Death of the Senate Ben Nelson, 2021-09 Something is rotten in the U S Senate and the disease has been spreading for some time But Ben Nelson former U S senator from Nebraska is not going to let the institution destroy itself without a fight Death of the Senate is a clear eyed look inside the Senate chamber and a brutally honest account of the current political

reality In his two terms as a Democratic senator from the red state of Nebraska Nelson positioned himself as a moderate broker between his more liberal and conservative colleagues and became a frontline player in the most consequential fights of the Bush and Obama years His trusted centrist position gave him a unique perch from which to participate in some of the last great rounds of bipartisan cooperation such as the Gang of 14 that considered nominees for the federal bench and passed over a young lawyer named Brett Kavanaugh for being too partisan Nelson learned early on that the key to any negotiation at any level is genuine trust With humor insight and firsthand details Nelson makes the case that the heart of the deal is critical and describes how he focused on this during his time in the Senate As seen through the eyes of a centrist senator from the Great Plains Nelson shows how and why the spirit of bipartisanship declined and offers solutions that can restore the Senate to one of the world's most important legislative bodies *The Nation*, 1893 **The Nation's Health** Charles-Edward Amory Winslow, Frank Leslie Rector, 1919 *The Nation and the States, Rivals Or Partners?* William Anderson, 1955 *The Nation and the States Rivals or Partners* was first published in 1955 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions Are the states losing their self government What did the framers of the Constitution intend with respect to states rights Are federal grants in aid to the states a boon or a bane Is big government too big Are overlapping taxes a necessary evil These are the kinds of questions basic complex and difficult yet essential to answer that Professor Anderson clarifies in this handbook which is intended for general readers as well as for students of government The language has been kept simple and clear and the viewpoint does not presuppose any extensive knowledge of the subject on the part of the reader As a member of the President's Commission on Intergovernmental Relations Professor Anderson has recognized a real need on the part of the public for a better understanding of the background issues involved in any discussion of the balance of authority functions and finances between the nation the states and the local governments of America This book will help responsible citizens government officials and students of political science history and other social sciences to reach informed decisions on the merits of any proposals for readjustments in intergovernmental relations After providing the historical background for the subject and scrutinizing the current issues in fact as well as in propaganda Professor Anderson presents a constructive program designed for the strengthening of all three levels of American government **Department of State Bulletin**, 1983 The official monthly record of United States foreign policy **The Nation's Physician Workforce** Committee on the U.S. Physician Supply, Institute of Medicine, 1996-02-02 Enormous changes are occurring in the organization and financing of the U S health care system rapid changes that are being driven by market forces rather than by government initiatives Although it is difficult to predict what they system will look like once it begins to stabilize the changes will affect all components of the health care workforce and the numbers and types of health care professionals that will be needed in the future as well as the roles they will fill will surely be much different than they

were in the past Despite numerous studies in the past 15 years showing that we might have more doctors than we need the number of physicians in residency training continues to grow At the same time there is evidence that the demand for physician services will decrease as a result of growth of managed care All of this is evidence that the demand for physician services will decrease as a result of growth of managed care All of this is taking place at a time when coincident with the result of failure of comprehensive health care reform there is no coordinated and widely accepted physician workforce policy in the United States The present study examines the following three questions 1 Is there a physician policy in the United States 2 If there a surplus what is its likely impact on the cost quality and access to health care and on the efficient use of human resources 3 What realistic steps can be taken to deal with a physician surplus December **Reports and**

Rose, 2001-08-01 Why some Americans built fallout shelters an exploration America's Cold War experience For the half century duration of the Cold War the fallout shelter was a curiously American preoccupation Triggered in 1961 by a hawkish speech by John F Kennedy the fallout shelter controversy to dig or not to dig as Business Week put it at the time forced many Americans to grapple with deeply disturbing dilemmas that went to the very heart of their self image about what it meant to be an American an upstanding citizen and a moral human being Given the much touted nuclear threat throughout the 1960s and the fact that 4 out of 5 Americans expressed a preference for nuclear war over living under communism what's perhaps most striking is how few Americans actually built backyard shelters Tracing the ways in which the fallout shelter became an icon of popular culture Kenneth D Rose also investigates the troubling issues the shelters raised Would a post war world even be worth living in Would shelter construction send the Soviets a message of national resolve or rather encourage political and military leaders to think in terms of a winnable war Investigating the role of schools television government bureaucracies civil defense and literature and rich in fascinating detail including a detailed tour of the vast fallout shelter in Greenbriar Virginia built to harbor the entire United States Congress in the event of nuclear armageddon One Nation Underground goes to the very heart of America's Cold War experience
