Stringer,1989-09-29 The development of our ancestors is traced by fossil evidence of various ancestral groups in a survey that expands from man s earliest beginnings through the emergence of modern humans **Evolution or Creation?** Albert Debenedictis,2014-04-02 This book is designed to share the research on the origins of the universe and the origins of life with those who are truly interested in making their decisions regarding origins as well as those who are simply curious about opposing views **Stone Tools in Human Evolution** John J. Shea,2017 An exploration of how the evolution of behavioral differences between humans and other primates affected the archaeological stone tool evidence *A Story of Us* Lesley Newson,Peter J. Richerson,2021 Changes in the environment drive evolution and evidence suggests that our ancestors evolved to use cultural adaptations to survive environmental fluctuations of great severity In *A Story of Us* Lesley Newson and Peter Richerson explain the evidence and ideas that provide an account of how they coped using short descriptive stories to illustrate life at different stages of our evolutionary history **The ^AWorld from Beginnings to 4000 BCE** Ian Tattersall,2008-02-01 In this lively and readable introduction renowned anthropologist Ian Tattersall thoroughly examines both fossil and archaeological records to trace human evolution from the earliest beginnings of our zoological family Hominidae through the appearance of *Homo sapiens* to the Agricultural Revolution *Human Evolution* Robin Dunbar,2014-05-01 What makes us human How did we develop language thought and culture Why did we survive and other human species fail The past 12 000 years represent the only time in the sweep of human history when there has been only one human species How did this extraordinary proliferation of species come about and then go extinct And why did we emerge such intellectual giants The tale of our origins has inevitably been told through the stones and bones of the archaeological record yet Robin Dunbar shows it was our social and cognitive changes rather than our physical development which truly made us distinct from other species **In the Beginning: World History from Human Evolution to the First States** Lauren Ristvet,2007-01-09 This engaging and accessible volume draws on the most recent historical archeological scholarship to tell the stories of human evolution gathering and hunting societies and the distinct breakthroughs that led to the emergence of the earliest cities states and civilizations Highlighting both the separate paths and the intersecting journeys of diverse human communities In the Beginning provides the essential but often neglected foundation on which all subsequent historical development was constructed *The Human Story* Charles Lockwood,2008 Anthropology professor Charles Lockwood tells the amazing story of human evolution in a concise and compelling introduction to all our ancestors and extinct relatives He draws on the explosion of discoveries made over the past 20 years to demystify the fascinating cast of characters who hold the secret to our origins and describes the main sites individual

Kinship and Human Evolution Steen Bergendorff,2016-03-07 Kinship and Human Evolution Making Culture Becoming Human offers an exciting new explanation of human evolution Based on insights from anthropology it shows how humans became cultured beings capable of symbolic thought by developing kinship based exchange relationships Kinship was as an adaptive response to the harsh environment caused by the last major ice age In the extreme ice age conditions natural selection favored those groups that could forge and sustain such alliances and the resulting relationships enabled them to share different food resources between groups Kinship was a means of symbolically linking two or more groups to the mutual reproductive advantage of both From an evolutionary point of view kinship freed humans from their dependence

on their immediate environment vastly expanding the niches they could occupy If we take kinship to be the major factor in human evolution networks and alliances must precede cultural units becoming the defining element of localized cultures Kinship and Human Evolution argues that it is living in networks that produces cultural differences and not culturally different groups that encounter one another it shows that kinship both saved and created humanity as we know it in all its cultural diversity
