Film Michael Wood, 2012-01-26 Film is considered by some to be the most dominant art form of the twentieth century It is many things but it has become above all a means of telling stories through images and sounds The stories are often offered to us as quite false frankly and beautifully fantastic and they are sometimes insistently said to be true But they are stories in both cases and there are very few films even in avant garde art that don't imply or quietly slip into narrative This story element is important and is closely connected with the simplest fact about moving pictures they do move Even the older meanings of the word film a membrane a covering a veil an emanation now seem to have something to do with moving pictures Many people believe films are an instrument of illusion an emphatic way of seeing what is not there and this capacity has been both celebrated and condemned Like a movie mostly means like some sort of fairy tale But what about the reverse proposition that more than any other invention film brings us close to the world as it actually is Photography is truth a character says in a film by Jean Luc Godard And cinema is the truth twenty four times per second The same claim is made every day albeit less epigrammatically by newsreels and surveillance cameras In this Very Short Introduction Michael Wood provides a brief history and examination of the nature of the medium of film considering its role and impact on society as well as its future in the digital age

Music, Sound, and Technology in America Timothy D. Taylor, Mark Katz, Tony Grajeda, 2012-06-19 This reader collects primary documents on the phonograph cinema and radio before WWII to show how Americans slowly came to grips with the idea of recorded and mediated sound Through readings from advertisements newspaper and magazine articles popular fiction correspondence and sheet music one gains an understanding of how early 20th century Americans changed from music makers into consumers

Lois Weber in Early Hollywood Shelley Stamp, 2015-05-01 Among early Hollywood's most renowned filmmakers Lois Weber was considered one of the era's three great minds alongside D W Griffith and Cecil B DeMille Despite her accomplishments Weber has been marginalized in relation to her contemporaries who have long been recognized as fathers of American cinema Drawing on a range of materials untapped by previous historians Shelley Stamp offers the first comprehensive study of Weber's remarkable career as director screenwriter and actress Lois Weber in Early Hollywood provides compelling evidence of the extraordinary role that women played in shaping American movie culture Weber made films on capital punishment contraception poverty and addiction establishing cinema's power to engage topical issues for popular audiences Her work grappled with the profound changes in women's lives that unsettled Americans at the beginning of the twentieth century and

her later films include sharp critiques of heterosexual marriage and consumer capitalism. Mentor to many women in the industry, Weber demanded a place at the table in early professional guilds, decrying the limited roles available for women on screen and in the 1920s protesting the growing climate of hostility toward female directors. Stamp demonstrates how female filmmakers who had played a part in early Hollywood's bid for respectability were in the end written out of that industry's history. Lois Weber in Early Hollywood is an essential addition to histories of silent cinema, early filmmaking in Los Angeles, and women's contributions to American culture. *City Songs and American Life, 1900-1950* Michael L. Lasser, 2019

Nothing defines the songs of the great American songbook more richly and persuasively than their urban sensibility. During the first half of the twentieth century, songwriters such as Harold Arlen, Irving Berlin, Dorothy Fields, George and Ira Gershwin, and Thomas Fats Waller flourished in New York City, the home of Tin Pan Alley, Broadway, and Harlem. Many of these remarkably deft and forceful creators were native New Yorkers. Others got to Gotham as fast as they could. Either way, it was as if from their vantage point on the West Side of Manhattan, these artists were describing America, not its geography or politics, but its heart to Americans and to the world at large. In *City Songs and American Life, 1900-1950*, renowned author and broadcaster Michael Lasser offers an evocative and probing account of the popular songs, including some written originally for the stage or screen, that America heard and sang and danced to during the turbulent first half of the twentieth century. Lasser demonstrates how the spirit of the teeming city pervaded these wildly diverse songs. Often that spirit took form overtly in songs that portrayed the glamor of Broadway, the energy and jazz-age culture of Harlem. But a city-bred spirit, or even a specifically New York City way of feeling and talking, also infused many other widely known and loved songs stretching from the early decades of the century to the twenties, the age of the flapper, bathtub gin, and women's right to vote, the Great Depression, and finally World War II. Throughout this remarkable book, Lasser emphasizes how the soul of city life echoes in the nation's songs, developed and changed in tandem with economic, social, and political currents in America as a whole.

Dust jacket flap Media Studies 2.0 William Merrin, 2014-03-21 *Media Studies 2.0* offers an exploration of the digital revolution and its consequences for media and communication studies, arguing that the new era requires an upgraded discipline. *Media Studies 2.0* The book traces the history of mass media and computing, exploring their merger at the end of the twenty century and the material, ecological, cultural, and personal elements of this digital transformation. It considers the history of media and communication studies, arguing that the academic discipline was a product of the analogue broadcast era, emerging in the early twentieth century as a response to the success of newspapers, radio, and cinema, and reflecting that era back in its organisation, themes, and concepts. Digitalisation, however, takes us beyond this analogue era. *Media Studies 1.0* into a new post-broadcast era. Merrin argues that the digital era demands an upgraded academic discipline, one reflecting the real media life of its students and teaching the key skills needed by the twenty-first century user. *Media 2.0* demand a *media studies 2.0*. This original and critical overview of contemporary developments within media studies is ideal for general

students of media and communication as well as those specifically studying new and digital media

Reel Time Robert Morris Seiler, Tamara Palmer Seiler, 2013 In this authoritative work Seiler and Seiler argue that the establishment and development of moviegoing and movie exhibition in Prairie Canada is best understood in the context of changing late nineteenth century and early twentieth century social economic and technological developments From the first entrepreneurs who attempted to lure customers into movie exhibition halls to the digital revolution and its impact on moviegoing Reel Time highlights the pivotal role of amusement venues in shaping the leisure activities of working and middle class people across North America As marketing efforts the lavish interiors of the movie palace and the romantic view of the local movie theatre concealed a competitive environment in which producers exhibitors and distributors tried to monopolize the industry and drive their rivals out of business The pitched battles and power struggles between national movie theatre chains took place at the same time that movie exhibitors launched campaigns to reassure moviegoers that theatres were no longer the unclean and immoral places of amusement of yesteryear Under the leadership of impresarios the movie theatre rose up from these attacks to become an important social and cultural centre one deemed suitable for women and children An innovative examination of moviegoing as a social practice and movie exhibition as a commercial enterprise Reel Time depicts how the industry shaped the development of the Canadian Prairie West and propelled the region into the modern era

The Civil War Dead and American Modernity Ian Finseth, 2018-01-02 The Civil War Dead and American Modernity offers a fundamental rethinking of the cultural importance of the American Civil War dead Tracing their representational afterlife across a massive array of historical visual and literary documents from 1861 to 1914 Ian Finseth maintains that the war dead played a central complex and paradoxical role in how Americans experienced and understood the modernization of the United States From eyewitness accounts of battle to photographs and paintings and from full dress histories of the war to fictional narratives Finseth shows that the dead circulated through American cultural life in ways that we have not fully appreciated and that require an expanded range of interpretive strategies to understand While individuals grieved and relinquished their own loved ones the collective Civil War dead Finseth argues came to form a kind of symbolic currency that informed Americans melancholic relationship to their own past Amid the turbulence of the postbellum era as the United States embarked decisively upon its technological geopolitical and intellectual modernity the dead provided an illusion of coherence intelligibility and continuity in the national self At the same time they seemed to represent a traumatic break in history and the loss of a simpler world and their meanings could never be completely contained by the political discourse that surrounded them Reconstructing the formal rhetorical and ideological strategies by which postwar American society reimagined and continues to reimagine the Civil War dead Finseth also shows that a strain of critical thought was alert to this dynamic from the very years of the war itself The Civil War Dead and American Modernity is at once a study of the politics of mortality the disintegration of American Victorianism and the role of visual and literary art in both forming and undermining social consensus
