English Poetry and Old Norse Myth A History traces the influence of Old Norse myth stories and poems about the familiar gods and goddesses of the pagan North such as Odin Thor Baldr and Freyja on poetry in English from Anglo Saxon times to the present day Especial care is taken to determine the precise form in which these poets encountered the mythic material so that the book traces a parallel history of the gradual dissemination of Old Norse mythic texts Very many major poets were inspired by Old Norse myth Some for instance the Anglo Saxon poet of Beowulf or much later Sir Walter Scott used Old Norse mythic references to lend dramatic colour and apparent authenticity to their presentation of a distant Northern past Others like Thomas Gray or Matthew Arnold adapted Old Norse mythological poems and stories in ways which both responded to and helped to form the literary tastes of their own times Still others such as William Blake or David Jones reworked and incorporated celebrated elements of Norse myth valkyries weaving the fates of men or the great World Tree Yggdrasill on which Odin sacrificed himself as personal symbols in their own poetry This book also considers less familiar literary figures showing how a surprisingly large number of poets in English engaged in individual ways with Old Norse myth **English Poetry and Old Norse Myth** A History demonstrates how attitudes towards the pagan mythology of the north change over time but reveals that poets have always recognized Old Norse myth as a vital part of the literary political and historical legacy of the English speaking world Encyclopedia of American Indian History Bruce E. The Invention of Race in the European Middle Ages Geraldine Heng, 2018-03-08 In *The Invention of Race in the European Middle Ages* Geraldine Heng questions the common assumption that the concepts of race and racism only began in the modern era Examining Europe's encounters with Jews Muslims Africans Native Americans Mongols and the Romani Gypsies from the 12th through 15th centuries she shows how racial thinking racial law racial practices and racial phenomena existed in medieval Europe before a recognizable vocabulary of race emerged in the West Analysing sources in a variety of media including stories maps statuary illustrations architectural features history saints lives religious commentary laws political and social institutions and literature she argues that religion so much in play again today enabled the positing of fundamental differences among humans that created strategic essentialisms to mark off human groups and populations for racialized treatment Her ground breaking study also shows how race figured in the emergence of homo europaeus and the identity of Western Europe in this time
