

tion of these issues, the book is valuable as a collection of empirical case studies, which at times include some delightful personal insights. See, for example, Helen Clark's account of being a politician caught up in the politics of the pharmaceutical companies; Neil Pearce on trying to publish important information on the side-effects of Fenoterol, while behind the scenes a drug company bombards the journal editors with unsolicited reviews; and Alex Thomson's account of the 'bribes' offered to doctors by pharmaceutical companies, and the weak response by medical ethics committees to these very common practices. Also, it is encouraging to see epidemiologists like Jackson, Kawachi and Pearce grappling with their own discipline and showing how epidemiological knowledge has been used to promote dubious 'mass treatment' regimes. Overall, *For Health or Profit* will probably not make a healthy profit, but given the copious details provided of the avaricious pursuits of pharmaceutical companies, the editor and contributors may be happy to have added another voice critical of the powerful drug industry.

CO-OPERATIVE LIFESTYLES IN AUSTRALIA: FROM UTOPIAN DREAMING TO COMMUNAL REALITY

Bill Metcalf (ed.)

Sydney, UNSW Press, 1995. 198 pp., \$29.95 (paperback).

In an environment of rationalist economics practised at university and with my increasing sense of being bound to harder and faster outcome measurements defined somewhere beyond me, I found this a challenging and refreshing book. Challenging because the book is about people successfully struggling to exercise control and responsibility in their own lives through community, and refreshing because I frequently could

identify with the authors' vision, commitment, pragmatism and successes.

This is a book of ten stories (first person narratives by four men, five women and one couple) by and about people in small-scale communities ranging in size between five and 260. The introduction is an historical overview of Australian intentional communities by Bill Metcalf and he also supplies the summary and conclusions. The communities represented are located across Australia. A significant number of the authors are academics, and these are mostly sociologists or social scientists, so this makes for very 'warm' sociology.

This is also a book about multiculturalism in Australia, in the sense that those who choose intentional communities do so with a strong critique of some notion of 'mainstream' culture. Their analysis of the 'outside' of their vision of cultural/community preferences motivates the construction of community. The community cultures constructed would seem as strong and diverse as any associated with any ethnicity, sexuality, institutions, or urban or rural location, and yet currently they appear not to be constructed as threatening in popular discourse.

Many of the authors included in *Co-operative Lifestyles in Australia* discuss physical place (all communities represented are significantly rural) and community where the magnitude and potency of the global appear to intrude rather less than in lives of those 'outside'. Most authors however do work 'outside', although this work is not a focus for discussion. Perhaps the picture that emerges then is of life more 'sealed off' than longer conversations with authors might indicate. In *Co-operative Lifestyles in Australia*, the individual is supported and confined by, and struggles with, others in community or perhaps with local government. 'Outside' family and friends, Tibetan Llamas and Woofers are the only others who seem to drift in and out of the lives portrayed.

The autobiographical papers about intentional community are edited by Metcalf, himself an erstwhile participant in intentional communities, and a soci-

Living in Utopia Lucy Sargisson, Lyman Tower Sargent, 2017-03-02 Utopia is literally the good place that is no place Utopias reveal people's dreams and desires and they may gesture towards different and better ways of being But they are rarely considered as physical observable phenomena In this book Sargisson and Sargent both established writers on utopian theory turn their attention to real life utopian communities The book is based on their fieldwork and extensive archival research in New Zealand a country with a special place in the history of utopianism A land of opportunity for settlers with dreams of a better life New Zealand has per capita more intentional communities groups of people who have chosen to live and sometimes work together for a common purpose than any country in the world Sargisson and Sargent draw on the experiences of more than fifty such communities to offer the first academic survey of this form of living utopian experiment In telling the story of the New Zealand experience Living in Utopia provides both transferable lessons in community cooperation and social change and a unique insight into the utopianism at the heart of politics society and everyday life

The Cambridge Companion to Utopian Literature Gregory Claeys,2010-08-05 Since the publication of Thomas More s genre defining work Utopia in 1516 the field of utopian literature has evolved into an ever expanding domain This Companion presents an extensive historical survey of the development of utopianism from the publication of Utopia to today s dark and despairing tendency towards dystopian pessimism epitomised by works such as George Orwell s Nineteen Eighty Four and Margaret Atwood s The Handmaid s Tale Chapters address the difficult definition of the concept of utopia and consider its relation to science fiction and other literary genres The volume takes an innovative approach to the major themes predominating within the utopian and dystopian literary tradition including feminism romance

Utopianism for a Dying Planet Gregory Claeys, 2024-12-10 How the utopian tradition offers answers to today's environmental crises In the face of Earth's environmental breakdown it is clear that technological innovation alone won't save our planet A more radical approach is required one that involves profound changes in individual and collective behavior Utopianism for a Dying Planet examines the ways the expansive history of utopian thought from its origins in ancient Sparta and ideas of the Golden Age through to today's thinkers can offer moral and imaginative guidance in the face of catastrophe The utopian tradition which has been critical of conspicuous consumption and luxurious indulgence might light a path to a society that emphasizes equality sociability and sustainability Gregory Claeys unfolds his argument through a wide ranging consideration of utopian literature social theory and intentional communities He defends a realist definition of utopia focusing on ideas of sociability and belonging as central to utopian narratives He surveys the development of these themes during the eighteenth and nineteenth centuries before examining twentieth and twenty first century debates about alternatives to consumerism Claeys contends that the current global warming limit of 1.5C (2.7F) will result in cataclysm if there is no further reduction in the cap In response he offers a radical Green New Deal program which combines ideas from the theory of sociability with proposals to withdraw from fossil fuels and cease reliance on unsustainable commodities An urgent and comprehensive search for antidotes to our planet's destruction Utopianism for a Dying Planet asks for a revival of utopian ideas not as an escape from reality but as a powerful means of changing it
