A Coast to Explore Miles O. Hayes, Jacqueline Michel, 2010-12-01 From wave cut rock cliffs and sea caves to gravel beaches and coastal dunes California's coastline has enthralled visitors from around the world A Coast to Explore describes the origins of these coastal features and unravels the wonderful mystery of how the birth of the San Andreas Fault system created what we see today Miles O Hayes and Jacqueline Michel have been mapping the coast of California since the 1980s as part of a larger initiative to protect coastlines around the world from hazardous oil spills A Coast to Explore is the culmination of their work Through a delightful narrative

it details the geological evolution of central California's coast from Bodega Bay to Point Conception including the effects of erosion during El Niño, the impacts of tsunamis and the formation of spectacular raised marine terraces. Key ecological resources are described for each of the major subdivisions of the coast. Through richly illustrated diagrams, full color photographs and satellite images, *A Coast to Explore* takes readers on a fascinating journey of discovery so they can better understand why the Central California coast is so remarkable.

Oil and Wilderness in Alaska George J. Busenberg, 2013-08-16

Colliding environmental and development interests have shaped national policy reforms supporting both oil development and environmental protection in Alaska. *Oil and Wilderness in Alaska* examines three significant national policy reform efforts that came out of these conflicts: the development of the Trans-Alaska pipeline, the establishment of a vast system of protected natural areas through the Alaska National Interest Lands Conservation Act, and the reform of the environmental management of the marine oil trade in Alaska to reduce the risk of oil pollution after the Exxon Valdez disaster. Illuminating the delicate balance and give and take between environmental and commercial interests as well as larger issues shaping policy reforms, Busenberg applies a theoretical framework to examine the processes and consequences of these reforms at the state, national, and international levels. The author examines the enduring institutional legacies and policy consequences of each reform period, their consequences for environmental protection, and the national and international repercussions of reform efforts. The author concludes by describing the continuing policy conflicts concerning oil development and nature conservation in Alaska left unresolved by these reforms. Rich case descriptions illustrate the author's points and make this book an essential resource for professors and students interested in policies concerning Alaska, the Arctic, oil development, nature conservation, marine oil spills, the policy process, and policy theory.
