The Routledge Handbook of Disaster Response and Recovery Bimal Kanti Paul, Luke Juran, 2025-03-25 The Routledge Handbook of Disaster Response and Recovery covers the two post disaster stages of the disaster cycle and presents an extensive and cutting edge overview of their many considerations. Organized into two parts: Response and Recovery, this handbook details the history, theories, methods, debates, and emerging issues in the stages of response and recovery. Using a transdisciplinary approach, the myriad topics examined in this handbook include search and rescue, myths related to disaster response, technological methods for response and recovery among vulnerable populations, and the intersection of disasters and mental health. Contributors discuss these issues both globally as well as country and disaster specific. This book is an essential guide and reference not only for scholars engaged in disaster research but also for undergraduate and graduate students, policy makers, disaster managers, international and supranational agencies, and humanitarian and volunteer organizations engaged in disaster management.

Transitions and Boundaries in the Coordination and Reform of Health Services Peter Nugus, Charo Rodriguez, Jean-Louis Denis, Denis Chênevert, 2020-01-08 Health systems worldwide are grappling with the challenge of coordinating difference in an increasingly complex care environment. In response, this book features the latest research on organizational studies in healthcare and explores the relationship between strategic and organic change and what this means for the way we organize health work. Focusing on the complexity of healthcare environments, it discusses the need to cross professional and organizational boundaries. Specifically, this book focuses on the implications for health systems in the way that they continue to balance planning and intervention with organic learning systems. Comprising the best contributions from the 2018 Conference on Organizational Behaviour in Health Care (OBHC), this book is an important resource for healthcare researchers as well as policy makers and managers within the industry. Contributors explore the extent to which healthcare is codified through empirical analysis of practical interventions and conceptual debate.

Transforming Unequal Gender Relations in India and Beyond Saroj Pachauri, Ravi K. Verma, 2023-09-08 This book offers a unique intersectional perspective on gender equality (SDG5). It presents an intersection of gender with caste, class, region, ethnic, and sexual identities and other structural drivers of inequalities in various development sectors. It presents case studies and empirical findings from development practice and policymaking and highlights the challenges to implementing SDG5 in practice. It discusses policies to promote gender equality and prevent violence against women and girls and women in decision making and leadership positions. The chapters reiterate that gender equality is possible only if unequal gender norms are transformed to recognize women and girls as independent economic entities and not merely homemakers providing unpaid care. It also analyzes to deconstruct the idea of monolithic masculinity to recognize gender diversity and men's role in providing care. The book shows how much has been achieved yet how far is also left to go. It is an essential reference point for researchers, policymakers,

Psychiatric Criminology John A. Liebert, MD, William J. Birnes, JD, PhD, 2016-10-03 Since the shutdown of our public psychiatry system, the seriously mentally ill are now mostly managed by public safety officers, school officials, emergency first responders, and social workers with little experience in recognizing symptoms, triggers, and issues. This book addresses the need to recognize the psychiatric component of criminological issues and the methodology of dealing with it on a practical as well as academic basis. It provides a roadmap for training in rapid assessment built on evidence-based emergency psychiatry protocols.

The Economics of the UK Health and Social Care Labour Market Robert Elliott, 2024-03-06 Three million workers delivered health and social care in the UK in 2019, accounting for a tenth of the workforce. These frontline workers were the nurses, doctors, adult care workers, and Allied Health Professions that worked in our hospitals, GP practices, and care homes. Spending on this workforce is the largest single item of cost on health and social care, with fifty percent of the current spend of a typical UK hospital going on its frontline workforce. *The Economics of the UK Health and Social Care Labour Market* details the size, occupational composition, geographical coverage, and growth of this workforce. Here, Robert Elliott explains why people work in frontline care and what drives the demand for these workers; details the heavy dependence of UK health and social care on foreign-trained workers; and explores its consequences and considers how the labour market for frontline workers operates, how these workers' pay is set, and what has happened to it in recent years. Elliott explores the reasons for the acute shortage of some key frontline occupations and explains why economic theory is essential to understanding the way this labour market works and to constructing coherent and effective policy. Finally, the book proposes policies to improve the efficiency of this
