From The Bush The Front Line Of Health Care In A Caribbean Village

JL Elias

From The Bush The Front Line Of Health Care In A Caribbean Village:

From the Bush Marsha B. Quinlan, 2004 This case study will be the first to deal with a topic in medical anthropology It explores the world of folk medicine in the Caribbean Dominica local beliefs and practices concerning how the body functions and malfunctions and the home remedies Dominicans use to cure common illnesses The case study goes beyond discussing the exotic medical system of a developing country which includes sorcery and folk illnesses to discuss how folk medicine flourishes in industrialized countries in a way that is little different than that practiced in Dominica The theme is that cultural ideas about the body and uses of medicinal plants are deeply intertwined Ideas about illness direct the consequent medical response The book s topic is important because knowledge of local ethnomedical practice is essential for development of public health interventions in non Western settings This realist ethnography is aimed at any member of the generally educated population ,

The Small Nation Solution John H. Bodley, 2013-05-16 In The Small Nation Solution eminent anthropologist John H Bodley argues that the contemporary global problems of poverty conflict and environmental degradation are problems of scale and power Bodley s solution involves keeping nations small so as to limit the power of elite directors It is a simple idea with profound implications He spotlights successful small nations around the world as the best working models of sustainable sociocultural systems and shows how these diverse small nations can be the building blocks of a transformed global system that could save the world

Healing Insanity: a Study of Igbo Medicine in Contemporary Nigeria Patrick E. Iroegbu, 2010-06-08 Healing Insanity A Study of Igbo Medicine in Contemporary Nigeria is an original and in depth study on endogenous medical system in an African society It is craftily written and provides solid insight through case studies and theory into how insanity affects patients and the society Particularly it explores various collective representations and strategies regarding insanity and healing as it examines the healing institutions healers and ritual cults The central question is given the patterns of healing how do the Igbo shape the incidence and symptoms of insanity define its aetiology and provide healers with culture specific resources and skills to address this illness The focus became increasingly centred on bodily semantics and endogenous knowledge systems and practices Dr Patrick Iroegbus work is a very valuable and rare study and has appeared at a desirable time It is for an African society a comprehensive study of the many ways Igbo people in their practical routinelike attitudes and body centred experiences as well as in their more reflective aetiologic knowledge and healing institutions relate to the phenomenon of insanity or ara in the cultural parlance As the first of its kind reminiscent of and assured by the various remarks of Igbo scholars and leaders at various meetings and discourses the task this work has set out to accomplish is a very brave one The authors account of his fieldwork experiences and adopted techniques illustrates his initiation revealing him as a genuine ethnographer who is a friend of people and at ease with his field With both the far seeing and inspiring analysis of Igbo medicine life and culture accounted for in the work the book stands out for ethnographers teachers students leaders policymakers and the general public This is a book that deserves to

be read as it shapes the critical path toward understanding ways of healing insanity in a culture specific context crosscutting perspectives for a relationship between indigenous healing and the biomedical sphere Prof Ren Devisch Africa Research Centre University of Leuven This book is written with a clear purpose for everyone to read to understand and heal insanity and indeed provides a thick piece of cultural philosophy and vernacular of Igbo medicine in hopes of putting cultural wisdom in pursuit of integral health care development Prof Pantaleon Iroegbu Professor of Philosophy Major Seminary Ekpoma January 2006 To read this book as I did is to get the benefit of Dr Patrick Iroegbus ethnographic insight for an archetypical African healing system in Igboland It offers a fascinating theory of symbolic release that speaks of African symbolic action and knowledge system Dr Paul Komba Esq University of Cambridge Cultural Anthropology John H. Bodley, 2011-04-16 This introductory text introduces basic concepts in cultural anthropology by comparing cultures of increasing scale and focusing on specific universal issues throughout human history Cultural materials are presented in integrated ethnographic case studies organized by cultural and geographic areas to show how ideological social organization and material features fit together in specific sociocultural systems John H Bodley explicitly seeks a balance between ecological materialist and cultural ideological explanations of sociocultural systems while stressing the importance of individual power seeking and human agency Part One examines domestic scale autonomous tribal cultures Part Two presents politically organized class based civilizations and ancient empires in the imperial world Part Three surveys global industrial market based civilizations in the contemporary commercial world Cultural Anthropology uniquely challenges students to consider the big questions about the nature of cultural systems **A Companion to Medical Anthropology** Merrill Singer, Pamela I. health and illness and research design and methods in applied medical anthropology Addresses topics including chronic diseases rising levels of inequality war and health migration and health nutritional health self medication and end of life care Part of the acclaimed Wiley Blackwell Companions to Anthropology series A Companion to Medical Anthropology Second Edition remains an indispensable resource for medical anthropologists as well as an excellent textbook for courses in medical anthropology ethnomedicine global health care and medical policy **Creole Cultures, Vol. 1** Violet Cuffy, Jane

Carr, 2023-11-14 This edited collection considers the significance of Creole cultures within current changing global contexts With a particular focus on post colonial Small Island Developing States it brings together perspectives from academics policy makers and practitioners including those based in Dominica St Lucia Seychelles and Mauritius Together they provide a rich exploration of issues that arise in relation to safeguarding the intangible cultural heritage that sustains Creole identities Commencing with considerations of the UNESCO 2003 Convention for the Safeguarding of the Intangible Cultural Heritage ICH the collection then presents case studies from the Seychelles Mauritius St Lucia and Dominica These attest to the many and different ways through which Creole cultural practices remain significant to the lived experiences of Creole communities These chapters exemplify how through activities such as storytelling singing dancing making artworks and the alternative economic practice of koudmen Creole peoples sustain cultural identities that draw strength from their traditions Yet there is also recognition of the continual struggle to sustain Creole cultural practices in the face of global economic and political pressures and related uncertainties This global economic landscape also has an impact upon how Creole cultures are presented to tourists and hence upon the ways in which cultural practices are supported **Introducing Medical**

Anthropology Merrill Singer, Hans A. Baer, 2007 A new text in the growing field of medical anthropology

Ethnomedicine Pamela I. Erickson, 2007-11-14 People throughout time and place no matter their belief system have sought to discover causes and cures for illness and disease Among Westerners is a groundswell to augment biomedicine with holistic practices inherent in ethnomedicines of non Western traditions Yet missing are awareness and knowledge of the foundations and outgrowth of these alternative concepts Erickson fills this gap by clearly explaining the basic organizing principles that underlie all medical systems the full range of theories of disease causation the geographical distribution of medical practices and the historical trends that led to biomedical dominance Her efficient balanced approach highlights commonalities among the worlds vast and diverse medical systems making ethnomedicine easier to internalize and to apply in clinical settings *Thieving a Chance* Rebecca Prentice, 2015-05-15 When an IMF backed program of liberalization opened Trinidad s borders to foreign ready made apparel global competition damaged the local industry and unraveled worker entitlements and expectations but also presented new economic opportunities for engaging the global market This fascinating ethnography explores contemporary life in the Signature Fashions garment factory where the workers attempt to exploit gaps in these new labor configurations through illicit and informal uses of the factory a practice they colloquially refer

to as thieving a chance Drawing on fifteen months of fieldwork author Rebecca Prentice combines a vivid picture of factory life first person accounts and anthropological analysis to explore how economic restructuring has been negotiated lived and recounted by women working in the garment industry during Trinidad s transition to a neoliberal economy Through careful social coordination the workers thief by copying patterns taking portions of fabric teaching themselves how to operate machines and wearing their work outside the factory Even so the workers describe their thieving as a personal individualistic enterprise rather than a form of collective resistance to workplace authority By making and taking furtive opportunities they embrace a vision of themselves as enterprising subjects while actively complying with the competitive demands of a neoliberal economic order Prentice presents the factory not as a stable institution but instead as a material and social space in which the projects plans and desires of workers and their employers become aligned and misaligned at some moments in deep harmony and at others in rancorous conflict Arguing for the productive power of the informal and illicit Thieving a Chance contributes to anthropological debates about the very nature of neoliberal capitalism and will be of great interest to undergraduate students graduate students and faculty in anthropology labor studies Caribbean studies and development studies

X-Rays, Spirits, and Witches Julian M. Murchison, 2017-09-15 Based on primary research conducted in Tanzania over the last fifteen years X Rays Spirits and Witches provides an ethnography specifically designed for use in medical anthropology classes The text is organized around four key topics that are recurrent themes in medical anthropology across diverse settings medical pluralism illness narratives embodied experiences of health and illness and the multilayered ways that power dynamics influence healthcare In addition to telling an engaging story of health illness and medical treatment as experienced in a real world setting the chapters link anthropological terms and concepts to specific events Unobtrusive in text definitions as well as a complementary glossary of terms help students recognize and employ the language of medical anthropology Short pull out boxes explore key concepts such as the idea of the medical gaze and highlight for further consideration issues which are of particular relevance in the medical anthropology classroom Such pedagogical elements are designed to complement but not bog down the ethnography enabling students to make better connections between real world research and core textbook concepts

Health Mark Nichter, 2008-04-24 In this lesson packed book Mark Nichter one of the world's leading medical anthropologists summarizes what more than a quarter century of health social science research has contributed to international health and elucidates what social science research can contribute to global health and the study of biopolitics in the future Nichter focuses on our cultural understanding of infectious and vector borne diseases how they are understood locally and how various populations respond to public health interventions The book examines the perceptions of three groups whose points of view on illness health care and the politics of responsibility often differ and frequently conflict local populations living in developing countries public health practitioners working in international health and health planners policy makers The book is written for both health social scientists working in the fields of international health and development and public health practitioners interested in learning practical lessons they can put to good use when engaging communities in participatory problem solving Global Health critically examines representations that frame international health discourse It also addresses the politics of what is possible in a world compelled to work together to face emerging and re-emerging diseases the control of health threats associated with political ecology and defective modernization and the rise of new assemblages of people who share a sense of biosociality The book proposes research priorities for a new program of health social science research Nichter calls for greater involvement by social scientists in studies of global health and emphasizes how medical anthropologists in particular can better involve themselves as scholar activists *Irish Fever* Meredith Linn, 2024-03-22

NAMED AN OUTSTANDING ACADEMIC TITLE OF 2024 BY CHOICE REVIEWS During the Potato Famine of the nineteenth century about one million Irish people perished from starvation and disease while more than two million fled the country in fear and desperation with some 850 000 landing in New York City After a difficult journey many found themselves impoverished taking dangerous jobs and battling miserable living conditions in an unfamiliar urban landscape These circumstances resulted in high rates of illness injury and death compared with other immigrant groups and native born

Americans In this profound study Meredith B Linn explores three kinds of afflictions typhus fever tuberculosis and work related injuries that disproportionately affected Irish immigrants tracing how existing medical ideas and technologies intersected with American prejudices to further conspire against this once culturally distinct group Linn makes a compelling case for how Americans interpretations of the visible bodily changes wrought by typhus fever and injuries contributed to essentializing and dehumanizing biases against these new immigrants while tuberculosis with its symptoms of fatigue pallor and emaciation enabled Americans to see individuals beyond stereotypes and to recognize the equal humanity of the Irish Drawing upon extensive archaeological records folkloric sources and historical documents Linn presents what she terms a visceral historical archaeology a perspective rooted in historical archaeology and medical anthropology to illuminate the experiences of these immigrants She investigates their health related ideas and practices and reveals their efforts to heal themselves using popular remedies from Ireland and several new American commodities Laden with heartrending stories from real working class Irish and their American doctors this richly illustrated book provides new perspectives about urban experience in the context of the Irish diaspora and invites contemplation about how illness injury and healing have affected the lives and reception of newcomers to the US
