Hall, D.

Goodman,1991-01-12 The future of Brazilian Amazonia the world s largest remaining tropical rainforest hangs in the balance Two decades of destructive development have provoked violent struggles for control over the region s resources with disastrous social and environmental consequences This multi disciplinary collection reviews past experience but focusses on the latest phase of Amazonian settlement Chapters by leading authorities examine such issues as colonisation in the most recent frontier areas multinational mining projects hydro electric schemes and the military occupation of Brazil s borders After demonstrating how new government and business activities have exacerbated social tensions and ecological destruction the volume considers alternative more sustainable strategies *Global Deforestation* Christiane Runyan,Paolo

Emancipation Matt McDonald,2012-01-30 This book offers an examination of the role of emancipation in the study and practice of security focusing on the issue of environmental change The end of the Cold War created a context in which traditional approaches to security could be systematically questioned This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security This book argues that such a notion is problematic as it suggests that a universal definition of security is possible which prevents a recognition of security as a site of contestation in which a range of actors articulate alternative visions of who or what is in need of being secured If security is understood and approached in traditional terms as the territorial preservation of the nation state from external threat then it is indeed difficult to see how environmental issues would benefit from being placed on states security agenda If however security is defined in terms of the emancipation of the most vulnerable individuals from contingent structural oppressions then drawing a relationship between environmental change and security may be beneficial for redressing those environmental issues and prioritising the needs of those most at risk from the manifestations of global environmental change This book takes the limitations of contemporary approaches to the relationship between the environment and security as its starting point and seeks to do two things First it aims to illustrate the ways in which arguments over approaches to environmental issues can be viewed as contestation over the meaning of security in particular political contexts Central here is the composition and assumptions of the dominant security discourse to emerge regarding those issues a framework of meaning for the most important forms of action on behalf of a particular group defining the terms for meaningful contestation and negotiation about security itself within that group As such the book attempts to illustrate the dynamics of competition over the meaning of security with reference to environmental issues particularly focusing on instances of political change in the dominant security discourse through which that issue is approached In the process the author points to the central role of these dominant security discourses in underpinning the most practically significant actions regarding environmental issues such as deforestation and global climate change The book employs methodological tools that enable a focus on how particular

frameworks of meaning are constituted and become dominant how they provide a lens through which various issues are approached and how discourses most consistent with redressing environmental change and the suffering of the most vulnerable might come to provide the framework through which security is viewed in particular contexts This book will be of much interest to students of Critical Security Studies geography sociology IR and Political Science in general

Hydrological Problems and Environmental Management in Highlands and Headwaters Martin Haigh,2017-10-19 This set of papers presents a description of the synthesis of hydrological problems and various environmental implications and management strategies for different highland and headwater regions of the world Regions covered include the Himalayas Russian mountains Amazonia and upland Wales *Causes of Deforestation and Forest and Woodland Degradation in Tropical Latin America* William M. Denevan,1982 Tropical Deforestation C. J. Jepma,2014-02-04 The depletion of the tropical rain forests has attracted considerable attention in recent times and the serious consequences for the global biosphere are widely acknowledged Yet deforestation continues apace and in some areas for example southeast Asia the very existence of the forests is seriously threatened Contrary to popular belief evidence suggests that local economic and living conditions are more significant in this than timber exploitation for exports to the Northern countries Tropical Deforestation A Socio Economic Approach offers a new perspective on the economic imperatives which encourage indigenous populations to encroach upon their own forests and shows how action against deforestation must form part of a wider movement to improve both the living conditions of the local inhabitants and the durability of their national economies Part 1 offers an overview of the processes surrounding deforestation and an assessment of the current situation Part 2 analyses the land use issues and explains the socioeconomic imperatives in the affected regions In an absorbing conclusion Part 3 guides the reader through a series of hypothetical policy scenarios using a specially adapted economic computer model to predict which combinations of policies and trade arrangements might bring about a more beneficial state of affairs *The Dilemma Of Amazonian Development* Emilio F Moran,2019-05-28 This book the first to apply the combined approaches of anthropology geography ecology economics and sociology to the analysis of the Amazon River region and its imminent development explores the impact of development on Amazonian populations and the results of rural and urban growth strategies The authors use the methodologies of environmen **Latin America's Economy** Eliana A. Entangled Edens Candace Slater,2002 The skill with which Slater combines various levels and modalities of narrative utilizing her personal experience as a colorful unifying thread is truly remarkable Antonio Candido author of Antonio Candido On Literature and Society Howard S Becker editor A very important book that quite gracefully elegantly and persuasively moves beyond the usual myth and history format to put at its center stories about the Amazon and the people who tell them

Entangled Edens persuasively argues that the Amazon can only be grasped understood and come to terms with through its myths and stories It addresses a very real failing of modern environmentalism which for all its virtues tends to dehumanize and metaphorically depopulate when it does not villainize populations that do share its concerns or share them in very different ways Instead of forcing us to choose between land and people Slater uses the stories and the people who tell them to rethink human relations with nature and each other Richard White author of *The Organic Machine The Remaking of the Columbia River* Elegant erudite profoundly serious Entangled Edens is a source of inspiration and knowledge for the reader interested in the Amazon Without the cultural tradition and the life experience of Amazonia s people any analysis of the Amazon risks becoming inconsequential or opportunistic This is one of the powerful messages of this important reflection on the Amazon whose greatest riches are ultimately its people Candace Slater has written a book that will last Milton Hatoum author of *The Tree of the Seventh Heaven* 1994 and *The Brothers* 2002

The Political Economy of Brazil Lawrence S. Graham, Robert H. Wilson, 2014-07-03 The transition from authoritarian to democratic government in Brazil unleashed profound changes in government and society that cannot be adequately understood from any single theoretical perspective The great need say Graham and Wilson is a holistic vision of what occurred in Brazil one that opens political and economic analysis to new vistas This need is answered in *The Political Economy of Brazil* a groundbreaking study of late twentieth century Brazilian issues from a policy perspective The book was an outgrowth of a year long policy research project undertaken jointly by the Lyndon B Johnson School of Public Affairs and the Teresa Lozano Long Institute of Latin American Studies both at the University of Texas at Austin In this book several noted scholars focus on specific issues central to an understanding of the political and economic choices that were under debate in Brazil Their findings reveal that for Brazil the break with the past the authoritarian regime could not be complete due to economic choices made in the 1960s and 1970s and also the way in which economic resources committed at that time locked the government into a relatively limited number of options in balancing external and internal pressures These conclusions will be important for everyone working in Latin American and Third World development

Amazonia, Agriculture and Land Use Research Susanna B. Hecht, 1982 *Land Change Science, Political Ecology, and Sustainability* Christian Brannstrom, Jacqueline M. Vadjunec, 2014-01-23 Recent claims regarding convergence and divergence between land change science and political ecology as approaches to the study of human environment relationships and sustainability science are examined and analyzed in this innovative volume Comprised of 11 commissioned chapters as well as introductory and concluding synthesis chapters it advances the two fields by proposing new conceptual and methodological approaches toward integrating land change science and political ecology The book also identifies areas of fundamental difference and disagreement between fields These theoretical contributions will help a generation of young researchers refine their research approaches and will advance a debate among established scholars in geography land use studies and sustainability science that has been developing since the early 2000s At an

empirical level case studies focusing on sustainable development are included from Africa Central and South America and Southeast Asia The specific topics addressed include tropical deforestation swidden agriculture mangrove forests gender and household issues
