From The Wrong Side A Paradoxical Approach To Psychology:

Sabina Spielrein Angela M. Sells, 2017-07-25 Gold Winner for Psychology 2017 Foreword INDIES Book of the Year Awards Long stigmatized as Carl Jung's hysterical mistress Sabina Spielrein 1885-1942 was in fact a key figure in the history of psychoanalytic thought Born into a Russian Jewish family she was institutionalized at nineteen in Zurich and became Jung's patient Spielrein went on to earn a doctorate in psychiatry practiced for over thirty years and published numerous papers until her untimely death in the Holocaust She developed innovative theories of female sexuality child development mythic archetypes in the human unconscious and the death instinct In Sabina Spielrein Angela M Sells examines Spielrein's life and work from a feminist and mythopoetic perspective Drawing on newly translated diaries papers and correspondence with Jung and Sigmund Freud Sells challenges the suppression of Spielrein's ideas and shows her to be a significant thinker in her own right

Jungian Perspectives on Indeterminate States Elizabeth Brodersen, Pilar Amezaga, 2020-08-09 In Jungian Perspectives on Indeterminate States Betwixt and Between Borders Elizabeth Brodersen and Pilar Amezaga bring together leading international contributors to analyse and interpret the psychological impact of contemporary border crossing both literally and figuratively Each chapter assesses key themes such as migration culture gender and identity formation through a Jungian lens All the contributors sensitively explore how creative forms can help mitigate the trauma experienced when one is forced to leave safety and enter unknown territory and examines the specific role of indeterminacy liminality and symbols as transformers at the border between culture race and gender The book asks whether we are able to hold these indeterminate states as creative liminal manifestations pointing to new forms integrate the shadow other as potential and allow sufficient cross border migration and fertilization as permissible It makes clear that societal conflict represents a struggle for recognition and identity and elucidates the negative experiences of authoritarian structures attached to disrespect and misrecognitions This interdisciplinary collection will offer key insight for Jungian analysts in practice and in training psychotherapists anthropologists political and cultural theorists and postgraduate researchers in psychosocial studies It will also be of great interest to readers interested in migration sexuality gender race and ethnicity studies

From the Wrong Side Adolf Guggenbühl-Craig, 1995 By taking the wrong side of several politically and psychologically correct positions Guggenbühl-Craig exposes the hypocrisy of conventional psychological thinking

Jungian Crime Scene Analysis Aaron B. Daniels, 2018-05-01 This book presents the serial killer as having imagopathy that is a disorder of the imagination manifested through such deficiencies as failure of empathy rigid fantasies and unresolved projections The author argues that this disorder is a form of failed alchemy His study challenges long held assumptions that the Jungian concept of individuation is a purely healthful drive Serial killers are unable to form insight after projecting untenable material onto their victims Criminal profilers must therefore effect that insight informed by their own reactions to violent crime scene imagery using what the author asserts is a form of Jung's active imagination This book posits sexual homicides as irrational shadow

images in our rationalistic modern culture Consequently profilers bridge conscious and unconscious for the inexorably splintered killer as well as the culture at large *Mapping the Psyche Volume 2* Clare Martin,2020-12-09 This book a transcript of the second term of Clare Martin s introductory course in astrology given for the Centre for Psychological Astrology continues her clear insightful and innovative presentation of the basics of astrological study Exploring the planetary aspects and the houses of the horoscope the ten lessons focus on the horoscope as a dynamic interweaving of polarities not only the angles the houses and their related zodiacal signs are examined from the perspective of complementarity but also the enigmatic Moon s Nodes which are interpreted from a fresh and exciting perspective Major and minor aspects are illuminated by examples and discussion from the group and the importance of a missing element or aspect is discussed with originality and depth Volume 2 of Mapping the Psyche is a superb successor to Clare s first volume on the planets and the zodiacal signs and will provide solid groundwork for students taking their first steps in astrology as well as deepening the understanding of experienced practitioners who can benefit from Clare s beautifully structured elegant and comprehensive approach **Wisdom of the Psyche** Ginette Paris,2013-12-16 In the quest for identity and healing what belongs to the humanities and what to clinical psychology Ginette Paris uses cogent and passionate argument as well as stories from patients to teach us to accept that the human psyche seeks to destroy relationships and lives as well as to sustain them This is very hard to accept which is why so often the body has the painful and dispiriting job of showing us what our psyche refuses to see In jargon free language the author describes her own story of taking a turn downwards and inwards in the search for a metaphorical personal death If this kind of mortality is not attended to then more literal bodily ailments and actual death itself can result Paris engages with one of the main dilemmas of contemporary psychology and psychotherapy how to integrate findings and insights from neuroscience and medicine into an approach to healing founded upon activation of the imagination At present she demonstrates what is happening is damaging to both science and imagination **Music, Music Therapy and Trauma** Julie Sutton,2002-04-12 Music communicates where words fail and music therapy has been proven to connect with those who were thought to be unreachable making it an ideal medium for working with those who have suffered psychological trauma Music Music Therapy and Trauma addresses the need for an exploration of current thinking on music and trauma The Absence of Myth Sophia Heller,2006-06-01 Despite contemporary attempts to revive myth this book argues that we are living in a world without myth and looks at what this means for humankind **Apollo's Chariot: The Meaning of the Astrological Sun** Liz Greene,2023-12-01 Many people are familiar with astrology only through Sun sign columns in newspapers but they have little understanding of what it really means to be born under a particular zodiac sign The astrological student may know that the Sun is the most important factor in the birth horoscope but frequently used terms such as self expression give little insight into this most profound and complex of astrological symbols The seminars in this volume explore the many dimensions of the astrological Sun from the

Sun as a father symbol to its importance as a significator of personal identity vocation and spiritual values Also examined are progressions of the Sun to natal planets and major planetary aspects to the natal Sun With so little written work available on the Sun in the horoscope this innovative volume offers psychological and astrological perspectives which will be invaluable for both the student and the professional astrologer

Жинетт Парис,2015-04-07 The Paradox of Trauma and Growth in Pastoral and Spiritual Care Mary Beth

Werdel,2023-10-24 The Paradox of Trauma and Growth in Pastoral and Spiritual Care Night Blooming introduces and bridges the gap between the psychological and spiritual perspectives and responses in trauma work illuminating the complexity of the human phenomenon of growth though suffering that is too easily misunderstood in the context of pastoral and spiritual care Through the hopeful metaphor of night bloomers rare plants that grow because of light but bloom in the darkness it is suggested that while psychological trauma is inherently negative and suffering creates a spiritual inner night moving through

it may reveal a new complex reality of the human experience not previously understood We may see ourselves others or the world in a way that is stronger wiser deeper or more brilliant than we had known before The book presents the goal of pastoral and spiritual work is not to extinguish darkness Nor is it to solely focus on the light The work is to learn how to stay awake through the night without glorifying it Such a task is far easier when we believe there might be a rare and uniquely beautiful bloom to stay awake for and that witnessing such a bloom could have great consequences for living a meaningful life
