Historical Dictionary of the World Bank Sarah Tenney, Anne C. Salda, 2013-10-30 When it was founded back in 1944 no one could possibly have foreseen how the World Bank known more formally as the International Bank for Reconstruction and Development IBRD would flourish Today with 188 members it is by far the largest lender for projects in agriculture health infrastructure and many other fields in developing countries around the world with a budget of billions of dollars and a staff of more than 9 000 and its advice is usually heeded by both the developing countries which borrow from it and the advanced ones which contribute This second edition of the Historical Dictionary of the World Bank shows the substantial progress the Bank has made this mainly through the dictionary section with concise entries on its component institutions related organizations its achievements in various fields some of the major projects and member countries and its various presidents The introduction explains how the Bank works while the chronology traces the major events over nearly 70 years Meanwhile the list of acronyms reminds us just who the main players are And the bibliography directs readers to useful internal documentation and outside studies

The Competitiveness of Tropical Agriculture Roger D. Norton, 2016-12-27 The Competitiveness of Tropical Agriculture A Guide to Competitive Potential with Case Studies describes and synthesizes existing methodologies for evaluating competitiveness in agriculture introduces extensions and refinements and provides a novel approach based on a

combination of quantitative and qualitative methodologies As exports of tropical fruit nuts and other high value crops have been growing very rapidly from developing countries but often encounter serious obstacles in their value chains this book demonstrates how national agricultural policy is oftentimes not guided by considerations of inherent competitiveness In addition the book presents case studies that illustrate the application of these approaches using quantitative frameworks A concluding chapter introduces policy considerations for competitiveness from work in Jordan Colombia Estonia Peru and elsewhere also discussing the role of specific policies in raising competitiveness sustainably and its role in reducing rural poverty Presents evaluations of 105 agricultural products including crops livestock outputs aquaculture products and forestry products Explores insights not found in other competitiveness studies including spatial variation within a country for the same crop relation to the use of skilled labor and above all the role of value chain issues in determining competitiveness Includes analysis of results such as assessing sector wide effects on employment and income of policies that help align the sector with its competitive advantage
