*From opium war to liberation* Israel Epstein, 1997      *From Opium War to Liberation* Israel Epstein, 1980      *From Opium War to Liberation* Israel Epstein, 1998      *Shanghai in Transition* Jos Gamble, 2005-07-27 In the decades following the introduction of Communist Party rule in Shanghai in 1949 the city's economy infrastructure and links with the world all atrophied. However the past decade has seen far reaching economic reforms implemented to recreate Shanghai as a cosmopolitan world financial and trade centre. This book focuses on the lives of local residents and their perceptions of their changing city and presents an evocative series of ethnographic perspectives of the city's shifting sociological landscape in this period of transition.

**Revolution Highway** Dilip Simeon, 2010      *Enduring Controversies in Military History* Spencer C. Tucker, 2017-09-21 This provocative examination of major controversies in military history enables readers to learn how scholars approach controversial topics and provides a model for students in the study and discussion of other historical events. Why did Alexander the Great's empire fall apart so soon after his death? How did France win the Hundred Years War despite England winning its major battles? Was slavery the primary cause of the American Civil War? Would it have benefited the Allies militarily to have gone to war against Germany in 1938 rather than in 1939? Should women be allowed to serve in combat positions in the U.S. military? All of these questions and many other historical controversies are addressed in this thought provoking reference book. By exploring every angle of some of the most contentious debates involving military history this book builds students' critical thinking skills by supplying a complete background of the controversial topic to provide context and also by providing multiple perspective essays written by top scholars in the field. The perspective essays present arguments for different positions on the controversy. Readers will consider the cases for and against whether Hannibal should have marched on Rome after his momentous victory at Cannae, whether the United States was justified in using the atomic bomb in Japan, whether Adolf Hitler was primarily responsible for the Holocaust and whether torturing prisoners during the War on Terror is warranted among many other historical military debates.

**At Home in Many Worlds** Raoul David Findeisen, 2009 This volume is dedicated to one of the founding figures of Israeli Chinese studies Professor Irene Eber of The Hebrew University of Jerusalem. It assembles more than two dozen essays by colleagues from all over the world that reflect not only the wide range of her scholarly interests but above all the fields of research which would not have been established without her and where her contributions will remain. Accordingly the section Philosophy in China and Intellectual History discusses the thorny and complex process of organizing the heritage from the earliest constructed traditions in Han times around the beginning of our era up to the debates on modernization in present day China. After an excursion in Chinese Literature much space is devoted to Translating the Bible in China, a topic on which her numerous studies have proved seminal and that deals with Chinese perceptions. As its complement perceptions of China in systematic and historical perspective are at the core of the section devoted to Jewish Life and Letters in the World. The contributions

share their approach of paying particular attention to the translation processes strictly speaking and to the hermeneutical process of understanding across time and space more generally A comprehensive list of publications by Irene Eber concludes the volume

political thinking to accounts of legal and cultural practices to politically astute approaches to historiography The contributors to this volume all take the parameters and contours of Cartledge's work which has profoundly influenced an entire generation of scholars as starting points for their own historical and historiographical explorations Those parameters and contours provide a common thread that runs through and connects all of the essays while also offering sufficient freedom for individual contributors to demonstrate an array of rich and varied approaches to the study of the past
