Rethinking Development in Latin America Charles H. Wood, Bryan R. Roberts, 2010-11-01 Working Hard, Drinking Hard Adrienne Pine, 2008-05-07 Honduras is violent Adrienne Pine situates this oft repeated claim at the center of her vivid and nuanced chronicle of Honduran subjectivity Through an examination of three major subject areas violence alcohol and the export processing maquiladora

industry Pine explores the daily relationships and routines of urban Hondurans She views their lives in the context of the vast economic footprint on and ideological domination of the region by the United States powerfully elucidating the extent of Honduras s dependence She provides a historically situated ethnographic analysis of this fraught relationship and the effect it has had on Hondurans understanding of who they are The result is a rich and visceral portrait of a culture buffeted by the forces of globalization and inequality

*Toxic Injustice* Susanna Rankin Bohme,2015 The pesticide dibromochloropropane known as DBCP was developed by the chemical companies Dow and Shell in the 1950s to target wormlike soil dwelling creatures called nematodes Despite signs that the chemical was dangerous it was widely used in U S agriculture and on Chiquita and Dole banana plantations in Central America In the late 1970s DBCP was linked to male sterility but an uneven regulatory process left many workers especially on Dole s banana farms exposed for years after health risks were known Susanna Rankin Bohme tells an intriguing multilayered history that spans fifty years highlighting the transnational reach of corporations and social justice movements Toxic Injustice links health inequalities and worker struggles as it charts how people excluded from workplace and legal protections have found ways to challenge power structures and seek justice from states and transnational corporations alike

*Coffeeland* Augustine Sedgewick,2021-04-06 A New York Times Book Review Editors Choice Extremely wide ranging and well researched In a tradition of protest literature rooted more in William Blake than in Marx Adam Gopnik The New Yorker The epic story of how coffee connected and divided the modern world Coffee is an indispensable part of daily life for billions of people around the world But few coffee drinkers know this story It centers on the volcanic highlands of El Salvador where James Hill born in the slums of Manchester England founded one of the world s great coffee dynasties at the turn of the twentieth century Adapting the innovations of the Industrial Revolution to plantation agriculture Hill helped turn El Salvador into perhaps the most intensive monoculture in modern history a place of extraordinary productivity inequality and violence In the process both El Salvador and the United States earned the nickname Coffeeland but for starkly different reasons and with consequences that reach into the present Provoking a reconsideration of what it means to be connected to faraway people and places Coffeeland tells the hidden and surprising story of one of the most valuable commodities in the history of global capitalism

**Globalization in the 21st Century** B. Berberoglu,2010-04-12 This book examines the development and transformation of global capitalism in the late 20th and early 21st century It analyzes the dynamics and contradictions of the global political economy through a comparative historical approach based on class analysis After providing a critical overview of neoliberal capitalist globalization over the past three decades the book examines the emergence of new forces on the global scene and discusses the prospects of change in the global economy in a multi polar direction in the decades ahead The book concludes by focusing on the mass movements that are playing a central role in bringing about the transformation of global capitalism

**Waves of Protest** Paul D. Almeida,2008-01-01 One of the first longitudinal studies of collective resistance in the developing world Waves of

Protest examines large scale contentious action in El Salvador during critical eras in the country's history. Providing a compelling analysis of the massive waves of protests from the early twentieth century to the present in El Salvador, Paul D. Almeida fully chronicles one of the largest and most successful campaigns against globalization and privatization in the Americas. Drawing on original protest data from newspapers and other archival sources, Almeida makes an impassioned argument that regime liberalization organizes civil society and conversely acts of state sponsored repression radicalize society. He correlates the ebb and flow of protest waves to the changes in regime liberalization and subsequent democratization and back to liberalization. Almeida shows how institutional access and competitive elections create opportunity for civic organizations that become radicalized when authoritarianism increases, resulting at times in violent protest campaigns that escalate to revolutionary levels. In doing so, he brings negative political conditions and threats to the forefront as central forces driving social movement activity and popular contention in the developing world. Paul D. Almeida is assistant professor of sociology at Texas A M University. He is coeditor with Hank Johnston of *Latin American Social Movements: Globalization, Democratization and Transnational Networks*. *Roots of Resistance* Suyapa G. Portillo Villeda, 2021-03-16 Winner of the 2021 Sara A. Whaley Prize of the National Women's Studies Association (NWSA). A first of its kind study of the working class culture of resistance on the Honduran North Coast and the radical organizing that challenged US capital and foreign intervention at the onset of the Cold War, examining gender, race, and place. On May 1, 1954, striking banana workers on the North Coast of Honduras brought the regional economy to a standstill, invigorating the Honduran labor movement and placing a series of demands on the US-controlled banana industry. Their actions ultimately galvanized a broader working class struggle and reawakened long-suppressed leftist ideals. The first account of its kind in English, *Roots of Resistance* explores contemporary Honduran labor history through the story of the great banana strike of 1954 and centers the role of women in the narrative of the labor movement. Drawing on extensive firsthand oral history and archival research, Suyapa G. Portillo Villeda examines the radical organizing that challenged US capital and foreign intervention in Honduras at the onset of the Cold War. She reveals the everyday acts of resistance that laid the groundwork for the 1954 strike and argues that these often overlooked forms of resistance should inform analyses of present-day labor and community organizing. *Roots of Resistance* highlights the complexities of transnational company hierarchies, gender, and race relations and labor organizing that led to the banana workers strike and how these dynamics continue to reverberate in Honduras today.

**Communities in Globalization** Juan Pablo Pérez Sáinz, Katharine Andrade-Eekhoff, 2003 There is a silent globalization being carried out far below the action of multinational firms, international organizations, and state policies. It is the work of societies, communities of determined and creative people. *Communities in Globalization* richly illustrates the experiences of three Central American communities connected with global markets. The unique perspective of each is developed to show the economic, political, institutional, and social effects of its connection with world trade. Ultimately, this book seeks to identify the

resources that allow a community to face globalization while minimizing risks and maximizing opportunities *Inside War* Fabio Armao, 2016-02-22 The post Cold War era was characterised by both the recurrence of state wars and the spread of forms of organised violence other than wars Asymmetric warfare between alliances led by the USA and groups of insurgents such as those witnessed in Afghanistan and Iraq coexist alongside domestic conflicts such as that of former Yugoslavia and more recently Libya and Syria and still other conflicts involving gangs mafias or narco traffickers The massive military industrial complexes conceived in the context of the threat of nuclear Armageddon are still there of course but they now coexist with irregular armies of insurgents carrying out massacres through the use of light weapons and improvised explosives devices This book opposes the idea that this situation prefigures the return to an anarchical pre political condition by assuming that new wars are rather the product of the blurring of the public private divide induced by the end of the Cold War together with globalisation As a consequence also the internal and external factors are blurred and ever more permeable and elusive is becoming even the border between war and crime *Inside War* goes beyond a state centered analysis and adopts an interdisciplinary and multilayered approach and is intended to foster the dialogue among researchers from different fields It places war at the core of analysis assuming that the reality of war is what we make of it and that the only insurmountable limit to our comprehension of war is our way of knowing and representing it Fabio Armao teaches courses in Politics and Globalisation Processes and Criminal Systems He has been Visiting Professor at Cornell University and co convenor of the Standing Group on Organized Crime European Consortium for Political Research Founding member of T wai Torino World Affair Institute he is also member of the Editorial Board of Global Crime His research interests and publications focus on international wars and geopolitics on violent non state actors and transnational organised crime and on urban security

**Entrepreneurship in the Informal Economy** Mai Thi Thanh Thai, Ekaterina Turkina, 2013-03-05 Although entrepreneurship in the informal economy occurs outside state regulatory systems informal commercial activities account for an estimated 30% of economic activity around the world Informal entrepreneurship goes unmonitored despite the fact that it significantly contributes to poverty reduction and economic development As a result the informal sector is open to unethical practices including corruption worker exploitation and natural environment abuse to name just a few In the media debates have formed around whether informal entrepreneurship should be assisted or legitimized Hence a deep understanding of the phenomenon is vitally important This book is the first on the market to offer models and approaches to informal entrepreneurship as well as to its prospects for economic development Offering an in depth examination of informal entrepreneurship in many different countries it reveals the motivations for engaging in entrepreneurship in the informal economy characteristics of informal entrepreneurship and informal entrepreneurs response to ethical issues This volume illustrates the relationship between formal and informal economies and the conditions for the benefits of informal entrepreneurship to outweigh its disadvantages And finally it gives recommendations about when and how the informal

economy can be formalized which sectors should be formalized and which ones can remain informal This book offers much needed guidance for stakeholders involved in economic development programs and scholars and entrepreneurs interested in the field of informal entrepreneurship as it is developing around the globe *International Encyclopedia of Geography, 15 Volume Set* Noel Castree, Michael F.
