Sustainable Brownfield Regeneration Tim Dixon,Mike Raco,Philip Catney,David N. Lerner,2008-04-15 Sustainable Brownfield Regeneration presents a comprehensive account of UK policies processes and practices in brownfield regeneration and takes an integrated and theoretically grounded approach to highlight best practice Brownfield regeneration has become a major policy driver in developed countries It is estimated that there are 64 000 hectares of brownfield land in England much of which presents severe environmental challenges and lies alongside some of the most deprived communities in the country Bringing such land back into active use has taken on a new urgency among policymakers developers and other stakeholders in the development process Frequently however policy thinking and practice has been underpinned by silo mentalities in which integrated and multidisciplinary approaches to problem solving have been limited The book has two principal aims The first is to examine the ways in which science and social science research disciplines can be brought together to help solve important brownfield regeneration issues with a focus on the UK The second is to assess the efficiency and effectiveness of different types of regeneration policy and practice and to show

how liveable spaces can be produced from problem places The Thames Gateway in the south of England and Greater Manchester in the North of England are shown as examples of how brownfield regeneration projects are developing in an era where sustainability is high on the policy agenda From the Foreword by Paul Syms National Brownfield Advisor English Partnerships Ensuring the effective and efficient reuse of brownfield land is an essential part of the British Government's land use policies in support of sustainable communities This book recognises that reusing brownfield land is not just about overcoming technical issues to remove contamination or other physical problems with the ground It highlights the importance of engaging with the many different stakeholders whose opinions and concerns need to be taken into account if sustainable outcomes are to be achieved The authors also recognise that brownfield land reuse is not just about building new homes or places of employment the creation of new green spaces can be just as important **exlibris** Giovanni Corbellini, 2022-05-18 Architects write a lot especially now when conceptual aspects have become central in the advanced reflections and narrative forms increasingly intersect the quest of design practices for an ultimate legitimisation In the growing mass of the publishing offer these keywords try to highlight recurrent issues tracking synthetic paths of orientation between different critical positions with particular attention to what happens in the neighbouring fields of the arts and sciences Brownfields Redevelopment and the Quest for Sustainability Christopher de Sousa, 2008-03-03 Examines the role that brownfields redevelopment is playing and can play in our quest for sustainability focusing on efforts in the US and Canada This book looks at how brownfields are used as spaces for developing an array of residential recreational and employment oriented projects that have breathed new life into the urban environment **The Green Belt, Housing Crises and Planning Systems** Charles Edward Goode, 2025-03-31 This book evaluates the effectiveness of the Green Belt planning policy in England It is one of the most well known strategies internationally with similar growth restraint policies having been adopted in a diverse range of cities around the world such as Portland Medellin and Bangkok Despite this it is often argued that Green Belts contribute to wider inequitable outcomes in society Focusing on the Green Belt in England the book critically analyses the extent to which these policies and planning systems contribute to housing crises and examines how far they need to be reformed With the central role of community engagement in many of the debates about housing crises the book investigates the characteristics of popular and campaigner opposition to housebuilding alongside investigating the power relations and politics of planning systems This timely research taps into important current policy debates in the UK surrounding urban nature green infrastructure and building on the grey belt The book is therefore of relevance and benefit to policymakers and politicians to academics and students internationally from a range of fields interested in housing community engagement green infrastructure strategic planning power and politics and conservation **Urban Design Update**, 2000 **The Routledge Companion to Ecological Design Thinking** Mitra Kanaani, 2022-08-31 This companion investigates the ways in which designers architects and planners address ecology through the built environment by

integrating ecological ideas and ecological thinking into discussions of urbanism society culture and design Exploring the innovation of materials habitats landscapes and infrastructures it furthers novel ecotopian ideas and ways of living including human made settings on water in outer space and in extreme environments and climatic conditions Chapters of this extensive collection on ecotopian design are grouped under five different ecological perspectives design manifestos and ecological theories anthropocentric transformative design concepts design connectivity climatic design and social design Contributors provide plausible sustainable design ideas that promote resiliency health and well being for all living things while taking our changing lifestyles into consideration This volume encourages creative thinking in the face of ongoing environmental damage with a view to making design decisions in the interest of the planet and its inhabitants With contributions from over 79 expert practitioners educators scientists researchers and theoreticians as well as planners architects and engineers from the U S Canada Europe and Asia this book engages theory history technology engineering and science as well as the human aspects of ecotopian design thinking and its implications for the outlook of the planet *Green Business* Nevin Cohen,2011-06-28 Annotation Presenting 150 signed entries this book provides an overview of key principles approaches strategies and tools businesses have used to reduce environmental impacts and contribute to sustainability *Brownfields Revitalization and Environmental Restoration Act of 2001* United States. Green Gentrification and Environmental Injustice Heather E. Campbell,Adam Eckerd,Yushim Kim,2024-09-13 This book argues that given the complex nature of the urban environment we cannot find one optimal solution to reducing environmental injustice in part because there is no singular cause Environmental injustice emerges in particular settings because of the combined and interdependent effects of a variety of different policy and community characteristics The authors argue that addressing these interlinked problems requires an understanding of the clusters of community and contextual factors that combine in a variety of ways to both create problems and imply policy approaches to managing them They argue for the use of complexity informed methods to assist in making public policy choices such as Qualitative Comparative Analysis QCA and Agent based Modeling ABM to enable us to better identify plausible solutions for specific contexts This volume offers a new perspective for strategically managing urban policy that considers the risk of gentrification and gentrification related displacement with the ultimate goal of improving social justice Environmental injustice pollution remediation gentrification and displacement are interlinked problems all of which impinge on social justice in US cities However public policy research and often practice as well has tended to separately consider urban policy issues such as environmental injustice brownfields and other pollution remediation how to redevelop neighborhoods and how to contend with gentrification and displacement In this book the authors take a new perspective to such intertwined urban policy issues using complexity thinking and more importantly complex adaptive systems approaches in order to develop context sensitive policy approaches to managing these ongoing problems Pastoral Cosmopolitanism in Edith Wharton's Fiction Margarida

Cadima,2023-07-11 American novelist Edith Wharton 1862 1937 is best known today for her tales of the city and the experiences of patrician New Yorkers in the Gilded Age This book pushes against the grain of critical orthodoxy by prioritizing other species of spaces in Wharton s work For example how do Wharton s narratives represent the organic profusion of external nature Does the current scholarly fascination with the environmental humanities reveal previously unexamined or overlooked facets of Wharton s craft I propose that what is most striking about her narrative practice is how she utilizes adapts and translates pastoral tropes conventions and concerns to twentieth century American actualities It is no accident that Wharton portrays characters returning to or exploring various natural localities such as private gardens public parks chic mountain resorts monumental ruins or country estate follies Such encounters and adventures prompt us to imagine new relationships with various geographies and the lifeforms that can be found there The book addresses a knowledge gap in Wharton and the environmental humanities especially recent debates in ecocriticism The excavation of Wharton s words and the background of her narratives with an eye to offering an ecocritical reading of her work is what the book focuses on **Environmental Aspects of Real Estate and Commercial Transactions** James B. Witkin,2004 Rev ed of Environmental aspects of real estate transactions from brownfields to green buildings Green Roof Ecosystems Richard K. Sutton,2015-06-04 This book provides an up to date coverage of green vegetated roof research design and management from an ecosystem perspective It reviews explains and poses questions about monitoring substrate living components and the abiotic biotic and cultural aspects connecting green roofs to the fields of community landscape and urban ecology The work contains examples of green roof venues that demonstrate the focus level of detail and techniques needed to understand the structure function and impact of these novel ecosystems Representing a seminal compilation of research and technical knowledge about green roof ecology and how functional attributes can be enhanced it delves to explore the next wave of evolution in green technology and defines potential paths for technological advancement and research Handbook on Shrinking Cities Pallagst, Karina,Bontje, Marco,Cunningham Sabot, Emmanuèle,Fleschurz, René,2022-10-18 Compelling and engaging this Handbook on Shrinking Cities addresses the fundamentals of shrinkage exploring its causal factors the ways in which planning strategies and policies are steered and innovative solutions for revitalising shrinking cities Chapters cover topics of governance greening and right sizing and regrowth laying the relevant groundwork for the Handbook s proposals for dealing with shrinkage in the age of COVID 19 and beyond
