The Will to Learn Martin V. Covington, 1998 This book introduces the basic principles of motivation as they apply to classroom learning and management in a readable non technical form Covington argues against the popular notion that the problems existing in schools today stem primarily from a lack of student motivation Instead he asserts that students are motivated sometimes even overly motivated but often for the wrong reasons Traditional teaching methods including conventional grading procedures and an emphasis on competition can contribute to student demoralization and Covington identifies the ways in which students respond to misguided incentives For some students motivation is directed at avoiding failure by avoiding participation For others demoralization leads to withdrawal from an educational system that they believe to be irrelevant to their lives Still other students are driven to prove their worth by outperforming fellow students The book suggests practical concrete ways that teachers can use classroom incentives to inspire a desire to learn *American Buddhism* Christopher Queen, Duncan Ryuken Williams, 2013-10-18 This is the first scholarly treatment of the emergence of American Buddhist Studies as a significant research field Until now few investigators have turned their attention to the interpretive challenge posed by the presence of all the traditional lineages of Asian Buddhism in a consciously multicultural society Nor have scholars considered the place of their own contributions as writers teachers and practising Buddhists in this unfolding saga In thirteen chapters and a critical introduction to the field the book treats issues such as Asian American Buddhist identity the new Buddhism Buddhism and American culture and the scholar s place in American Buddhist Studies

The volume offers complete lists of dissertations and theses on American Buddhism and North American dissertations and theses on topics related to Buddhism since 1892 **Saigon** Nghia M.
