Living with Diabetes and Uncertainty in Cairo Mille Kjærgaard Thorsen, 2023-05-18 Living with Diabetes and Uncertainty in Cairo offers an ethnographic exploration of the interactions of two different understandings of type 2 diabetes one related to the notion of agh translated as pressure or stress and another related primarily to obesity The book is set in Egypt but draws links to a diabetes clinic in Denmark and a multinational medical company as well as engaging with international diabetes research and guidelines It tells a story of uncertainty not only among people in Cairo but also within medical research and considers what uncertainty may generate in both bodies and societies at large The chapters provide valuable insight into the lives of those in Cairo who are diagnosed with type 2 diabetes and explore how those lives are linked to global movements The book ultimately reflects on the question of what is overlooked and why in prevention strategies and treatments of type 2 diabetes in Egypt It will be of particular interest to scholars of anthropology global and public health and the Middle East and North Africa

Technoscience in Progress. Managing the Uncertainty of Nanotechnology S. Arnaldi, A. Lorenzet, F. Russo, 2009-07-29 Nanotechnology seems to escape boundaries and definitions The Rush to Nanoscale spreads throughout different sites and arenas involving a multiplicity of actors meanings and spaces in which they emerge The uncertainty of nanotechnology appears to be both a condition and a consequence of this situation This volume adds to the collective effort of charting the multiple and heterogeneous dimensions that characterise nanotechnology by analysing the numerous modalities through which different stakeholders and actors provide definitions attribute meaning and sense to nano enabled innovations The chapters of the book attempt to highlight how nanotechnologies their discourse and their actual and potential implications cannot be isolated in laboratories factories markets and separate discussion arenas Also the volume examines how it is apparently not possible to bind and or confine the definition of nanotechnology by referring exclusively to present day research and applications as well as to geographical cultural and even disciplinary boundaries Considered together this collection of essays suggests that the societal experiment of nanotechnology has to be explored with a vocabulary that is not just scientific and technical in order to cross the frontiers between multiple domains actors identities translations and negotiation processes that occur in the nanotechnology field

Turkish Foreign Policy in an Age of Uncertainty F. Stephen Larrabee, Ian O. Lesser, 2003-01-14 The authors describe the challenges and opportunities facing Turkey in the international environment during a time of extraordinary flux Special emphasis is given to the strategic and security issues facing Turkey including a number of new issues posed by the terrorist attacks of September 2001 and the subsequent international response They conclude by offering

some prognostications regarding the country's future and their implications on Turkey's western partners

Computational Red Teaming Hussein A. Abbass, 2014-10-30 Written to bridge the information needs of management and computational scientists this book presents the first comprehensive treatment of Computational Red Teaming CRT The author describes an analytics environment that blends human reasoning and computational modeling to design risk aware and evidence based smart decision making systems He presents the Shadow CRT Machine which shadows the operations of an actual system to think with decision makers challenge threats and design remedies This is the first book to generalize red teaming RT outside the military and security domains and it offers coverage of RT principles practical and ethical guidelines The author utilizes Gilbert's principles for introducing a science Simplicity where the book follows a special style to make it accessible to a wide range of readers Coherence where only necessary elements from experimentation optimization simulation data mining big data cognitive information processing and system thinking are blended together systematically to present CRT as the science of Risk Analytics and Challenge Analytics Utility where the author draws on a wide range of examples ranging from job interviews to Cyber operations before presenting three case studies from air traffic control technologies human behavior and complex socio technical systems involving real time mining and integration of human brain data in the decision making environment

Measuring Uncertainty within the Theory of Evidence Simona Salicone, Marco Prioli, 2018-04-23 This monograph considers the evaluation and expression of measurement uncertainty within the mathematical framework of the Theory of Evidence With a new perspective on the metrology science the text paves the way for innovative applications in a wide range of areas Building on Simona Salicone's Measurement Uncertainty An Approach via the Mathematical Theory of Evidence the material covers further developments of the Random Fuzzy Variable RFV approach to uncertainty and provides a more robust mathematical and metrological background to the combination of measurement results that leads to a more effective RFV combination method While the first part of the book introduces measurement uncertainty the Theory of Evidence and fuzzy sets the following parts bring together these concepts and derive an effective methodology for the evaluation and expression of measurement uncertainty A supplementary downloadable program allows the readers to interact with the proposed approach by generating and combining RFVs through custom measurement functions With numerous examples of applications this book provides a comprehensive treatment of the RFV approach to uncertainty that is suitable for any graduate student or researcher with interests in the measurement field

Decision Making under Uncertainty Kerstin Preuschoff, Peter N. C. Mohr, Ming Hsu, 2015-06-16 Most decisions in life are based on incomplete information and have uncertain consequences To successfully cope with real life situations the nervous system has to estimate represent and eventually resolve uncertainty at various levels A common tradeoff in such decisions involves those between the magnitude of the expected rewards and the uncertainty of obtaining the rewards For instance a decision maker may choose to forgo the high expected rewards of investing in the stock market

and settle instead for the lower expected reward and much less uncertainty of a savings account Little is known about how different forms of uncertainty such as risk or ambiguity are processed and learned about and how they are integrated with expected rewards and individual preferences throughout the decision making process With this Research Topic we aim to provide a deeper and more detailed understanding of the processes behind decision making under uncertainty

Moonheart Charles de Lint,1994-02-15 Fantasy roman HEC-FDA Sensitivity and Uncertainty Analysis Mary Joyce Briant,2001 The U S Army Corps of Engineers software HEC FDA is a tool that uses Risk based Analysis to compute Expected Annual Damage EAD for flood damage reduction studies EAD reduction is computed as the difference between EAD with and without alternative projects a quantity used to aid in flood damage reduction project selection Depending on the time and money spent in the collection and preparation of the input data sets relatively lesser or greater accuracy can be achieved in EAD computation Sets of numerical experiments on synthetic large and small drainage basins show that EAD is differently sensitive to the major input functions to HEC FDA and their associated uncertainties depending on drainage area and the shape of the damage stage curve The results from the synthetic data sets are verified by two case studies on the Blue River Missouri and the Chippewa River Georgia The relative sensitivity of EAD to its input functions and associated uncertainties can be used in federal investment decision making for flood damage reduction projects **Commercial Organic Analysis:**

pt. 1. Tannins, dyes and coloring matters, writing inks Alfred Henry Allen,1900 Horizontal Equity, Uncertainty, and Economic Well-being National Bureau of Economic Research,1985-09 The result of a National Bureau of Economic Research Income and Wealth conference held in December 1983 this volume looks at the concept of economic well being and the ways that analysts have tried to measure it In addition to income economists have begun to consider such factors as pensions wealth health and environment when measuring the well being of a particular group They have also begun to measure how consumers respond successfully or unsuccessfully to such economic uncertainties as inflation divorce and retirement Using new data and techniques the contributors to this book concentrate on issues of uncertainty and horizontal equity the equal treatment of individuals within a defined group Their work points to better ways of determining how various groups in a society are faring relative to other groups Economists and policy analysts therefore will be in a better position to determine how government programs should be applied when well being is used as a test **Spatial Uncertainty for Ecology**

,2001-06-29 This is one of the first books to take an ecological perspective on uncertainty in spatial data It applies principles and techniques from geography and other disciplines to ecological research and thus delivers the tools of cartography cognition spatial statistics remote sensing and computer sciences by way of spatial data After describing the uses of such data in ecological research the authors discuss how to account for the effects of uncertainty in various methods of analysis

The Specific Brightness of Colors Bertha Musson Luckey,1916 **Defence Planning and Uncertainty** Stephan Frühling,2014-04-24 How can countries decide what kind of military forces they need if threats are uncertain and history is

full of strategic surprises This is a question that is more pertinent than ever as countries across the Asia Pacific are faced with the military and economic rise of China Uncertainty is inherent in defence planning but different types of uncertainty mean that countries need to approach decisions about military force structure in different ways This book examines four different basic frameworks for defence planning and demonstrates how states can make decisions coherently about the structure and posture of their defence forces despite strategic uncertainty It draws on case studies from the United States Australian and New Zealand each of which developed key concepts for their particular circumstances and risk perception in Asia Success as well as failure in developing coherent defence planning frameworks holds lessons for the United States and other countries as they consider how best to structure their military forces for the uncertain challenges of the future

Uncertainty Modeling in Dose Response Roger M. Cooke, 2009-05-20 A valuable guide to understanding the problem of quantifying uncertainty in dose response relations for toxic substances In today s scientific research there exists the need to address the topic of uncertainty as it pertains to dose response modeling Uncertainty Modeling in Dose Response is the first book of its kind to implement and compare different methods for quantifying the uncertainty in the probability of response as a function of dose This volume gathers leading researchers in the field to properly address the issue while communicating concepts from diverse viewpoints and incorporating valuable insights The result is a collection that reveals the properties strengths and weaknesses that exist in the various approaches to bench test problems This book works with four bench test problems that were taken from real bioassay data for hazardous substances currently under study by the United States Environmental Protection Agency EPA The use of actual data provides readers with information that is relevant and representative of the current work being done in the field Leading contributors from the toxicology and risk assessment communities have applied their methods to quantify model uncertainty in dose response for each case by employing various approaches including Benchmark Dose Software methods probabilistic inversion with isotonic regression nonparametric Bayesian modeling and Bayesian model averaging Each chapter is reviewed and critiqued from three professional points of view risk analyst regulator statistician mathematician and toxicologist epidemiologist In addition all methodologies are worked out in detail allowing readers to replicate these analyses and gain a thorough understanding of the methods Uncertainty Modeling in Dose Response is an excellent book for courses on risk analysis and biostatistics at the upper undergraduate and graduate levels It also serves as a valuable reference for risk assessment toxicology biostatistics and environmental chemistry professionals who wish to expand their knowledge and expertise in statistical dose response modeling problems and approaches

Essays on Risk and Uncertainty in Economics and Finance Jorge Mario Uribe Gil , 2022-11-22 This book adds to the resolution of two problems in finance and economics i what is macro financial uncertainty How to measure it How is it different from risk How important is it for the financial markets And ii what sort of asymmetries underlie financial risk and uncertainty propagation across the global financial markets That is how risk and

uncertainty change according to factors such as market states or market participants In Chapter 2 which is entitled Momentum Uncertainties the relationship between macroeconomic uncertainty and the abnormal returns of a momentum trading strategy in the stock market is studied We show that high levels of uncertainty in the economy impact negatively and significantly the returns of a portfolio of stocks that consist of buying past winners and selling past losers High uncertainty reduces below zero the abnormal returns of momentum extinguishes the Sharpe ratio of the momentum strategy while increases the probability of momentum crashes both by increasing the skewness and the kurtosis of the momentum return distribution Uncertainty acts as an economic regime that underlies abrupt changes over time of the returns generated by momentum strategies In Chapter 3 Measuring Uncertainty in the Stock Market a new index for measuring stock market uncertainty on a daily basis is proposed The index considers the inherent differentiation between uncertainty and the common variations between the series The second contribution of chapter 3 is to show how this financial uncertainty index can also serve as an indicator of macroeconomic uncertainty Finally the dynamic relationship between uncertainty and the series of consumption interest rates production and stock market prices among others is analyzed In chapter 4 Uncertainty Systemic Shocks and the Global Banking Sector Has the Crisis Modified their Relationship we explore the stability of systemic risk and uncertainty propagation among financial institutions in the global economy and show that it has remained stable over the last decade Additionally a new simple tool for measuring the resilience of financial institutions to these systemic shocks is provided We examine the characteristics and stability of systemic risk and uncertainty in relation to the dynamics of the banking sector stock returns This sort of evidence is supportive of past claims made in the field of macroeconomics which hold that during the global financial crisis the financial system may have faced stronger versions of traditional shocks rather than a new type of shock In chapter 5 Currency downside risk liquidity and financial stability downside risk propagation across global currency markets and the ways in which it is related to liquidity is analyzed Two primary contributions to the literature follow First tail spillovers between currencies in the global FX market are estimated This index is easy to build and does not require intraday data which constitutes an important advantage Second we show that turnover is related to risk spillovers in global currency markets Chapter 6 is entitled Spillovers from the United States to Latin American and G7 Stock Markets A VAR Quantile Analysis This chapter contributes to the studies of contagion market integration and cross border spillovers during both regular and crisis episodes by carrying out a multivariate quantile analysis It focuses on Latin American stock markets which have been characterized by a highly positive dynamic in recent decades in terms of market capitalization and liquidity ratios after a far reaching process of market liberalization and reforms to pension funds across the continent during the 80s and 90s We document smaller dependences between the LA markets and the US market than those between the US and the developed economies especially in the highest and lowest quantiles
