Proceedings of the 7th International Conference on Advanced Technology & Particle Physics Maura Barone, 2002 This book features up to date technology applications to radiation detection It synthesises several techniques of and approaches to radiation detection covering a wide range of applications and addressing a large audience of experts and students Many of the talks are in fact reviews of particular topics often not covered in standard books and other conferences for instance the medical physics section To present these medical physics talks is crucial since a large fraction of the community in medical physics are from the particle physics community The same feature is true for astroparticle and space physics which are relatively new fields This book is unique in its scope Except for IEEE there is no other conference in the world that presents such a wide coverage of advanced technology applied to particle physics However unlike IEEE more room is made in the book for reviews and general talks

What Really Happens When You Die? Andrew McLauchlin,2016-01-08 What happens to us when we die It s a question that has sought answers from religion philosophy the supernatural and more recently to evidence from near death experience But never it seems from science Yet that s where the answer appears to lie Specifically in cosmology the study of the history and future of the universe Taking his inspiration from Stephen Hawking s groundbreaking A Brief History of Time author Andrew McLauchlin brings his background in physics to bear on this fascinating subject He examines developments in cosmology and shows how they point to a conclusion about the dimension of time that has very real implications not only for the universe but also for us What Really Happens When We Die is a journey of discovery into a realm that offers an astonishing explanation for one of life s imponderables
