## From Solids:

High-order Harmonic Generation In Solids Marcelo Ciappina, Paraskevas Tzallas, 2024-06-11 High order harmonics emerging from the interaction of strong laser fields with solid matter constitute a novel highly sensitive tool for interrogating electronic structure and dynamics in solids At the interface of attosecond physics and condensed matter physics this book provides an excellent overview of the current state of the art Ferenc Krausz Nobel Laureate in Physics 2023 High order harmonic generation HHG in solids the nonlinear upconversion of coherent radiation resulting from the interaction of a strong and short laser pulse with bulk matter has come of age Since the seminal experiments and theoretical developments there has been a constant and vibrant interest in this topic In this book we invite experimental and theoretical experts in the field with the aim to summarize the progress made so far and propose new possibilities and prospects for the generation of high order harmonics using solid samples Nowadays it is possible to engineer both spatially and temporally with nanometric and attosecond resolution the driven fields This could bring solid HHG to the next exciting frontier as novel and fully tunable table top coherent sources
