Face Detection and Gesture Recognition for Human-Computer Interaction Ming-Hsuan Yang, Narendra Ahuja, 2012-12-06 Traditionally scientific fields have defined boundaries and scientists work on research problems within those boundaries However from time to time those boundaries get shifted or blurred to evolve new fields For instance the original goal of computer vision was to understand a single image

of a scene by identifying objects their structure and spatial arrangements This has been referred to as image understanding Recently computer vision has gradually been making the transition away from understanding single images to analyzing image sequences or video understanding Video understanding deals with understanding of video sequences e g recognition of gestures activities facial expressions etc The main shift in the classic paradigm has been from the recognition of static objects in the scene to motion based recognition of actions and events Video understanding has overlapping research problems with other fields therefore blurring the fixed boundaries Computer graphics image processing and video databases have obvious overlap with computer vision The main goal of computer graphics is to generate and animate realistic looking images and videos Researchers in computer graphics are increasingly employing techniques from computer vision to generate the synthetic imagery A good example of this is image based rendering and modeling techniques in which geometry appearance and lighting is derived from real images using computer vision techniques Here the shift is from synthesis to analysis followed by synthesis

FACE: (New) Facets of a Sociopragmatic Concept ,2024-12-02 Face has become a key concept in current socio pragmatics By virtue of its metaphorical force it enables researchers to explain universal processes of human communication mostly reflected in language use Yet being an English construct in intercultural comparison face provokes critical debates putting in doubt namely its relation to politeness theories The 8 articles in this volume tie on these issues putting face under linguistic scrutiny With different approaches and methods some reconsider the notion of face comparing labels and expressions in lingua cultures other than English others explore the verbal enactment of face in selected speech acts conversational moves and interactional settings

Similarity Measures for Face Recognition Enrico Vezzetti ,Federica Marcolin,2015-04-27 Face recognition has several applications including security such as authentication and identification of device users and criminal suspects and in medicine corrective surgery and diagnosis Facial recognition programs rely on algorithms that can compare and compute the similarity between two sets of images This eBook explains some of the similarity measures used in facial recognition systems in a single volume Readers will learn about various measures including Minkowski distances Mahalanobis distances Hansdorff distances cosine based distances among other methods The book also summarizes errors that may occur in face recognition methods Computer scientists facing face and looking to select and test different methods of computing similarities will benefit from this book The book is also useful tool for students undertaking computer vision courses

The Politics of Fandom Hannah Mueller,2022-01-20 Fandom has been celebrated both as a harmonious tolerant space and as apolitical and detached from reality Yet fandom is neither harmonious nor apolitical Throughout the past century fandom has been shaped by recurring controversies and sparked by the emergence of new circles platforms and discourses Since the earliest days of science fiction fandom fans have conceived of their communities as quasi political bodies and of themselves as public actors in discursive spaces They are concerned with the organizational structures norms and borders of fandom as well as their own position within it all This latter concern has moved to the forefront as fan practices

and platforms have been coopted by the entertainment industry and by political actors forcing fans to situate their fannish and political identities in relation to both sprawling transmedia franchises and right wing groups exploiting fannish formations for political ends Through case studies of Glee and The Hunger Games fandoms as well as events such as Gamergate RaceFail 09 and the Hugo Awards controversies this book explores the complexities of political fandom

Inscriptions Daniel J. Geagan, 2011-09-09 This is the last of five volumes presenting inscriptions discovered in the Athenian Agora between 1931 and 1967 Published here are inscriptions on monuments commemorating events or victories on statues or other representations erected to honor individuals and deities and on votive offerings to divinities Most are dated to between the 4th century B C and the 2nd century A D but a few survive from the Archaic and Late Roman periods A final section contains monuments that are potentially but not certainly dedicatory in character and a small number of grave markers omitted from Agora XVII Each of the 773 catalogue entries includes a description of the object inscribed bibliography a transcription of the Greek text and commentary There are photographs of each piece of which no adequate illustration has yet been published including newly joined fragments The volume concludes with concordances and six indexes
