr J B Rhine Ph D from Duke University Dr Rhine s experiments involving telepathy clairvoyance and precognition used specially designed cards called Zener cards Using exact calculations it is possible to determine how improbable it would be to guess an excess number of cards correctly Within 10 years 33 experiments had been performed involving almost one million trials with protocols which rigorously excluded possible sensory clues Twenty seven of the 33 studies produced statistically significant results an exceptional record Furthermore positive results were not restricted to Rhine s lab In the years following Rhine s first publication 33 independent replication experiments were conducted at different laboratories Twenty of these were statistically significant      Extra Sensual Perception Richard DeA'Morelli, 1974      **Sensual Meditation** , 1987      *Catalog of Copyright Entries. Third Series* Library of Congress. Copyright Office, 1976      *Models and Experiences of Extra Sensory Perception* Vitaly Bolnokin, Van Lu Nguyen, 2016-01-07 The book is devoted to the phenomenon of extrasensory perception Given current scientific interpretations and criticisms of the phenomenon Great place is of historical and current practical experience in this field The book carries the surveillance methodological and contains both an introduction to the issue and new including unique materials      **The Embodiment of Senses** Babu Thaliath, 2025-10-08 Kant famously claimed that all our representations must be of a spatial as well as temporal kind However this spatiality and temporality is nothing accessible to experience itself but precedes it logically as it s a priori condition Babu Thaliath s remarkable book stands in a Post Kantian if not altogether Neo Kantian tradition inasmuch as it attempts to bring back this a priori into experience itself In doing so he materializes and empiricizes the apriori As The Embodiment of Senses demonstrates the scaffolding undergirding our corporeal orientation in the world is not merely a logical necessity perception itself offers the cues about how it is organized Emmanuel Alloa Chair of Aesthetics and Philosophy of Art at the University of Fribourg This book is an important addition to the growing literature on new approaches to the senses It combines a deep understanding of a historical philosophical tradition with contemporary scientific approaches to perception particularly vision By critically analysing the problem of spatialisation of the senses and the aporias of vision in Western modernist philosophy Thaliath successfully develops a valuable argument for the embodiment of the senses Sundar Sarukkai Formerly Professor of Philosophy National Institute of Advanced Studies Bangalore This book provides a comprehensive understanding of the prevailing problems in the study of the spatiotemporal extension of sensory perceptions especially vision The actual extension of the senses remains an unresolved problem in the history of modern philosophy and science after Descartes subsumed the senses under the non extended soul the res cogitans and Kant subsequently conceived of space and time as purely a priori forms of sensibility The book re examines the

prevailing problems of sensibility especially of the sense of sight within a historiographical and scientific philosophical framework It is a valuable resource for graduate students and postdoctoral researchers working in the fields of philosophy perception theory psychology and cognitive science in both basic and advanced research The book is an English translation of the author's work originally published in German by Verlag Karl Alber in 2017 under the title *Die Verknüpfung der Sinnlichkeit*
