Keepers of the Golden Shore Michael Quentin Morton,2016-04-15 For those who visit the United Arab Emirates UAE staying in its the lavish hotels and browsing in the ultra modern shopping malls of Abu Dhabi or Dubai the country can be a mystery a glass and concrete creation that seems to have sprung from the desert overnight Keepers of the Golden Shore looks behind this glossy facade illuminating the region's history which stretches from the ancient Arabian tribes who controlled a desolate but economically important shoreline to the ostentatious architectural wonders bankrolled by a massive wealth of oil that characterize it today As Michael Quentin Morton recounts the region now known as the UAE likely began as a trading post between Mesopotamia and Oman and since that time has been the stage of important economic and cultural exchanges It has seen the rise and fall of a thriving pearl industry piracy invasions and wars and the arrival of the oil age that would make it one of the richest countries on earth Since the early 1970s when seven sheikhs agreed to enter into a union it has been a sovereign nation carrying on the resourceful spirit with resplendent fervor that the brutally inhospitable landscape has long demanded of the people Ultimately Morton shows that the country is not only rich in oil and money but in an extraordinarily deep history and culture

Buraimi Michael Quentin Morton, 2014-05-09 Buraimi is an oasis in an otherwise bleak desert on the border between Oman and the UAE In the early twentieth century it shot to notoriety as oil brought the world's attention to this corner of the Arabian Peninsula and the ensuing battle over energy resources between regional and global superpowers began In this lively account Michael Quentin Morton tells the story of how the power of oil and the conflicting interests of the declining British Empire and the United States all came to a head with the conflict between Great Britain and Saudi Arabia shaping the very future of the Gulf states The seeds of conflict over Buraimi were sown during the oil negotiations of 1933 in Jedda where the international oil companies vied for control of the future industry in the Arabian Peninsula As a result of lengthy discussions including the efforts of men such as St John Philby and Ibn Saud himself the Saudis granted an oil concession for Eastern Arabia without precisely defining the geographical limits of the area to be conceded Matters came to a head in 1949 when Saudi Arabia made claim to the territory and Great Britain acting on behalf of Oman and Abu Dhabi challenged the actions of the Saudis Attempts at arbitration failed and only one year before Britain's defeat over the Suez Canal Britain expelled Saudi Arabia from the oasis In the wake of Britain's withdrawal East of Suez in the early 1970s the dispute was apparently solved between Saudi Arabia and the UAE But whilst the controversy dominated Anglo Saudi relations for more than 30 years it still casts its shadow across the Gulf today threatening to expose the fragility of the West's ever present dependency on the region for its supply of oil Morton brings a range of historical figures to life from the American oilmen arriving in steamy Jedda in the 1930s to the rival sheikhs of Buraimi itself competing for power wealth and allegiances as well as the great players in world politics Churchill Truman and Ibn Saud This entertaining and thoroughly researched book is both a story of a decisive conflict in the history of Middle East politics and also of the great changes that the discovery of oil brought to this previously desolate land

Traditional Architecture of the Arabian Gulf R. Hawker, 2008-06-10 This book chronicles the florescence of architecture in the Arabian Gulf after the expulsion of the Portuguese in the early 1600 s It demonstrates how the power vacuum created by the collapse of Portuguese control over the trade routes in the Indian Ocean encouraged a growth in fortified architecture especially in Oman that radiated out to the surrounding region and was then slowly replaced by new patterns in domestic and public architecture and town planning throughout the Gulf as the trade lines were secured

and the individual countries took the first steps towards the formation of today's modern nation states. The book documents the buildings and crafts of this era and analyses them within the framework of the political, economic and social information available through primary sources from the period in a way that is both intelligent and accessible. It considers the settlements as part of a larger connected network of cities, towns and villages and focuses both on how the buildings provided innovative solutions to the demanding climate and yet incorporated new decorative and functional ideas. Topics are extensively and richly illustrated with colored photographs of the buildings as they are now, black and white and color historic photographs from archival and museum collections, line drawings and computer-generated reconstructions. The book is therefore attractive to a number of audiences including those who live in or travel to the Gulf as well as people with an interest in Arab and Islamic design, culture and society, vernacular architecture and post-colonial approaches to colonial history.
