**The Reason Why: the Post Civil-war Agrarian Crisis in Spain** Thomas Christiansen,2012-05-07 This book analyses the influence of Francoist policy on agricultural output in the 1939 55 period The focus is on the wheat olive and wine sectors and special attention is given to small scale farmers Agrarian policy for wheat and olive oil included pricefixing production quotas and rationing of consumption Producers and consumers circumvented intervention by creating a black market When earnings from the black market are included value of output per unit of land remained close to pre war levels It is then concluded that the decrease in wheat output was caused by

lack of draught animals and fertilisers rather than state intervention Intervention in the wheat sector was therefore desirable from a social viewpoint but the system could have been improved significantly Average olive oil output only fell below the pre war level immediately after the war Consequently state intervention was unnecessary after 1942-43 and could have been abolished long before it was finally done in 1952 In the wine sector policy aimed at increasing farm prices rather than decreasing consumer prices Table wine consumption declined after the war but this was counteracted by higher demand for high alcohol white wine for the production of brandy and industrial alcohol Consequently the analysis shows that similar kinds of intervention led to quite different results in terms of production as demonstrated in the cases of wheat and olives On the other hand different types of intervention led to similar results in production for olives and vines

**Crises and Transformation in the Mediterranean World** Jordi Catalan Vidal, 2023-08-16 This edited collection presents an economic history of Catalonia and its economic crises from Roman times to the political difficulties of the present day It considers how the strong identity of the Catalan people has been reinforced in critical episodes such as the commercial revolution of the Late Medieval Age the 1640 rebellion the Succession War of 1705-1714 the industrial revolution of the eighteenth and nineteenth centuries and the strong repression during early Francoism The book also explores how historical parallels from Catalonia's past might shed light on the long term consequences of the Great Recession of 2007-9 and recovery in the EU showing how the typical Mediterranean approach of adjusting to crises by depreciating currencies and expanding public deficits has been less straightforward during the most recent financial crisis A particularly deep slump has contributed to fostering the claim for independence of Catalonia in recent times echoing larger dissatisfaction with EU monetary policy With a comprehensive overview of major events in Catalonian economic history and their broader implications to European political economy and development this book will be of interest to students and academics in economic history social history and monetary economics

*Britain's Informal Empire in Spain, 1830-1950* Nick Sharman, 2021-09-25 Based on five years of archival research this book offers a radical reinterpretation of Britain and Spain's relationship during the growth apogee and decline of the British Empire It shows that from the early nineteenth century

Britain turned Spain into an informal colony using its economic and military dominance to achieve its strategic and economic ends Britain's free trade campaign which aimed to tear down the legal barriers to its explosive trade and investment expansion undermined Spain's attempts to achieve industrial take off demonstrating that the relationship between the two countries was imperial in nature and not simply one of unequal national power Exploring five key moments of crisis in their relations from the First Carlist War in the 1830s to the Second World War the author analyses Britain's use of military force in achieving its goals and the consequences that this had for economic and political policy making in Spain Ultimately the Anglo Spanish relationship was an early example of the interaction between industrial power and colonies formal and informal that characterised the post World War Two period An insightful read for anyone researching the British Empire and its colonies this book offers an innovative perspective by closely examining the volatile relationship between two European powers

**The Biological Standard Of Living On Three Continents** John

Komlos, 2019-07-11 The effort of anthropometric historians to unearth the broad patterns of human biological well being has led to the examination of nearly forgotten centuries old records from dusty archives in practically all the continents of the globe French historians in the Annales tradition were among the first to adopt methods from physical anthropology and from the biological sciences but the real expansion of the field dates from the pathbreaking work of Richard Steckel and Robert Fogel which launched the discipline of anthropometric history on American soil Research has confirmed that physical stature is related to nutritional status and therefore to real family income and thus to the general standard of living Historians and development economists will find this line of research useful as it informs us about the standard of living of members of society for whom data on wages are seldom available women children aristocrats farmers and slaves In addition this research has shown that the biological standard of living may diverge from conventional indicators of welfare during the early stages of industrialization Thus per capita income is an ambiguous measure of welfare during some phases of growth and it must be supplemented with data from other indicators such as physical stature The essays in this volume broaden our knowledge of the human effects of the momentous economic changes of the last two centuries extending analysis to regions for which such
