Shadows of Thought Richard John Koscielow,2018-04-18 Any of the existing classifications can usefully be supplemented by thinking about the functional differences or similarities revealed by the visual possibility of a frame of reference in terms of the distinction between nonconceptual and conceptual content Of course there are no dependence relations between concept possession and states with nonconceptual content As a satisfactory theory of nonconceptual content must be able to provide an account of the conditions under which it is appropriate and warranted to ascribe states with nonconceptual content particularly of the evidence that might otherwise have been provided by language use Some philosophers would resist that perceptual experience has nonconceptual content It might be argued that the content of perception is exhausted by dispositions to acquire beliefs The idea is that there is no more to perceptual content than can be given by perceptual beliefs or dispositions To acquire such beliefs is only plausible if the notion of belief and of content possession are weakened so far that they effectively come into the domain of nonconceptual content Broadly speaking the idea is that if a subject is to be properly credited with mastery of the concepts in the thought a being F then that subject must be capable of thinking a being G for any property G of which he has a conception and similarly of thinking b is F for any object is that which he has a conception

The Holographic Soul Mike Hockney,2016-01-02 Where is your mind located How does it interact with your body When your body dies does your mind die too or does it have an afterlife That s the mystery of existence If humanity cannot answer these questions once and for all then it has no understanding of reality Holography is what allows scientific materialism to be replaced by mathematical idealism Holography allows the soul rather than matter to be considered the source of reality Over 300 years ago Leibniz with his Monadology adopted a holographic model of reality whereby dimensionless monads created the illusion of the dimensional material world The answer to existence has always been right in front of humanity in the shape of mathematics The spacetime universe of matter is nothing but an ontological hologram that comes inbuilt with mathematical forcefields that lend it the illusion of being solid It s all in the math Everything starts with unextended minds dimensionless Fourier singularities mathematical souls
