Perkins, 1995 In Either Or Part One Kierkegaard presents what he calls the aesthetic form of life There he focuses on a large variety of the stereotypical views of women from a sentimental and whining appraisal of her position in the world through the view that sexual exploitation is an uncontrollable natural instinct and or drive for which men are not morally responsible to the view that woman is a jest not to be taken seriously as a moral and responsible being and then that she is just there as a sexual object or plaything to be reflectively seduced on the male s terms and for his pleasure or rejection whatever suits him at the moment Needless to say this great variety of views of the uses of woman has provoked a large critique and just as predictably that critique is as varied as the intellectual tools available for the analysis of a work that is as literary as it is philosophic The present collection of essays treats these and many other of the most important issues raised in Either Or in fresh and perceptive ways Even where familiar themes are argued the authors introduce innovative interpretive models new approaches and new materials are appealed to or new rebuttal arguments against previously held positions are offered Several of the articles for instance appropriate or criticize methods or insights derived from postmodernism and or feminist philosophy an approach that would have been unlikely two decades ago **Comprehensive Guide to SBI Bank PO**
