## **Fables Of Responsibility:**

**Fables of Responsibility** Thomas Keenan, 1997 This book offers an analysis of the ways a linked set of ethico political concepts responsibility rights freedom equality and justice might be re thought not simply jettisoned or reactively defended in view of the linguistic deconstruction of their underlying principle the individual human subject In a series of readings of contemporary thinkers notably Foucault and Derrida and their philosophical antecedents Marx Nietzsche Sade the author argues that an encounter with the difficulties of reading literary language precisely what resists the immediate comprehension or mastery of a subject enables in turn a new thought of rights and responsibility What literature teaches us about politics is that the absence of foundations whether in the world or in the subject far from being its downfall is its very condition of possibility because a foundation or a final resolution is lacking we have politics and ethics and their predicaments Like the reading of a text which is never quite done any responsibility worthy of the name cannot rest in the good conscience of its certain accomplishment likewise the assertion of rights can never be circumscribed or guaranteed hence the ongoing necessity of the ethical and the political The book is driven by a sense that literary and theoretical questions and the ideas or concepts they appeal to or provoke play a critical role in the way we think about and experience politics but that literary critics and theorists do far too little to understand those links or make them matter outside a very restricted sphere The author seeks to harness this specialized discourse in order to consider what ethical and political thinking might learn from literature and its theorists

**If Classrooms Matter** Jeffrey Di Leo, Walter Jacobs, 2013-01-11 Where does learning take place In this collection of passionately argued essays leading educators and theorists explore the where of pedagogy how pedagogical processes are influenced by local conditions Understanding this dynamic just may be the single most important ingredient to successful teaching Classrooms Matter presents some of the best known voices in critical pedagogy Michael Apple Henry Giroux Stanley Aronowitz Carol Becker Peter McLaren alongside essays by such well known scholars as Mark Poster Sharon O Dair David Trend Jacqueline Bobo and others These thinkers explore the sensitive balance between technology physical space economic developments political events and the goals of teaching a balance we must constantly renegotiate if classrooms are to matter at all

**Unruly Examples** Alexander Gelley, 1995 These 2 essays demonstrate that beyond example s rich genealogy in the rhetorical tradition it involves issues that are central to current theories of meaning and ethics in literature and philosophy

**Immediations** Pooja Rangan, 2017-05-18 Endangered life is often used to justify humanitarian media intervention but what if suffering humanity is both the fuel and outcome of such media representations Pooja Rangan argues that this vicious circle is the result of immediation a prevailing documentary ethos that seeks to render human suffering urgent and immediate at all costs Rangan interrogates this ethos in films seeking to give a voice to the voiceless an established method of validating the humanity of marginalized subjects including children refugees autistics and animals She focuses on multiple examples of documentary subjects being invited to demonstrate their

humanity photography workshops for the children of sex workers in Calcutta live eyewitness reporting by Hurricane Katrina survivors attempts to facilitate speech in nonverbal autistics and painting lessons for elephants These subjects are obliged to represent themselves using immediations tropes that reinforce their status as the other and reproduce definitions of the human that exclude non normative modes of thinking being and doing To counter these effects Rangan calls for an approach to media that aims not to humanize but to realize the full radical potential of giving the camera to the other

*Subjects of Responsibility* Andrew Parker, Austin Sarat, Martha Merrill Umphrey, 2011 How and why has the concept of responsibility come to pervade the fabric of American public and private life How are ideas of responsibility instantiated in and constituted by the workings of social and political institutions What place do liberal discourses of responsibility based on the individual have in today's biopolitical world where responsibility is so often a matter of risk assessment founded in statistical probabilities Bringing together the work of scholars in anthropology law literary studies philosophy and political theory the essays in this volume show how state and private bureaucracies play crucial roles in fashioning forms of responsibility which they then enjoin on populations How do government and market constitute subjects of responsibility in a culture so enamored of individuality In what ways can those entities centrally in modern culture those engaged in insuring individuals against loss or harm themselves be held responsible and by whom What kinds of subjectivities are created in this process Can such subjects be said to be truly responsible and in what sense

**On Paradox** Elizabeth S. Anker, 2022-10-28 In *On Paradox* literary and legal scholar Elizabeth S Anker contends that faith in the logic of paradox has been the cornerstone of left intellectualism since the second half of the twentieth century She attributes the ubiquity of paradox in the humanities to its appeal as an incisive tool for exposing and dismantling hierarchies Tracing the ascent of paradox in theories of modernity in rights discourse in the history of literary criticism and the linguistic turn and in the transformation of the liberal arts in higher education Anker suggests that paradox not only generates the very exclusions it critiques but also creates a disempowering haze of indecision She shows that reasoning through paradox has become deeply problematic it engrains a startling homogeneity of thought while undercutting the commitment to social justice that remains a guiding imperative of theory Rather than calling for a wholesale abandonment of such reasoning Anker argues for an expanded diversified theory toolkit that can help theorists escape the seductions and traps of paradox

**Unquiet Tropes** Elda E Tsou, 2015-03-27 Until quite recently Asian American literary criticism had little to do with form Instead the tendency was to bind the literary tradition to identity formation For Elda Tsou however the distinctions of ethnic writing extend beyond such facile referential practices to incorporate form and aesthetics In *Unquiet Tropes* Tsou reconceptualizes the literature as a set of highly particular classical rhetorical tropes including

antanaclasis rhetorical question apophasis catachresis and allegory Looking at five canonical works Aiiieeeee No No Boy China Men Blues Hanging and Native Speaker Tsou shows how these texts use figurative means to confront the problem of race She also explores how traces of Asian American history live on through these figures Each case study in *Unquiet Tropes* considers a different scenario defiance coercion necessity error and deceit to show how literary representation from the 1950s through 1997 has responded to a specific political condition

**Cloud Ethics** Louise Amoore, 2020-05-01 In *Cloud Ethics* Louise Amoore examines how machine learning algorithms are transforming the ethics and politics of contemporary society Conceptualizing algorithms as ethicopolitical entities that are entangled with the data attributes of people Amoore outlines how algorithms give incomplete accounts of themselves learn through relationships with human practices and exist in the world in ways that exceed their source code In these ways algorithms and their relations to people cannot be understood by simply examining their code nor can ethics be encoded into algorithms Instead Amoore locates the ethical responsibility of algorithms in the conditions of partiality and opacity that haunt both human and algorithmic decisions To this end she proposes what she calls cloud ethics an approach to holding algorithms accountable by engaging with the social and technical conditions under which they emerge and operate

**Responsibility, Complexity, and Abortion** Karen L. F. Houle,2013-12-24 Responsibility Complexity and Abortion Toward a New Image of Ethical Thought draws from feminist theory post structuralist theory and complexity theory to develop a new set of ethical concepts for broaching the thinking challenges that attend the experience of unwanted pregnancy Author Karen Houle does not only argue for these concepts she enacts a method for working with them a method that brackets the tendency to take positions and to think that position taking is what ethical analysis involves This book thus

provides concrete evidence of a theoretically grounded compassionate way that people in all walks of life academic or otherwise could come to a better understanding of and more complex relationship to difficult ethical issues On the one hand this is a meta ethical book about how people can conceive and communicate moral ideas in ways that are more constructive than position taking on the other hand it is also a book about abortion It testifies from a first person female perspective about the life long complexity that attends fertility sexuality and reproduction But it does not do so in order to ratify abortion as a woman s issue or a private matter or as feminist work Rather its aim is to excavate the ethical richness of the situation of unwanted pregnancy showing that it connects to everyone affects everyone and thus gives everyone something unique and new to think
