Frontier Earth:

Frontier Earth Bruce Boxleitner, 1999 A novel of alien worlds and distant times *Rare Earth Frontiers* Julie M. Klinger, 2018-01-15 *Rare Earth Frontiers* is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics green energy and medical technologies and essential telecommunications and defense systems Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power These include legally and logistically forbidding locations in the Amazon Greenland and Afghanistan and on the Moon Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents this book examines the production of the rare earth frontier as a place a concept and a zone of contestation sacrifice and transformation **Off-Earth** Erika Nesvold, 2024-10-01 Can we do better in space than we've done here on Earth We've pinpointed the destination refined the technology designed the habitat outfitted our space residents Are we forgetting something A timely reminder that it's not just rocket science this thought provoking book explores the all too human issues raised by the prospect of settling in outer space It's worth remembering Erika Nesvold suggests that in making new worlds we don't necessarily leave our earthly problems behind Accordingly her work highlights the complex ethical challenges that accompany any other worldly venture questions about the environment labor rights and medical ethics among others Any such venture Nesvold contends must be made on behalf of all humanity with global input and collaboration Off Earth thus includes historical and contemporary examples from outside the dominant Western US abled and privileged narrative of the space industry Nesvold calls on experts in ethics sociology history social justice and law to launch a hopeful conversation about the potential ethical pitfalls of becoming a multi planet species and ideally to shed light on similar problems we presently face here on Earth Space settlement is rapidly becoming ever more likely Will it look like the utopian vision of Star Trek Or the dark future of Star Wars Nesvold challenges us to decide **The Unconstructable Earth** Frédéric Neyrat, 2018-10-16 Winner Grand Prize French Voices Award for Excellence in Publication and Translation The Space Age is over Not at all A new planet has appeared Earth In the age of the Anthropocene the Earth is a post natural planet that can be remade at will controlled and managed thanks to the prowess of geoengineering This new imaginary is also accompanied by a new kind of power geopower that takes the entire Earth in its social biological and geophysical dimensions as an object of knowledge intervention and governmentality In short our rising awareness that we have destroyed our planet has simultaneously provided us not with remorse or resolve but with a new

fantasy that the Anthropocene delivers an opportunity to remake our terrestrial environment thanks to the power of technology. Such is the position we find ourselves in when proposals for reengineering the earth's ecosystems and geosystems are taken as the only politically feasible answer to ecological catastrophe. Yet far from being merely the fruit of geo-capitalism, this new grand narrative of geopower has also been activated by theorists of the constructivist turn, ecomodernist, postenvironmentalist, accelerationist, who have likewise called into question the great divide between nature and culture. With the collapse of this divide, a cyborg hybrid, flexible nature has been built, an impoverished nature that does not exist without being performed by technologies that proliferate within the space of human needs and capitalist imperatives. Underneath this performative vision resides a hidden anaturalism denying all otherness to nature and the Earth, no longer by externalizing it as a thing to be dominated but by radically internalizing it as something to be digested. Constructivist ecology thus finds itself in no position to confront the geoconstructivist project with its claim that there is no nature and its aim to replace Earth with Earth 2.0. Against both positions, Neyrat stakes out the importance of the unconstructable Earth. Against the fusional myth of technology over nature but without returning to the division between nature and culture, he proposes an ecology of separation that acknowledges the wild subtractive capacity of nature. Against the capitalist technocratic delusion of earth as a constructible object but equally against an organicism marked by unacknowledged traces of racism and sexism, Neyrat shows what it means to appreciate Earth as an unsubstitutable becoming, a trajectory that cannot be replicated in a laboratory. Underway for billions of years, withdrawing into the most distant past and the most inaccessible future, Earth escapes the hubris of all who would remake and master it. This remarkable book, which will be of interest to those across the humanities, natural sciences, and social sciences, from theorists to shapers of policy, recasts the earth as a singular trajectory that invites humans to turn political ecology into a geopolitics.

Earth Into Property Tony Hall, 2010. A broad exploration of the colonial roots of global capitalism and the worldwide quest of Indigenous people for liberation through decolonization.

Cantrill, Christine L. Oravec, 2021-10-21 The core dilemma in environmental advocacy may be illustrated by the question When we communicate about the world should we stress what we know or what we feel The contributors to The Symbolic Earth argue that it is more important to decide how we should talk about what we know and feel In their view the environment is largely a product of how we talk about the world Because the environment is a social construction the only hope we have of preserving it is to understand and alter the fundamental ways we discuss it This collection first examines the ways in which discourse creates environment perceptions Subjects discussed range from the description of natural scenery to the advocacy of political interest groups from the everyday interactions of citizens facing environmental crises to the greenwashing of corporate imagemakers and from the psychology of the mass public to the social constructions of the mass media The authors include nationally known scholars of environmental history rhetorical theory ethnography communication and journalism studies public policy and media criticism

The Necessary Earth Wilson O. Clough, 2014-09-10 The Necessary Earth is a study of the degree to which the long American experience with an open frontier has entered into an inherently American literature to distinguish it from that of other lands Since literature is in the author's words a compound of time place and the individual projection of personal experience and reflection into objective forms the American compulsion to communicate their experience and their difference was a virtual guarantee that a native literature would arrive The text falls into three major portions The first considers the age of wonder the impact of New World upon Old World comes to effect profound changes and to set the new American on the parallel paths of idealism and pragmatism The second part examines the effort of native born writers to appropriate this experience for new metaphors and new literary theme Without this effort the frontier might have remained no more than a dwindling legend and the transference to the theme of self reliance might never have appeared In the third portion the author turns to the twentieth century examining here the degree to which the national theme of reliance on experience over tradition has persisted in the work of major authors Ranging thus from Jamestown and Plymouth to Wallace Stevens the book stresses throughout the pull of untamed nature on the human spirit and the echoes of that experience in what is most intrinsic in American literature Without denying frontier lawlessness or native chauvinism Clough directs our attention primarily to the problems of the creation of a new language and a new metaphor to meet the new experience and the persistence of a truly American note into a maturing of both manner and matter

Earth and Air Janet Edwards, 2018-06-10 Don't breathe 2788 Only the handicapped live on Earth While everyone else uses interstellar portals to travel between hundreds of colony worlds 17 year old Jarra is among the one in a thousand people born with an immune system that cannot survive on other planets Sent to Earth at birth to save her life abandoned by her parents to be raised a ward of Hospital Earth she lives a regimented life in one of their impersonal residences Jarra is

spending the summer at New York Fringe Dig Site with her school history club While her friends search for lost treasures on the ground Jarra is airborne in a survey plane and hoping to become a qualified pilot but the sprawling ancient ruins of New York contain the lethal legacies of the past as well as its treasures EARTH AND AIR is the second of the prequel novellas set in the distant future of the Earth Girl trilogy and featuring Jarra At over 60 000 words it is actually longer than standard novella length *Earth Matters on Stage* Theresa J. May, 2020-08-09 *Earth Matters on Stage* Ecology and Environment in American Theater tells the story of how American theater has shaped popular understandings of the environment throughout the twentieth century as it argues for theater's potential power in the age of climate change Using cultural and environmental history seven chapters interrogate key moments in American theater and American environmentalism over the course of the twentieth century in the United States It focuses in particular on how drama has represented environmental injustice and how inequality has become part of the American environmental landscape As the first book length ecocritical study of American theater *Earth Matters* examines both familiar dramas and lesser known grassroots plays in an effort to show that theater can be a powerful force for social change from frontier drama of the late nineteenth century to the eco theater movement This book argues that theater has always and already been part of the history of environmental ideas and action in the United States *Earth Matters* also maps the rise of an ecocritical thought and eco theater practice what the author calls ecodramaturgy showing how theater has informed environmental perceptions and policies Through key plays and productions it identifies strategies for artists who want their work to contribute to cultural transformation in the face of climate change *The Earth is Weeping* Peter Cozzens, 2016 With the end of the Civil War the nation recommenced its expansion onto traditional Indian tribal lands setting off a wide ranging conflict that would last more than three decades In an exploration of the wars and negotiations that destroyed tribal ways of life even as they made possible the emergence of the modern United States Peter Cozzens gives us both sides in comprehensive and singularly intimate detail He illuminates the encroachment experienced by the tribes and the tribal conflicts over whether to fight or make peace and explores the squalid lives of soldiers posted to the frontier and the ethical quandaries faced by generals who often sympathized with their native enemies Amazon.com **Men, Masculinities, and Earth** Paul M. Pulé, Martin Hultman, 2021-08-03 This book considers issues of social and ecological significance through a masculinities lens Earth our home for aeons is reeling The atmosphere is heating up causing reefs to bleach fisheries to collapse regions to flood and dry vast tracts to burn the polar ice caps to melt ancient glaciers to retreat biodiversity to decline exacerbated by the sixth great extinction and more Meanwhile social and economic disparities are widening Pandemics are cauterising global communities and altering our social mores Nationalism is feeding divisiveness and hate especially through men's violence Politically extreme individuals and groups are exalting freedom while scapegoating the marginalised Such are the symptoms of an emerging Anthropocene This anthology contends with these alarming trends pointing our attention towards their gendered origins

Building on our monograph *Ecological Masculinities Theoretical Foundations and Practical Guidance* 2018 this collection of essays is framed as a dinner party conversation grouped into six discursive themes Their views reflect a growing community of practice whose combined efforts capture the most recent perspectives on masculine ecologisation Together they aim to help create a more caring world for all moving the ecological masculinities conversation forward as it becomes an established international and pluralised field of study

Dreams of Earth and Sky Freeman Dyson, 2015-04-21 In this sequel to *The Scientist as Rebel* 2006 Freeman Dyson whom The Times of London calls one of the world's most original minds celebrates openness to unconventional ideas and the spirit of joyful dreaming in which he believes that science should be pursued Throughout these essays which range from the creation of the Royal Society in the seventeenth century to the scientific inquiries of the Romantic generation to recent books by Daniel Kahneman and Malcolm Gladwell he seeks to break down the barriers that separate science from other sources of human wisdom Dyson discusses twentieth century giants of physics such as Richard Feynman J Robert Oppenheimer Paul Dirac and Steven Weinberg many of whom he knew personally as well as Winston Churchill's pursuit of nuclear weapons for Britain and Wernher von Braun's pursuit of rockets for space travel And he takes a provocative often politically incorrect approach to some of today's most controversial scientific issues global warming the current calculations of which he thinks are probably wrong the future of biotechnology which he expects to dominate our lives in the next half century as the tools to design new living creatures become available to everyone and the flood of information in the digital age Dyson offers fresh perspectives on the history the philosophy and the practice of scientific inquiry and even on the blunders the wild guesses and wrong theories that are also part of our struggle to understand the wonders of the natural world

Among the Powers of the Earth Eliga H. Gould, 2012-03-19 For most Americans the Revolution's main achievement is summed up by the phrase life liberty and the pursuit of happiness Yet far from a straightforward attempt to be free of Old World laws and customs the American founding was also a bid for inclusion in the community of nations as it existed in 1776 America aspired to diplomatic recognition under international law and the authority to become a colonizing power itself As Eliga Gould shows in this reappraisal of American history the Revolution was an international transformation of the first importance To conform to the public law of Europe's imperial powers Americans crafted a union nearly as centralized as the one they had overthrown endured taxes heavier than any they had faced as British colonists and remained entangled with European Atlantic empires long after the Revolution ended No factor weighed more heavily on Americans than the legally plural Atlantic where they hoped to build their empire Gould follows the region's transfiguration from a fluid periphery with its own rules and norms to a place where people of all descriptions were expected to abide by the laws of Western Europe civilized laws that precluded neither slavery nor the dispossession of Native Americans

Trembling Earth Megan Kate Nelson, 2005 This innovative history of the Okefenokee Swamp reveals it as a place where harsh realities clashed with optimism shaping the borderland culture of southern Georgia and northern Florida

for over two hundred years From the formation of the Georgia colony in 1732 to the end of the Great Depression the Okefenokee Swamp was a site of conflict between divergent local communities Coining the term ecolocalism to describe how local cultures form out of ecosystems and in relation to other communities Megan Kate Nelson offers a new view of the Okefenokee its inhabitants and its rich and telling record of thwarted ambitions unintended consequences and unresolved questions The Okefenokee is simultaneously terrestrial and aquatic beautiful and terrifying fertile and barren This peculiar ecology created discord as human groups attempted to overlay firm lines of race gender and class on an area of inherent ambiguity and blurred margins Rice planters slaves fugitive slaves Seminoles surveyors timber barons Swampers and scientists came to the swamp with dreams of wealth freedom and status that conflicted in varied and complex ways Ecolocalism emerged out of these conflicts between communities within the Okefenokee and other borderland swamps Nelson narrates the fluctuations disconnections and confrontations embedded in the muck of the swamp and the mire of its disorderly history and she reminds us that it is out of such places of intermingling and uncertainty that cultures are forged
