## Frontier Boulder:

Frontier Boulder Richard L. Fetter, 1983      Blood Ground Elizabeth Elbourne, 2002 In *Blood Ground* Elizabeth Elbourne looks at the relationship between the Khoekhoe the British empire and the London Missionary Society in the early nineteenth century a time of intense conflict in which different groups competed to mobilize Christianity for their own political ends She explores the social history of the early missionary movement as well the political impact of British evangelicals arguing that religious change in southern Africa can only be understood in the material context of ethnic conflict and bitter struggles over land and labour In doing so she reintegrates the history of religion into the mainstream historical narrative of South Africa offering a view of Christianity not as a monolithic system but as a language subject to interpretation and highly politicized conflicts over meaning      *Mistresses of the Transient Hearth* Robin D. Campbell, 2020-10-28 This book explores the ways in which mid 19th Century American army officers wives used material culture to confirm their status as middle class women

*Frontier Dynamics* David McDermott Hughes, 1999      **Where Cultures Meet** David J. Weber, Jane M. Rausch, 1997-08-01 In *Where Cultures Meet* editors Weber and Rausch have collected twenty essays that explore how the frontier experience has helped create Latin American national identities and institutions Using frontier to mean more than border Weber and Rausch regard frontiers as the geographic zones of interaction between distinct cultures Each essay in the volume illuminates the reciprocal influences of the pioneer culture and the frontier culture as they contend with each other and their physical environment The transformative power of frontiers gives them special interest for historians and anthropologists Delving into the frontier experience below the Rio Grande *Where Cultures Meet* is an important collection for anyone seeking to understand fully Latin American history and culture      **The Last Western** Paul Stasi, Jennifer Greiman, 2012-12-20 Perhaps the most sophisticated and complex of shows in HBO's recent history *Deadwood* has surprisingly little coverage in our current scholarship Grounding contemporary anxieties about race and class domesticity and American exceptionalism in its nineteenth century setting *Deadwood* revises our understanding of a formative period for the American nation through a re-examination of one of the main genres through which this national story has been transmitted the Western With contributions from scholars in American studies literature and film and television studies *The Last Western* situates *Deadwood* in the context of both its nineteenth century setting and its twenty first century audience Together these essays argue for the series as a provocative meditation on both the state and historical formation of U S empire examining its treatment of sovereign power and political legitimacy capital accumulation and dispossession racial and gender identities and social and family structures while attending to the series peculiar and evocative aesthetic forms What emerges from this collection is the impressive range of *Deadwood*'s often contradictory engagement with both nineteenth and twenty first century America      **Making of the American West** Benjamin H. Johnson, 2007-05-15 A richly researched evocative account of the individuals and institutions involved in the settling of the non Indian West and of the impact of the

development of the West on the nation as a whole Making of the American West surveys the experiences of major social groups in the lands from the Mississippi to the Pacific from the United States penetration of the region in the early 19th century to its incorporation into national political economic and cultural fabric by the early 20th century This revealing volume offers fascinating portraits of the people and institutions that drove the Western conquest traders and trappers ranchers and settlers corporations the federal government as well as of those who resisted conquest or hoped for the emergence of a different society Indian peoples Latinos Asians wage laborers Throughout expert contributors continually return to the growing myth of the West and the impact of its promise of freedom and opportunity on those who sought to Americanize it     **Pecker's Revenge and Other Stories from the Frontier's Edge** Lori Van Pelt,2005 Fourteen stories of colorful western characters and how they are transformed     *A Scalawag in Georgia* William Warren Rogers,2007 A controversial period in American history as revealed through one man s personal and political experiences     The Creation of the Zulu Kingdom, 1815-1828 Elizabeth A. Eldredge,2014-10-30 This scholarly account traces the emergence of the Zulu Kingdom in South Africa in the early nineteenth century under the rule of the ambitious and iconic King Shaka In contrast to recent literary analyses of myths of Shaka this book uses the richness of Zulu oral traditions and a comprehensive body of written sources to provide a compelling narrative and analysis of the events and people of the era of Shaka s rule The oral traditions portray Shaka as rewarding courage and loyalty and punishing failure as ordering the targeted killing of his own subjects both warriors and civilians to ensure compliance to his rule and as arrogant and shrewd but kind to the poor and the mentally disabled The rich and diverse oral traditions transmitted from generation to generation reveal the important roles and fates of men and women royal and subject from the perspectives of those who experienced Shaka s rule and the dramatic emergence of the Zulu Kingdom     **Out Where the West Begins, Volume 2** Philip F. Anschutz,2017-12-15 In 1790 it was not a given that the young United States bruised and healing from its struggle for independence and populated by fewer than 4 million inhabitants would even survive much less flourish But the great adventure that came next the exploration and settlement of the lands lying to the west and stretching to the Pacific Ocean would build a nation where only a patchwork of eastern seaboard colonies had existed before The first book in this series Out Where the West Begins Profiles Visions Strategies of Early Western Business Leaders profiled fifty individuals who made significant contributions to the economic development of a young nation This second volume follows the saga of more than one hundred influential men and women political and military leaders religious thinkers civil rights proponents suffragettes African American pioneers writers and artists explorers and surveyors architects inventors innovators medical professionals and conservationists who together wove the story of early western frontier America The engaging account of their lives forms a unique tapestry of human experience In the words of the author Understanding our distinctive past helps us better comprehend who we are now and who we wish to become     **Respacing Africa** Ulf Engel,Paul Nugent,2010 Space has been reintroduced as an analytical category to the

humanities and social sciences in the early 1990s African Studies is one of the fields of knowledge production where the so called spatial turn has proved to be extremely fruitful The continent provides ample evidence for complex processes of deterritorialisation migration globalisation sub nationalisms and reterritorialisation new regionalisms processes of bordering etc These dialectical processes are driven by a variety of actors political elites multinational companies warlords donor governments local traders international NGOs etc As a result substantial parts of Africa witness the emergence of new regimes of territoriality re ordered states transnational and sub national entities new localities and transborder formations This volume brings together contributions from anthropology history geography and political science
