Serendipity H. D. Johns, 2005 Here are practical easy to read essays that portray what one practitioner perceives happens in psychotherapy He reports his perceptions in a style that is both admittedly subjective and is easy to understand What Einstein is reported to have said about the universe seems applicable to all of life and to psychotherapy When I stand at the edge of the universe and look out it appears to be more like a great idea than a great machine In listening to troubled people he works with every day he jots down ideas for monographs and eventually writes up some of them Out of some five hundred of these ideas here are 65 which he calls discoveries or observations or solutions to problems They are Serendipitous in that they appeared unexpectedly along the traveled way His main reason for writing them is so his children both of whom are successful psychotherapists and his students will remember some of his thoughts and his ideas of how therapy works About his therapy he says I use lots of metaphors in my work ala Milton Erickson Central in this book as in my practice is an emphasis on Communication As a Transactional Analyst first trained in Psychoanalysis I hold Sigmund Freud's two basic ideas sacred 1 the causative nature of all behavior and 2 the importance of the unconscious Hence my interest in Dream Analysis and Body Language And because I firmly believe The way you talk is the way you are I place a lot of emphasis on semantics
