Eye Of The Abyss:

The Abyss Stares Back Stacy Alaimo, 2025-05-13 In an era of accelerating extinctions what does it mean to discover thousands of new species in the deep sea As we see the catastrophic effects of the Anthropocene proliferate advanced technologies also grant us greater access to the furthest reaches of the world's oceans facilitating the discovery of countless new species Sorting through the implications of this strange paradox Stacy Alaimo explores the influence this newfound intimacy with the deep sea might have on our broader relationship to the nonhuman world While many images of these abyssal creatures circulate as shallow clickbait aesthetic representations can be enticing lures for speculating about their lives profoundly expanding our environmental concern *The Abyss Stares Back* analyzes a diverse range of scientific literary and artistic accounts of deep sea exploration including work from the naturalist William Beebe and the artist Else Bostelmann as well as results of the Census of Marine Life that began at the turn of the twenty first century As she focuses on oft overlooked creatures of the deep such as tubeworms hatchetfish siphonophores and cephalopods which are typically cast as alien Alaimo shows how depictions of the deep seas have been enmeshed in long colonial histories and racist constructions of a threatening abyss Drawing on feminist environmentalism posthumanism science and technology studies and Indigenous and non Western perspectives Alaimo details how our understanding of science is fundamentally altered by aesthetic encounters with these otherworldly life forms She argues that although the deep sea is often thought of as a lifeless void with little connection to human existence our increasing devastation of this realm underscores our ethical obligation to protect the biodiverse life in the depths When the abyss stares back it demands recognition Retail e book files for this title are screen reader friendly with images accompanied by short alt text and or extended descriptions *The Eye of the Abyss* Ailittlebunny, 2025-02-08

Isotopography Niels Wilde, 2024-08-19 While the concept of place remains undertheorized in Kierkegaard research this study argues that place is at the center of Kierkegaard's thinking The first part of the book shows that Kierkegaard's notion of situatedness as being placed in a socio historical situation conditioned by a situation prior to situatedness points to a realist position and a flat ontology Secondly the book develops a detailed analysis of the ontological structure of the existential place the place we ourselves are and concrete places the places where we are Place opens a qualified space within bounds the existence sphere an atmosphere of elemental attunement and attuned elementality Finally the book collects the dots from part one and two in a topological realist approach to Kierkegaard's theology and three main definitions of God God is love God is that everything is possible and God is the middle term The book concludes that Kierkegaard's existential topography reveals a realist position where we are is never exhausted by being the place where we are
